**Toward An Age-friendly Akita City**

- Akita City Age-Friendly City Action Plan (Summary)

1. Current Status and Expected Future Status for Aging in Akita City
   [Movement of Population Aging Rate]

![Graph showing population aging rate](image)

It is expected that the population of the city will continue to decrease while the population aging rate* will increase to 36.6% by 2030, which is above the national average.

* Population aging rate: Percentage of persons 65 and older in the total population

2. Akita City Age-Friendly City Plan

In the past, we had only viewed the elderly as "People who need to be helped". However, many older people desire to use their abundant experience, knowledge, and skills to be active citizens. Therefore, it is important to establish a system for providing opportunities and situations for such people to contribute as "supporters" of society, and to establish a society where such people can lead active lives even after they become in need of help.

Akita City is making efforts to be an "Age-Friendly City" where each individual citizen can lead active lives, even after they become older, as "supporters (or contributors)" of society and not as "people who need to be helped". In this way, we want to take our society of world-renowned longevity, established by our ancestors, and enrich it even more as we pass it on to future generations.
3. Akita City Age-Friendly City Action Plan Formulation

In the 12th Akita City Comprehensive Plan "Prefectural Capital 'Akita' Development Plan" that began in the 2011 fiscal year, Akita City positioned "Age-Friendly City Realization" as a development strategy, and began to respond to a super-aged society based on a new perspective. As a part of this, we are participating in the "WHO Age-Friendly City Global Network" (as of the end of July 2013, we are the only city in Japan to participate).

Akita City, as a city participating in this network, has developed an "Akita City Age-Friendly City Action Plan" which describes the city's basic concept for an age-friendly city and outlines the action items to be carried out collaboratively between the city government and its citizens as well as those to be actively planned and conducted by the citizens themselves. This plan aims to facilitate implementation of these actions and to promote awareness of the commitment and activities of Akita City.

4. Efforts by Akita City

- May 2010  Established the Akita City Age-Friendly City Plan Promotion Group
- March 2011  Formulated 12th Akita City Comprehensive Plan
-> Positioned the "Age-Friendly City Realization" as one of the development strategies.
  June          The Akita City Age-Friendly City Plan Promotion Group personally delivered the "Proposal
                  Document for the Akita City Age-Friendly City Plan" to the Akita Mayor
  September    Held the 1st Akita City Age-Friendly City Forum
                  The Age-Friendly City Manifest was submitted to the First International Conference on Age
                  Friendly Cities, and we signed onto the "Dublin Declaration".
  November    Invited the International Federation on Ageing (First time) for an event on Age-friendly Cities.
                  Expressed desire to the WHO to participate in the WHO Global Network of Age-friendly Cities and
                  Communities.
  December    Approved by the WHO to join the WHO Global Network of Age-friendly Cities and Communities
- May 2012  The mayor attended the 11th International Federation on Ageing Global Conference on Ageing (Prague, Czech Republic)
  November  Invited the International Federation on Ageing (Second time) for an Age-friendly City event.
  February  Held the 2nd Akita City Age-Friendly City Forum
The Akita City Age-Friendly City Action Plan has two pillars: a "Government-Oriented Action Plan" that consists of city government basic measures, and a "Citizen-Oriented Action Plan" that was created from the beginning by citizens. The city government and citizens share the city's "Age-Friendly City Image" aspiration, and will work in close collaboration while actively promoting their own approach.

**[Basic Principle]**
A society in which people can lead a lively life by continuing to be active and contributing to their local communities even in older age

**[Basic Policies]**
For realizing the basic principle, efforts will be made in collaboration between the city government and local citizens according to the following eight basic policies.

1. **[Basic Policy 1]**
   Organize outdoor spaces, buildings, and facilities where people can gather safely

2. **[Basic Policy 2]**
   Improve the convenience of transportation facilities

3. **[Basic Policy 3]**
   Organize a living environment for the elderly

4. **[Basic Policy 4]**
   Encourage social participation by the elderly

5. **[Basic Policy 5]**
   Create a region and society where all generations appreciate each other

6. **[Basic Policy 6]**
   Increase opportunities for the elderly to work and for citizen participation

7. **[Basic Policy 7]**
   Organize an information environment for the elderly

8. **[Basic Policy 8]**
   Improve health, welfare, and medical services for organizing community support systems
**[Government-Oriented Action Plan]**

These eight basic policies are sorted into 26 basic measures to clarify development of measures, and to promote the main efforts and projects for each basic policy.

</table>
The main characteristic of the Akita City Age-Friendly City Action Plan is the "Citizen-Oriented Action Plan" that is an index for citizens to promote independent efforts formulated by citizens themselves. The "Citizen-Oriented Action Plan" consists of two action themes and four action plans that are implemented mainly by citizens, which were determined during the 12 workshop-type meetings held by work groups open to the public.

<Two Action Themes & 4 Action Plans>

<Theme 1> Considering Age-Friendliness at Nearby Locations
“Businesses / People / Towns”

Ideas such as countermeasures for isolation of the elderly, stores that are easy for the elderly to use, and measures for vulnerable shoppers are formed and implemented for activating communities in the setting of local markets. In addition, actions that need to be taken by the city government for this, things that need to be done by local markets, things that need to be done by local residents, and things that can be done through collaboration of communities and NPOs are considered.

(1) [Shop Manager for a Day - Behind the Scene at a Shop]
A citizen becomes a shop manager for a day in collaboration with the stores at local markets. This creates opportunities for the elderly to feel, "Why don't I go out to the store where a friend or family member is the shop manager for a day?"

(2) [Town Concierge]
A town courtesy counter (concierge) is developed. Citizens from different generations act as concierges according to themes such as Food and History so that citizen exchange and attachment to the community can be created.

<Theme 2> Age-Friendly Public Awareness Information Dissemination

Information dissemination for dispelling the negative image of aging and creating a positive image, and public awareness of an age-friendly city using media are considered.

(3) [Establishment of an Event Planning Committee]
Various events for dissemination age-friendly city information and for creating situations where the elderly can actively contribute are planned and implemented. Elderly people’s participation can promote their physical health and also promote intergenerational interaction.

(4) [Establishment of an Age-Friendly Discovery Committee]
Discovering things in the city that are "Age-Friendly", and disseminating that information. This can help raise public awareness about what it means to be an Age-friendly City.
7. A Friendly City for Everyone

An "Age-Friendly City" is a town where local residents can be active throughout their life. In other words, it is a town that is easy for all people to live including people with disabilities and families with small children in addition to the elderly. Akita City will create an age-friendly city in order to create a city that is "friendly" for everyone.
