Age- friendly Belfast

A city where older
people live life to the full

Summary plan 2014-2017

**Belfast Strategic
Partnership**
supported by
Belfast Health Development Unit

Context

The World Health Organisation (WHO) Global Network of Age-friendly Cities and Communities (GNAFCC) was established to foster the exchange of experience and mutual learning between cities and communities worldwide.

An Age-friendly City is defined as an inclusive and accessible urban environment that promotes active ageing.¹

In 2012, Belfast City Council All Party Reference Group on Older People provided the initial leadership to explore Belfast becoming an Age-friendly City. Subsequently, in May 2012, the Lord Mayor signed a declaration committing Belfast to this process.

Many of the key voluntary, community and public organisations providing services for older people are members of Belfast Strategic Partnership (BSP). This partnership identified healthy ageing as a priority within its Framework for Action to reduce life inequalities in Belfast. It was therefore agreed that BSP should lead the age-friendly process supported by the existing Healthy Ageing Strategic Partnership (HASP).

An Age-friendly City must:

1. Establish mechanisms to involve older people throughout the age-friendly process
2. Develop a baseline assessment of the age-friendliness of the city under eight domains;
 - outdoor spaces and buildings,
 - transportation,
 - housing,
 - social participation,
 - respect and social inclusion,
 - civic participation and employment,
 - communication and information, and
 - community support and health services.
3. Develop a 3-year city-wide action plan
4. Identify measurements to monitor progress against this plan.

Involving Older People

HASP works closely with Greater Belfast Seniors Forum, a representative group of older people in Belfast. Age Partnership Belfast (APB) supports this Forum and a network of numerous forums and groups, which play an important role in involving older people throughout the age-friendly process.

Considerable consultative work with older people was conducted during 2013. Our aim was to place older people from diverse backgrounds at the heart of this process. This was achieved through an age-friendly survey, consultation events and focus groups with equality groups. This consultation involved over 700 older people.

Developing the baseline assessment

Having consulted and established older people's views, these were used together with statistical data from the Northern Ireland Statistics and Research Agency's Northern Ireland Neighbourhood Information Services (NISRA/NINIS) to develop a baseline assessment for Belfast.

Developing a Vision and an Action Plan

A series of briefings and workshops were held throughout the year involving a wide range of organisations, service providers and older people's representative's. These considered the baseline assessment and developed the vision, key themes/priorities and Age- friendly action plan. We also held a 6 week consultation on our proposed plan for Age-friendly Belfast ending 21st February 2014. This consultation endorsed the approach outlined below, with organisations highlighting additional actions that would link to the plan and the importance of using an intergenerational approach in particular priority areas such as age-friendly neighbourhoods and environments.

Our vision is that Belfast will be a city where older people live life to the full.

Making it happen

Leadership and governance for Age-friendly Belfast will be provided by Belfast Strategic Partnership (BSP), which is a collaborative multi-sectoral partnership that aims to reduce life inequalities in Belfast.

The Healthy Ageing Strategic Partnership (HASP) will co-ordinate delivery of the 3-Year Age-friendly Belfast Plan. It will submit a detailed action plan to the World Health Organisation (WHO) with agreed targets over time, and indicators. HASP will periodically monitor and publish progress against the action plan and report to BSP. After three years HASP will evaluate the project, identify successes and areas for future improvement. The evaluation report will be submitted to BSP and subsequently to WHO. The HASP Age-friendly team will also provide specific support for the development of the positive ageing campaign, age-friendly charter, intergenerational work and the Age-friendly Convention.

Lead organisations as identified will oversee the delivery and performance management of relevant aspects of the age-friendly action plan and report progress to HASP.
