

To The Global Network for Age-Friendly Cities and Communities,

The City of Isfahan is committing to a future where the needs of older adults are more carefully considered in the building of infrastructure, the planning of programs, and the making of policy.

We are going to thoroughly assess the needs of older adults, and directs them to engage seniors in developing strategies that will ensure a safer and more prosperous, livable, and well-run city for the residents of all ages.

Older Isfahanians make an extremely valuable contribution to city life - as professionals, volunteers and carers. We want to encourage all Isfahanians to participate actively in community activities and to treat everyone with respect, regardless of their age. To do so, the Global Network for Age-Friendly Cities and Communities is one of the most platforms that can help the city of Isfahan in exchanging experiences with other leading cities across the world, as well as benefiting from the knowledge of experts and consultants of this global network.

We look forward to working with other age-friendly cities and communities across the world.

Sincerely yours

Dr. Ghodratollah Norouzi
Mayor of Isfahan
