Chapter 3. Establishment of a plan to create an aged-friendly city

Chapter 3. Establishment of a plan to create an aged-friendly city

Section 1. Basic directions

☐ As the aging society progresses, it is necessary to cope with various areas such as health and medical support, economic and social participation, activity and safety in the outdoor spaces, and it is important to see aging as an opportunity rather than a problem.

☐ Improvement of policies to make them more suitable for senior citizens by allowing them to participate and contribute in policymaking.

☐ The elderly-friendly city is not just a policy to support the elderly, but to restore the vitality of the elderly and lay the foundation for the elderly to live together with all members of society, so that they can continue their lives as proud citizens in the society.

☐ Activation of political and social participation and establishment of partnerships with various civil societies is required so that senior citizens can not only function as economic producers but also serve as emotional mentors and social volunteers to the younger generation.

☐ Based on the guidelines presented by the WHO, the government draws up feasible strategic tasks through gathering opinions from citizens and experts, such as analyzing the current status, diagnosis of age-friendliness, and roundtable discussions.

Section 2. Vision and strategy

☐ The vision is to create a successful aged-friendly city where the elderly can have rejuvenating retirement, without leaving the place where they have lived, by selecting the vision "Successful Goseong, city where the elderly are comfortable and happy."

☐ The implementation strategy is to set the creation of a safe and convenient life, provide means of participation and communication with the community, and provide a rejuvenating and healthy retirement based on the sectors of the physical, socioeconomic environment, and social services

☐ The action plan is to improve the quality of life of the elderly and revitalize the city through participation of the elderly in local activities, by utilizing their rich knowledge and experiences

<Picture 3-1> Vision and implementation strategy system

Section 3. Action Plans by Field

1. Creation of a safe and convenient environment

□ Outdoor spaces and buildings

<Table 3-1> Major projects for outdoor spaces and buildings

No	Major projects	Department in charge	Classification
1-1	Efficient maintenance of village shelters	Greenery Park	Expansion
1-2	Pruning of trees or removal of damaged trees around the residential area	Greenery Park	Expansion
1-3	Improvement of pedestrian safety zone for elderly Pedestrians	Construction	Expansion
1-4	Installation and maintenance of street lamps and security lights	Construction	Expansion

□ Transportation

<Table 3-2> Major projects for transportation

No	Major projects	Department in charge	Classification
2-1	Expansion of Happy Taxi operation	Urban Transportation	Expansion
2-2	Special transportation means for vulnerable road users	Urban Transportation	Expansion
2-3	Operation of bus safety assistance	Urban Transportation	Expansion
2-4	Expansion and operation of public parking lots	Urban Transportation	Expansion

□ Residential facilities

<Table 3-3> Major projects for residential facilities

No	Major projects	Department in charge	Classification
3-1	Public silver housing support project	Architectural Development	expansion
3-2	A project to renovate living conditions in marginalized areas	Construction	expansion
3-3	A project to improve the residential environment in rural areas.	Architectural Development	expansion

1-1	Project name	Classification
	Efficient maintenance of village shelters	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Efficient maintenance of village shelters	No. of shelters created	Greenery park department

■ Implementation background and details

Actual condition and need	○ Depending on the results of the study on the actual condition of the shelter, priority maintenance is required for target sites with severe deterioration and high risk of accidents.
Implementation direction	○ The new shelter installation project is implemented by minimizing the number of villages without shelters.
Details	○ Shelter construction project: 17 places (3 new, 13 renovated, 1 relocated) ○ Landscape Facility Maintenance Project: 25sites

■ Objectives

Performance target
Continuous maintenance (painting, roof replacement, stair and floor repair, etc.) of existing shelters

■ Expected output

Expected output
Provision of a comfortable and well-maintained shelter and rest area that everyone enjoys

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Efficient maintenance of village shelters	Performance indicator(sites)	17	17	17
	Budget	480	480	480

1-2	Project name	Classification
	Pruning of trees or removal of damaged trees around the residential areas	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Pruning of trees or removal of damaged trees around the residential areas	No. of trees at risk removed	Greenery park department

◼ Implementation background and details

Actual condition and need	○ In order to ensure the safety of residents around the living area, trees at risk of disaster are removed in advance
Implementation direction	○ Trees at risk of causing injuries due to connection to houses and facilities ○ In the case of trees with the same risk, priority maintenance of dangerous trees in the houses of the elderly such as the elderly living alone
Details	○ Project target: Dangerous trees that can cause damage around living areas (houses and facilities) ○ Project volume: Removal of around 50 dangerous trees that could cause damage

◼ Objectives

Objectives
Remove Trees at risk of disaster in advance

◼ Expected output

Expected output
Prevention of damage to people and property and relief of residents' anxiety

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Pruning of trees or removal of damaged trees around the residential area	Performance indicator	50trees	50trees	50trees
	Budget	50	50	50

1-3	Project name	Classification
	Improvement of pedestrian safety zones for elderly pedestrians	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Improvement of pedestrian safety zones for elderly pedestrians	No. of designated pedestrian safety zones for elderly pedestrians	Construction department

◼ Implementation background and details

Actual condition and need	○ By designating and managing pedestrian safety zones for vulnerable road users (children, the elderly) and installing traffic safety facilities accordingly, accidents are prevented
Implementation direction	○ Quick implementation of local residents' ideas and resolution of small-scale inconveniences
Details	○ Maintenance and repair of traffic safety facilities such as anti-skid pavement, crosswalks, enforcement cameras, crash barriers, integrated signs, speed bumps, lane painting, and lane regulation rods ○ Project volume: 5 sites in Goseong

◼ Objectives

Objectives
Create a safe environment for pedestrians, especially the elderly

◼ Expected output

Expected output
Creation of safe transportation environments through designated pedestrian safety zones for vulnerable road users

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Improvement of pedestrian safety zones for elderly pedestrians	Performance indicator	−	−	5
	Budget	270	270	270

1-4	Project name	Classification
	Installation and maintenance of streetlight and security lights	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Installation and maintenance of streetlights and security lights	Maintenance quantity of old street lights Installation quantity of security lights in rural areas No. of project target areas	Construction

■ Implementation background and details

Actual condition and need	○ Creation of a safe walking environment by repairing old street lamps and installing security lights ○ Budget savings by replacing LED lamps for security lights in rural areas
Implementation direction	○ Creating a safe walking environment by improving road I through replacement of LED streetlights
Details	○ Urban streetlight maintenance: 60 lights ○ Installation of security lights in rural areas: 200 lights ○ Streetlight maintenance (safety diagnosis): 8,700 lights (2 areas)

■ Objectives

Objectives
Create a safe pedestrian environment

■ Expected output

Expected output
Improvement of road lighting and elimination of blind spots

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Maintenance of old street lights	Performance indicator	60	60	60
	Budget	68	68	68
Installation of security lights in rural areas	Performance indicator	200	200	200
	Budget	200	200	200
Project target area	Performance indicator	2 sites	2 sites	2 sites
	Budget	343	343	343

2-1	Project name	Classification
	Happy taxi operation	expansion

◼ Project classification

Details	Performance indicator	Department in charge
Happy taxi operation	No. of uses	Urban Transportation

◼ Implementation background and details

Actual condition and need	○ It is necessary to provide high-quality transportation services to residents of underprivileged areas who are experiencing inconvenience due to the lack of bus service or low number of trips. ○ Guarantee of the right to move for residents by providing public transportation in marginalized areas
Implementation direction	○ Happy Taxi operation status check, performance analysis, and satisfaction survey
Details	○ Supporting the operation of happy taxis in remote villages, subsidizing the remaining amount excluding residents' fees

◼ Objectives

Objectives
Enhance public transportation services in marginalized areas

◼ Expected output

Expected output
Elimination of mobility inconvenience by providing public transportation in marginalized areas and provision of transportation welfare in remote areas through a regional customized transportation model

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Happy taxi operation	Performance indicator (No. of cases)	13,000	13,000	13,000
	Budget	294	294	294

2-2	Project name	Classification
	Operation of special transportation means for vulnerable road users	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Operation of special transportation means for vulnerable road users	No. of uses	Urban Transportation

◼ Implementation background and details

Actual condition and need	○ Realization of transportation welfare by providing user-centered customized services to vulnerable road users such as the elderly.
Implementation direction	○ Special transportation user registration and membership system for vulnerable road users ○ Promotion of the use of special transportation means for vulnerable road users due to the increase in the elderly population
Details	○ Project scale: 5 vehicles, 6 drivers, 1 office worker ○ Project details: Operation of transportation support center and special transportation for vulnerable road users ○ Target: Those who feel uncomfortable with movement in their daily life

◼ Objectives

Objectives
Guarantee the right to move and improve the quality of life for vulnerable road users through special transportation operations

◼ Expected output

Expected output
Improvement of the satisfaction of vulnerable citizens in public transportation

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Operation of special transportation means for vulnerable road users	Performance indicator (No. of cases)	5,000	5,000	5,000
	Budget	290	290	290

2-3	Project name	Classification
	Operation of bus safety assistance	Expansion

■ 사업구분

Details	Performance indicator	Department in charge
Operation of bus safety assistance	No. of bus safety assistants	Urban Transportation

■ Implementation background and details

Actual condition and need	○ Promotion of outings and social participation equal to those of non-disabled persons by expanding the right to move for vulnerable road users with limited access to public transportation
Implementation direction	○ Bus safety assistant recruitment and project promotion
Details	○ Various information for passengers on the bus ○ Assistance on boarding for the disabled and the elderly

■ Objectives

Objectives
Provide services to the elderly who have difficulty in using public transportation.

■ Expected output

Expected output
Improvement of image of public transportation to tourists visiting Goseong-gun and to the elderly who are inconvenienced

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Operation of bus safety assistance	Performance indicator	4	5	6
	Budget	24	30	36

2-4	Project name	Classification
	Expansion and operation of public parking lots	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Expansion and operation of public parking lots	No. of slots in the public parking lots	Urban Transportation

◼ Implementation background and details

Actual condition and need	○ Provision of a pleasant environment to users through well-maintained public parking facilities ○ Improvement of the satisfaction of citizens through smooth traffic flow and by providing sidewalks for the elderly
Implementation direction	○ Providing convenient access to public parking lots for both senior citizens and Goseong residents
Details	○ 34-2 Seoe-ri, Goseong-eup, Goseong-gun ○ 193 Yuldae-ri, Goseong-eup, Goseong-gun ○ 19 Seongnae-ri, Goseong-eup, Goseong-gun

◼ Objectives

Objectives
Improve convenience through construction and renovation of public parking lots

◼ Expected output

Expected output
Provision of a pleasant road environment through smooth traffic flow by resolving illegal parking and providing sidewalks for the elderly and residents

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Expansion and operation of public parking lots	Performance indicator(No. of slots)	130	130	140
	Budget	4,405	4,405	4,405

3-1	Project name	Classification
	Public silver housing support	Expansion

▣ Project classification

Details	Performance indicator	Department in charge
Public silver housing support	Level of housing satisfaction	Architectural development

▣ Implementation background and details

Actual condition and need	○ Provision of better living condition for the elderly with poor housing.
Implementation direction	○ Efficient facility management by entrusting facility operation and management to specialized agencies
Details	○ Location: 47-3 Songhak-ro, Goseong-eup, Goseong-gun ○ No. of households: 100 households (60 housing units 20.63㎡, 40 housing units 36.66㎡)

▣ Objectives

Objectives
Improve the quality of the living conditions for the elderly

▣ Expected output

Expected output
Provision of housing and welfare services for the convenience of the elderly.

▣ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Public silver housing support	Performance indicator(%)	70%	75%	80%
	Budget	792	131	131

3-2	Project name	Classification
	Renovation project for the improvement living conditions in marginalized areas	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Renovation of housing in marginalized areas	No. of villages	Construction

■ Implementation background and details

Actual condition and need	○Rental housing is provided to enable safe and stable residential life, but it is not enough to provide stability and improve quality of life.
Implementation direction	○A renovation project to improve safety after the quality is determined.
Details	○ Improvement of sanitation and safety infrastructure: Disaster prevention, repair of hazardous facilities, installation of CCTV, etc. ○ Improvement of housing conditions: Renovation of deteriorated houses of people near the poverty line ○ Provision of support for the underprivileged and the elderly: care, education, etc.

■ Objectives

Objectives
Improve housing stability by creating pleasant living conditions.

■ Expected output

Expected output
Improvement of the quality of life of people living in marginalized areas

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Renovation project for living conditions in marginalized areas	Performance indicator	–	1	3
	Budget	2,027	1,672	1,597

3-3	Project name	Classification
	Improvement of residential environment in rural areas.	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Improvement of living conditions in rural areas.	No. of improvements in living conditions	Architectural Development

◼ Implementation background and details

Actual condition and need	○ For the safety of the elderly, housing remodeling should be an essential, and not an optional support service for the elderly.
Implementation direction	○ Expand support for the expansion of vacant home maintenance subsidies.
Details	○ Support for housing improvement, vacant house maintenance, and repairs.

◼ Objectives

Objectives
Improve housing conditions through vacant home maintenance and renovations

◼ Expected output

Expected output
Improvement of the quality of life and increase in inflow of population.

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
A project to improve the residential environment in rural areas.	Performance indicator(dong)	93	93	93
	Budget	90,660	90,660	90,660

2. Community participation and communication

☐ Social participation

<Table 3-4> Major projects for social participation

No	Major projects	Department in charge	Classification
4-1	Revitalization of senior centers	Welfare support	Expansion
4-2	Support for recreational activities for senior citizens	Sports promotion	Expansion
4-3	Operation of school for the elderly	Welfare support	Expansion
4-4	Operation of community outreach for lifelong learning	Welfare support	Expansion

☐ Respect and social inclusion

<Table 3-5> Major projects for respect and social inclusion

NO	Major projects	Department in charge	Classification
5-1	Strengthening respect and support for national merit and war veterans	Resident life	Expansion
5-2	Senior citizens' day events	Welfare support	Expansion
5-3	Activities of local volunteer instructors in Goseong-gun	Welfare support	New
5-4	Perception-improvement towards senior citizens	Welfare support	New
5-5	Generation integration program (Senior to junior)	Welfare support	New

☐ Civic participation and employment

<Table 3-6> Major projects for civic participation and employment

No	Major projects	Department in charge	Classification
6-1	Activation of the project for creating job opportunities for the elderly	Welfare support	Expansion
6-2	Public work project	Job economy	Expansion
6-3	Operation of an aged-friendly city monitoring group	Welfare support	New
6-4	Operation of Goseong employment and welfare center	Job economy	New

4-1	Project name	Classification
	Revitalization of senior centers	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Revitalization of senior centers	No. of operational support for senior citizens	Welfare support

■ Implementation background and details

Actual condition and need	○ In order to further revitalize the senior centers, a strategic approach is required such as operating an open channel, arranging excellent programs, increasing cultural and artistic activities, and promoting a job linkage system.
Implementation direction	○ Activation of the function of leisure welfare facilities for the elderly for a rejuvenating retirement life
Details	○ Support for senior centers(Operating expenses, heating and cooling expenses, rice supply, health aids, etc.) ○ Operation of lifelong learning outreach programs(43 adult literacy classes, 45 silver play classes, and 1 customized lifelong education)

■ Objectives

Objectives
Secure a sustainable budget to increase the use of senior centers

■ Expected output

Expected output
Provision of convenience to users of senior centers and expanded various lifelong learning opportunities

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Vitalization of senior citizen	Performance indicator	323	323	323
	Budget	3,779	3,779	3,779

4-2	Project name	Classification
	Support for recreational activities for senior citizens	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Support for recreational activities for senior citizens	No. of participants in the program	Sports promotion

■ Implementation background and details

Actual condition and need	○ The need for customization of all recreational programs as the population ages ○ Need for recreational activities to improve immune system due to the coronavirus
Implementation direction	○ Support for recreational activities through outreach programs and new customized programs
Details	○ Recreational programs for all outreach classes (for nursing homes and senior centers) ○ Operation of recreational programs (Longevity sports college)

■ Objectives

Objectives
Support for recreational activities for a healthy and vibrant retirement life of residents

■ Expected output

Expected output
Promotion of health and leisure activities for middle-aged and older residents

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Support for recreational activities for senior citizens	Performance indicator(persons)	300	400	500
	Budget	120	120	120

4-3	Project name	Classification
	Operation of school for the elderly	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Operation of school for the elderly	No. of participants in the school for the elderly	Welfare support

◼ Implementation background and details

Actual condition and need	○ Provision of a space for the elderly for gathering, conducting learning and leisure activities. ○ Contributing to the promotion of the leisure and welfare of the elderly so that they can spend a healthy and comfortable retirement.
Implementation direction	○ Provision of various arts and culture classes and information for a comfortable retirement life
Details	○ Operation of 3 schools for the elderly ○ Operation of recreational programs, health promotion programs, and cultural education programs

◼ Objectives

Objectives
Provide opportunities for recreational activities and lifelong education for the elderly

◼ Expected output

Expected output
Contribution to the high quality of life and cultural welfare for the elderly

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Operation of college for the elderly	Performance indicator(sites)	3	3	3
	Budget	61	61	61

4-4	Project name	Classification
	Community outreach for lifelong learning	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Community outreach for lifelong learning	No. of programs operated	Welfare support

◼ Implementation background and details

Actual condition and need	○ Provision of educational opportunities to senior citizens who have missed chances to learn ○ Need to provide opportunities for lifelong education for the elderly
Implementation direction	○ Activate senior centers through programs suitable for senior citizens
Details	○ Goseong Hakdang: Operation of various programs such as basic education of Hangul and education for improving ability to cope with daily life ○ Silver play class: provision of various movements and entertainment activities such as laughter, healthy clapping, songs (songs, nursery rhymes, folk songs), and silver rhythmic gymnastics to the elderly

◼ Objectives

Objectives
Provide educational opportunities to improve basic living skills, such as the ability to acquire literacy skills necessary for social life

◼ Expected output

Expected output
Had a confident, active and motivated life as a member of society

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Community outreach for lifelong learning	Performance indicator(sites)	88	88	88
	Budget	429	429	429

5-1	Project name	Classification
	Strengthening respect and support for national merit and war veterans	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Strengthening respect and support for national merit and war veterans	No. of recipients of honor benefit allowance	Resident life

■ Implementation background and details

Actual condition and need	○ The need for a society in which the elderly are respected, by developing and promoting various contents to improve the positive image of the elderly, and giving out commendations to exemplary elderly and men of national merit
Implementation direction	○ Promotion of filial piety and commendation of the elderly with exemplary contribution and national merit
Details	○ Target: Veterans organization, Recipients of national merit and their descendants ○ Details: Support for veterans' organizations and their families, payment of honor benefit allowance

■ Objectives

Objectives
Strengthen respect and support for beneficiaries of national merit and war veterans through improved benefits

■ Expected output

Expected output
Increased awareness of national security, creation of a social climate where people of national merit are honored, and life stabilization by promoting functional veterans affairs

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Strengthening respect and support for national merit and war veterans	Performance indicator(persons)	900	900	900
	Budget	1,860	1,860	1,860

5-2	Project name	Classification
	Senior citizens' day	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Seniors citizens' day	No. of participants in the Senior Citizens' Day	Welfare support

◼ Implementation background and details

Actual condition and need	○ Recognition of those who contributed to the creation of a culture of filial piety in celebration of the Elderly's Day ○ Provision of a venue for seniors to enjoy together to have thriving retirement life
Implementation direction	○ Promoting a sense of filial piety among people and vitality among the elderly
Details	○ Event details: Awarding ceremonies for Eup and Myeon

◼ Objectives

Objectives
Encourage respect for the elderly, promote a sense of filial piety, and recognize people who contributed to promoting for the welfare of the elderly.

◼ Expected output

Expected output
Promoted a sense of filial piety, a traditional Korean custom, by increasing interest and respect towards senior citizens.

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Senior citizens' day	Performance indicator(persons)	600	600	600
	Budget	25	25	25

5-3	Project name	Classification
	Activities of local volunteer instructors in Goseong-gun	New

■ Project classification

Details	Performance indicator	Department in charge
Activities of local volunteer instructors in Goseong	No. of local volunteer instructors	Welfare support

■ Implementation background and details

Actual condition and need	○ In addition to physical support, the elderly in modern society are demanding social integration, such as support for social role or emotional stability of the elderly.
Implementation direction	○ Linkage with the Goseong-gun branch of the Korean Senior Citizens' Association
Details	○ Senior citizens' visiting centers (accounting education, safety inspection, listening to difficulties, etc.) ○ Promotion of various welfare policies and events for senior citizens (information) ○ Promotion of volunteer activities for local communities (traffic control, nature conservation, crackdown on environmental violations, etc.)

■ Objectives

Objectives
Improve residents' perception toward the elderly through volunteer instructor activities and revitalize volunteer activities for the elderly in local communities

■ Expected output

Expected output
Promoted community service activities and senior centers, and strengthening public relations on welfare policies for the elderly

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Activities of local volunteer instructors in Goseong-gun	Performance indicator(persons)	30	30	30
	Budget	36	36	36

5-4	Project name	Classification
	Perception-improvement towards senior citizens	New

◼ Project classification

Details	Performance indicator	Department in charge
Perception-improvement towards senior citizens	No. of training sessions	Welfare support

◼ Implementation background and details

Actual condition and need	○ Lack of generational bond and recognition of old people as individuals worthy of respect ○ The need for active community efforts against the increasing number of elderly abuse and discrimination
Implementation direction	○ Contribution to social integration and helping to understand the aging phenomenon accurately by conducting empathy awareness and elderly experience classes
Details	○ Understanding physical difficulties of the elderly through physical experience activities for the elderly

◼ Objectives

Objectives
Promote harmony between generations through proper understanding of the elderly and aging

◼ Expected output

Expected output
Creation of positive perception toward the elderly and mitigate conflict between generations

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Perception-improvement towards senior citizens	Performance indicator(No. of trainings)	4	4	4

	Creating job opportunities for the elderly	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Creating job opportunities for the elderly	No. of participants in the project	Welfare support

◼ Implementation background and details

Actual condition and need	○ The need for customization of jobs for the elderly according to the rapidly increasing needs of the elderly. ○ Motivation as well as mental stability by providing jobs to the elderly
Implementation direction	○ Contribution to the creation of customized jobs for the elderly by operating agencies with professional manpower
Details	○ Expansion of support projects for senior citizens' jobs and social activities (no-no care, Goseong Senior Club, Korean Senior Citizens' Association Goseong branch, Gyeongnam Care Support Center Social Cooperative) ○ Support for the operation of agencies in charge of jobs for the elderly (support for labor and operating expenses for employees of Goseong Senior Club)

◼ Objectives

Objectives
Promote social participation and increase of earned income for the elderly

◼ Expected output

Expected output
Created jobs and improvement of welfare for the elderly by supporting various jobs and social activities

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Creating job opportunities for the elderly	Performance indicator	1,296	1,296	1,296
	Budget	4,627	4,627	4,627

6-2	Project name	Classification
	Public work project	Expansion

■ Project classification

Details	Performance indicator	Department in charge
Public work project	No. of elderly participants	Job economy

■ Implementation background and details

Actual condition and need	○ Promotion of stability of life by providing jobs to the underprivileged ○ The plan to provide job support education for young and middle-aged people, and to provide jobs at best for the elderly who are unable to find employment in the private sector
Implementation direction	○Temporary support for the underprivileged class and basic income support through projects
Details	○ Public Work Projects: Finding suitable projects for the vulnerable to employment, such as service support projects, information service projects, and environmental cleanup projects. ○ Community-based job projects: Environmental maintenance of towns and public facilities to create jobs ○ Local Community Job Project: Promotion of two types of projects: local resource utilization (local specialty product commercialization, jobs related to policy, resource recycling, tourism resource utilization) and local space improvement type

■ Objectives

Objectives
Provide temporary jobs to unemployed persons to lay the foundation for reemployment

■ Expected output

Expected output
Establishment of a stable employment base by providing suitable public jobs for the underprivileged, such as low-income and unemployed people

■ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023
Public work project	Performance indicator	192	192	192
	Budget	1,674	1,674	1,674

6-3	Project name	Classification
	Operation of an elderly-friendly city monitoring group	New

■ Project classification

Details	Performance indicator	Department in charge
Operation of an elderly-friendly city monitoring group	No. of participants over 66 years of age	Welfare support

■ Implementation background and details

Actual condition and need	○ It is necessary to investigate and check the elderly-friendly city project promoted by Goseong, and to discover the inconveniences of the elderly in daily life to come up with improvements to create an elderly-friendly city.
Implementation direction	○ Discovery of policy ideas and monitoring policy implementation to represent the needs and opinions of the elderly
Details	○ Project Target: Seniors 65 years of age or older and Goseong residents who are interested in creating an aged-friendly city ○ Main project details ■ Organization of senior policy monitoring team and strengthening capabilities through professional training ■ Participation in the process of establishing policies for senior citizens in Goseong-gun and presenting opinions ■ Establishment of communication system between monitoring groups (use of website bulletin board, band, etc.)

■ Objectives

Objectives
Operate monitoring team consisting of staffs and Goseong residents to realize an aged-friendly city and promotion of welfare for the elderly

■ Expected output

Expected output
In accordance with the entry into an aged society, the welfare policies for the elderly are efficiently implemented by monitoring and improving the living environment and policies for the elderly

■ Project implementation plan

	Publication of policy to promote open communication administration	Expansion

◼ Project classification

Details	Performance indicator	Department in charge
Publication of policy to promote open communication administration	No. of digital information bulletin boards (DID) installed No. of posts	Goseong Gun administrative innovation officer

◼ Implementation background and details

Actual condition and need	○ Strengthen communication by installing digital information bulletin boards (DIDs) for public information at major facilities that the elderly visit mainly ○ Focusing on the effects of publicity on the elderly through DIDs by displaying the main issues and public information contents of Goseong-gun in a timely and continuous manner
Implementation direction	○ Provision of useful information to the elderly by sharing Goseong-gun's major issues and public information through DIDs
Details	○ Project basis: Article 3 of the Act on the Elimination of Information Gap ○ Installation of the Digital Information Bulletin (DID) ○ Provision of Gosung-gun information through SNS(band, Facebook, Instagram, etc.)

◼ Objectives

Objectives
Share public information, videos, notices, etc. through digital information boards that can be controlled collectively over the network.

◼ Expected output

Expected output
By utilizing public information media suitable for the new media environment, maximize the effect of sharing public information with the elderly and strengthen communication and empathy between administration and senior citizens.

◼ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)		
		2021	2022	2023

7-3	Project name	Classification
	Personalized smartphone training	New

▣ Project classification

Details	Performance indicator	Department in charge
Personalized smartphone training	No of training sessions	Welfare support

▣ Implementation background and details

Actual condition and need	○ Education for the elderly, who are the information-weak class, needs to be provided to address their adaptability to the information society and lessen the digital divide between generations.
Implementation direction	○ 1:1 personalized training with youth volunteer groups, as opposed to training in large groups.
Details	○ Training target : Goseong-gun citizens aged 60 or older ○ Volunteers: Connect with youth volunteers (youth Nanu go) ○ Education method: Systematic personalized training with one main training from professional instructors and one auxiliary training from youth volunteer group ○ Contents : Education focused on contents that are often used in real life

▣ Objectives

Objectives
Improve the information capability of the elderly through smartphone training

▣ Expected output

Expected output
One-on-one personalized smartphone training between the youth volunteer group and the elderly improves training satisfaction and provides opportunities for intergenerational communication

▣ Project implementation plan

Project classification		Implementation plan by year (Unit: Million won)
