

Rapid Response Teams Training of Trainers Package

Our Goal

Member States empowered to reinforce the capacities and skills of their Rapid Response Teams (RRTs) to early detect and rapidly respond to epidemics and other public health events at national and sub-national levels.

What is the RRT TOT?

The Rapid Response Teams Training of Trainers Package (RRT TOT) aims at enabling future training coordinators and facilitators to plan, organize, facilitate and evaluate Rapid Response Teams Advanced Training (RRT ATP) tailored their country specific context and needs.

For whom?

Professionals having the responsibility of and qualifications for designing and delivering training geared to public health professionals in the areas of emergency preparedness and response.

What's in it for me?

WHO quality standard learning resources, accompanied by instructor and participant guides, to support capacity building of national and subnational level RRTs.

Content:

Introduction to RRT establishment and management

Facilitating the RRT scenario- based skills drill

RRTs mandate, roles, knowledge, and skills

Planning and coordinating RRT training: instructional, organizational, and logistic aspects

Facilitating skills stations (PPE, hand hygiene, chlorine solution)

Evaluating RRT training

Languages

The RRT TOT is available in English and French. Other UN languages may be available in the near future.

Where to access the RRT TOT?

Access the RRT Training of Trainers Package on the Health Security Learning Platform:
