

Rapid Response Teams Continuous Learning

RAPID RESPONSE TEAMS
TRAINING

Our Goal

Member States empowered to reinforce the capacities and skills of their Rapid Response Teams (RRTs) to early detect and rapidly respond to epidemics and other public health events at national and sub-national levels.

What is the RRT Continuous Learning?

The RRT Continuous Learning (RRT CL) of the RRT Training Programme provides access to selected online courses and learning resources that meet the needs of RRT members in their various areas of expertise. These courses may be offered by WHO or its partners. The RRT CL aims at engaging and maintaining RRT members, RRT managers and RRT trainers into a continuous learning process.

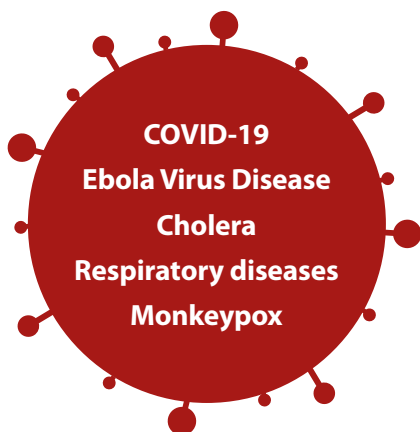

For whom?

RRT members, RRT managers, and RRT trainers.

What's in it for me?

Disease specific online courses and learning resources

Specialized online courses and learning resources
