

Results of Evaluation of the 1st plan

- This survey conducted a Matrix Analysis(IPA) based on the results of Delphi survey for experts in Jongno-gu
- The importance and feasibility of each project are analyzed using IPA analysis for 44 detailed projects for each of the seven areas of fostering Age-friendly City and tasks derived from Delphi survey results for experts in Jongno-gu
- At the same time, expert group is divided into two groups (expertises and public officials), and comparative analysis is conducted on the results between groups
- IPA is analyzed in two main ways
- First, the importance priority results of the eight major areas and the importance priority results of each of the 44 projects are reviewed to derive the four project rankings
- Second, since the evaluation of each projects may vary dramatically according to the priorities of the eight major areas, the average value of the seven major areas was indexed to apply weighted value to detailed projects, and four business rankings were derived based on those values
- This research analyzes the priority of the first Age-friendly City projects based on the IPA analysis results
