Rapid Response Teams Manager Online Learning Programme

Dashboard » Courses » Pilot versions » RRT MLP

Course Introduction

The Rapid Response Team Manager Online Learning Programme (RRT MLP) is especially geared to RRT managers.

This is the online component of the RRT MLP, which is a blended-learning programme, combining online self-learning modules with a downloadable training package to run the face-to-face component of the programme. A RRT Management Toolbox will also be made available to RRT managers to facilitate operationalization and adaptation to country context of what they learnt through the RRT MLP.

The RRT MLP aims to provide RRT managers with the knowledge, skills, attitudes (KSA) and tools they need to ensure that RRTs are effectively established, run, tested and maintained during preparedness phase, and that RRTs are operational according to set procedures during response phase.

The online component of this programme includes eight short interactive modules of approximately 30 minutes duration each. Upon successful completion of each module, you will be able to download a Certificate of Completion. If you successfully complete the eight modules, a Certificate of Programme Completion will be generated automatically.

The RRT MLP is a component of the Rapid Response Teams Training Implementation Package for Member States and was developed jointly by WHO and the U.S. Centers for Disease Control and Prevention.

Module 1: Establishing and managing Rapid Response teams

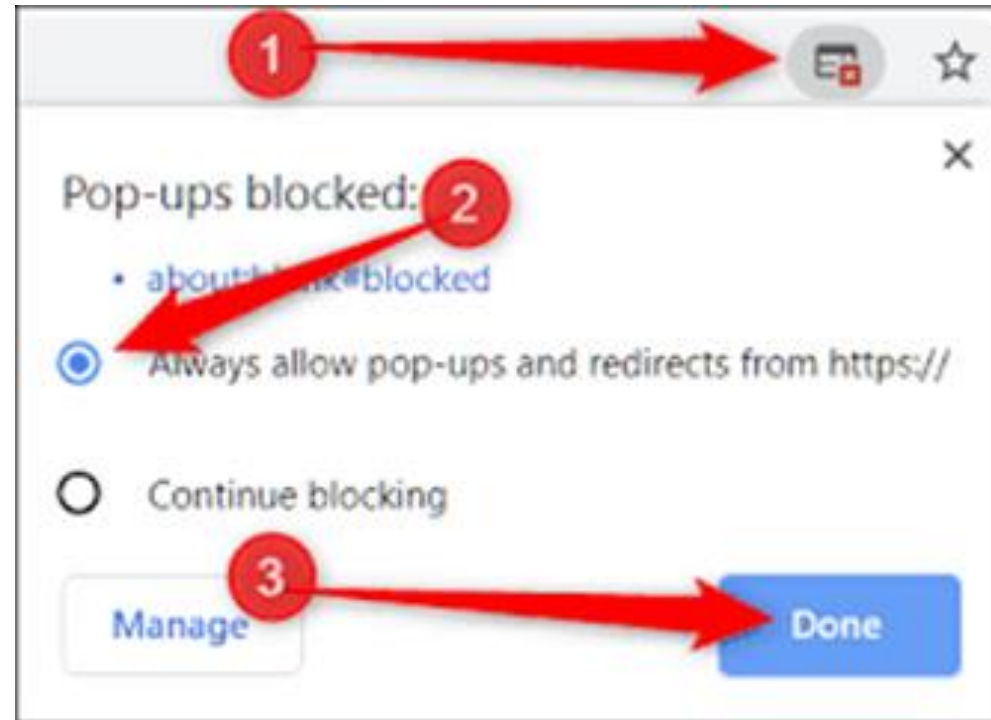

Module 1: Establishing and managing Rapid Response teams

The purpose of this module is to introduce how the RRT programme can be established and managed, to describe the role of RRT management within the emergency coordination unit, as well as the place of RRTs in the Emergency Response System.

After completing this module you will be able to:

- ✓ Define Rapid Response Teams (RRTs).
- ✓ Describe the objectives of RRT management.
- ✓ Define the role of RRT management during emergency and non-emergency phases.
- ✓ Define the place and role of RRTs within the Emergency Response System.

Important: when clicking on the module link, the module will open in a pop-up window. This requires that you allow pop-up windows in your browser, as shown on the image below.

If you still encounter difficulties to register or access the RRT ELP, please send an email to Paula Gomez, at: gomezp@who.int

Module introduction

This module will look at establishing and managing Rapid Response Teams. The purpose of this module is to:

- Introduce the establishment and management of the RRT programme;
- Describe the role of the RRT manager and the emergency coordination unit;
- Explore the place of RRT in the Emergency Response System.

A large, solid orange circle is positioned on the left side of the slide, partially cut off by the edge.

If you still encounter difficulties to register or access the RRT MOC, please send an email to the Learning Solutions and Training Unit, email: ihrhrt@who.int

A yellow dashed line is located in the bottom right corner of the slide, consisting of several short, curved segments.
