

Guaymallén – Action plan

The Municipality of Guaymallén has been working on the development of public policies for all the older adults of our community, in order to guarantee an age-friendly community and improve their quality of life.

Furthermore, the implementation of the Program “For friendly cities and communities with older adults”, in accordance with the visions and strategies of the Global Network of Age-friendly Cities and Communities promoted by the World Health Organization has allowed the team participating in this Program to develop valuable working skills and interact with different areas of the public administration such as INSSJP-PAMI and the government of the province of Mendoza. Currently the technical team has finished the qualitative research, which is a fundamental step of the implementation of the Program “For friendly cities and communities with older adults”.
