The Rapid Response Team Essentials Online Learning Programme (RRT ELP) is geared to members of RRTs, RRT managers, RRT trainers and mentors.

The programme is composed of twelve short interactive modules of approximately 30 minutes duration each. Upon successful completion of each module, you will be able to download a Certificate of Completion.

This programme is a component of the Rapid Response Teams Training Implementation Package for Member States.

Course Progress: 0% complete

Click Here

Module 1: Introduction to public health emergency response

The purpose of this module is to situate RRTs within the Emergency Response System, review their role and their relationship with other key response actors.

After completing this module you will be able to:

- ✓ Describe the Incident Management System (IMS) and understand its role in managing an emergency.
- ✓ Describe the role and responsibility of a Public Health Emergency Operations Center (PHEOC).
- ✓ Describe the importance and need of logistics in an RRT and identify steps of the Logistic Supply Plan.
- ✓ Explain the role of RRTs vis-à-vis other key response actors, according to the type of the risk/event.

 Certificate of Completion - Module 1

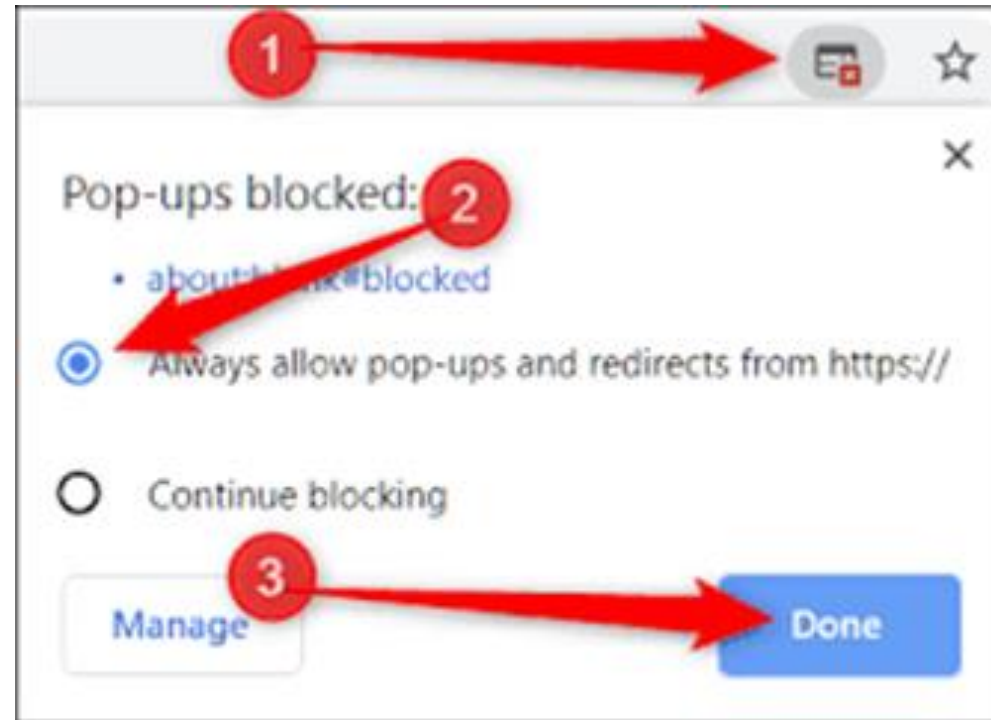

Restricted Not available unless: The activity **Module 1: Introduction to public health emergency response** is marked complete

Module 2: Rapid Response Teams composition and roles

The purpose of this module is to introduce the characteristics of an RRT, and to explore how an RRT may be composed based on the needs of the response and resources available.

After completing this module you will be able to:

Important: when clicking on the module link, the module will open in a pop-up window. This requires that you allow pop-up windows in your browser, as shown on the image below.

Lesson 2 of 13

Emergency Response Framework

© WHO / Mark Nieuwenhof

Introduction to the Emergency Response Framework

The **Emergency Response Framework (ERF)** was developed by WHO to provide its staff with essential guidance on how the Organization manages the **assessment, grading and response** to public health events and emergencies with health consequences, in support of Member States and affected communities.

While the ERF focuses primarily on acute events and emergencies, it also introduces WHO's new **grading process** for protracted emergencies.

If you still encounter difficulties to register or access the RRT ESOC, please send an email to the Learning Solutions and Training Unit, email: ihrhrt@who.int
