

<Age-friendly City Guideline: Gimhae-city>

Field	Issue	Strategic task	Note
Local development and living environment	Local regeneration (urban and rural)		
	1	There is a lack of convenience when the seniors use facilities or buildings.	Composite support based on safety and accessibility is provided so that the senior can use facilities conveniently and safely.
	2	There is a lack of small-scale facilities and spaces for gatherings to exchange with neighbors and to form a community.	In the case of a New Deal project, we support a shared space where can interact with neighbors.
	3	There is no special service for the senior in nearby shopping malls or businesses	In the case of urban regeneration projects, special services (placement of goods, shelter, etc.) are provided for the senior who use shopping malls.
	4	Public toilets are not clean and are not convenient for the senior and infirm.	Increase the convenience and comfort of public toilets in urban regeneration projects.
	Creating an age-friendly residential environment		
	5	The house is old and it is difficult to live continuously, and there is no related information or financial support for home renovation.	Strengthen support for housing stability for the senior.
	6	Lack of housing and related services tailored to the characteristics of the senior.	Provides and supports information related to home improvement in order to enhance the convenience of living in houses and prevent safety accidents.
	Convenience of walking environment		
	7	The walking path is not flat and there are many obstacles, so it feels dangerous.	Support for walking activities and mobility rights for the senior to prevent falls
	Convenience/safety of public transportation		
8	In the case of areas outside the city center, there are many difficulties in using public transportation due to safety, dispatch time, and lack of low-floor buses.	Increase the dispatch time of public transportation and expand the introduction of low-floor buses.	
9	When using public transportation, there are many difficulties for the senior in various ways.	Support vehicle operation to ensure mobility rights of the senior in areas underprivileged in public transportation.	
10	For rural areas where it is difficult to use public transportation, they hope to use the free shuttle bus or volunteer vehicle.	The senior who have difficulty in accessing public transportation are provided with a vehicle to guarantee the right to move and to use it at their actual cost.	
11	As the awareness rate of road	It supports the safe self-driving	

			signs and guide signs decreases with age, and the risk of accidents or the incidence of accidents increases, countermeasures are needed.		of the senior, or supports the senior so that they do not feel uncomfortable even if they do not drive.	
health and protection	3. health and care	Health management				
		12	Support for a continuous health management is needed not only in old age, but also in middle-aged.		By operating a chronic disease management project for local residents, we provide health and medical services tailored to the local conditions, and improve the self-management ability of residents through publicity and education.	
		13	Health care should be carried out by life cycle, and at the same time, an infrastructure that can receive support close to home is needed.		Establish a local health care support center so that health can be managed close to home.	
		14	In the case of the senior, dental hygiene management is very weak		Since masticatory function in old age can be related to various diseases, publicity for dental hygiene management is strengthened, and implants or dentures are supported for the (low-income) senior without teeth.	
		15	If the senior have limited mobility, they have no choice but to stay at home, and their physical functions deteriorate quickly.		Assistive devices are provided so that senior people with reduced mobility can vigorously participate in social activities.	
		16	As the number of middle-aged single-person households increases, it causes social isolation and often leads to loneliness. Therefore, it is necessary to prevent family disintegration as much as possible through counseling or education.		It prevents and supports the dissolution of families and twilight divorces resulting from the increasing number of single-person households and middle-aged divorces.	
		17	Mental stress and problems caused by drinking in middle-aged adults are the main causes of old-age diseases.		Since excessive drinking in middle-aged adults is directly related to health in old age, we aid mental health support projects to prevent alcoholism.	
		nutrition management				
		18	As the number of single-family households increases, most of them find it difficult to prepare meals by themselves and lack of support for this.		The senior in single households prefer to eat together with several people rather than alone.	
		19	For the senior with reduced mobility, support is needed to ensure that they do not skip meals by delivering packed lunches to their homes.		Meal services such as packed lunches are provided to the senior with reduced mobility.	
20	For the general senior, a discount is required when using a restaurant in order to provide balanced nutrition.		Discover, support and manage restaurants to provide clean food to the senior while considering their health.			
Establishment of care infrastructure and provide integrated care						
21	In the case of dementia, early		Continue to expand the national			

			detection of dementia and support for families of dementia patients should be provided along with prevention.	dementia prevention project and provide education/consultation for family caregivers.		
		22	In the case of a family with four generations or the senior living alone, public services are provided for them due to difficulties in supporting and caring for them so that the senior can stay longer in the home of the local community.	Supports expenses necessary for supporting/caring for 4th-generation families and single-generational seniors.		
		23	We will continue to expand the customized care for the senior so that local care is densely carried out.	We will continue to expand the customized care for the senior so that local care is densely carried out.		
		24	Since there are not enough public facilities for the senior who need long-term care in Gimhae, a project is implemented for this purpose.	Nursing homes provide services with quality and quantity guaranteed.		
	4. safety and protection	Emergency situation management and safety accident prevention				
		25	Recently, safety-related accidents have occurred frequently due to climate change.	Establish measures for the safety and protection of citizens.		
		26	Due to the recent development of the 4th industry, the service that can detect and transport the senior living alone or the disabled in a crisis situation immediately and transport them to the hospital is developing, so it is actively used.	Based on AI and IoT, it continuously discovers and connects subjects to health management and emergency response.		
		27	In rural areas, since there are many multicultural families and a strong patriarchal tendency, active support to prevent domestic violence is needed.	It provides preventive and treatment-related support for families and the senior who are exposed to risks such as domestic violence and abuse.		
		28	In the case of rural areas, there is a possibility that late night traffic accidents or safety accidents may occur, so prevent them.	Creating a safe environment for the community for the senior.		
	Communication and information provision	5. Intergenerational/Intra-generational Communication	promote bonding			
			29	As life expectancy is getting longer in recent years, it can become a social problem as it leads to difficulties in intergenerational communication even among older generations.	By expanding spaces and programs where the senior can socialize together, it supports smooth communication between generations.	
			30	There are many difficulties in communication between children and the senior.	Supports the social network of the senior who are weak in intergenerational/intergenerational communication	
31			As the baby boomers enter old age, they are reluctant to use or be in places with older people.	Provides programs to improve intergenerational communication.		

	6. Provide information	Provide information			
	32	In order not to be marginalized in the community, it is necessary to change the perception of the roles and responsibilities of the senior.	It organizes the participation and interest of the senior in the process of creating an age-friendly city.		
social participation	7. economic independence	Support for economic activity in old age			
		33	The economic activities of the senior include various needs for income creation and social participation for their livelihood.	It smoothly connects public employment for the senior and social activity support projects, and supports income creation.	
		34	For the senior, there is no place other than a public job to help them save their careers or find new jobs.	It provides a window or website that can be used by retired seniors who want to be re-employed, and provides information and programs on re-education.	
		35	Career breaks are taking place due to women's marriage and childbirth, and it is becoming increasingly difficult for older women who have not worked for a long time to find a job.	Prepare a local government-level support project for older women who have had their career cut off.	
		Support for new middle-aged economic activity			
		36	The 50-60 generation hopes for a new start-up, found a job, and re-employment after retirement, and this can benefit society by using their experience.	Expand employment and start-ups for 50-60 new middle-aged people and prepare support measures to develop their competencies.	
		37	When 40-50 generations lose their job, a support policy that can actively support their re-employment is needed.	For the employment and re-employment desired by the early middle-aged generation(40 to 50 yrs), we will strengthen customized employment support services.	
		38	Due to the prolonged old age, the number of people in their 50s and 60s who wish to re-employ after retirement is increasing.	For the late middle aged-generation (50 to60 yrs) generation, we will continue to strengthen customized employment support services so that they can find the desired job and re-employment.	
	8. Social Participation activity	Enhancement of lifelong learning support and activation of social participation			
		39	Support from the local community is needed to adapt to the rapidly changing information age.	Expand and support informatization and technology education for citizens who are information-poor.	
		40	As the older generation grows thicker, they want to enjoy a variety of leisure activities, but the infrastructure is lacking.	It supports the operation of senior colleges and provides opportunities for lifelong learning.	
		41	There are not enough projects for middle-aged people who cannot use welfare facilities for the senior.	We continue to develop and support infrastructure and programs for life redesign after 50+.	
		42	Recently, as 50-69 years old is called a new age, there is a growing need for infrastructure that	We will build infrastructure and additionally develop programs so that the senior, including the new	

			can support the various problems they have or support that is different from the existing older generation.		middle-aged, can spend their leisure such as hobbies and self-development beneficially.

<Major Projects for Gimhae Age-friendly City Creation>

1-1-①

Rural space maintenance project

Business purpose

○ To solve the problem of difficult development caused by factories and livestock in rural areas, and to create a future-oriented rural settlement space through planned development

Business overview

○ Rationale: Articles 38 and 39 of the Special Act on the Improvement of Quality of Life for Farmers and Fishermen and Promotion of Development in Rural Areas

○ Period: 2021~2026

○ Target: Surroundings of Daeri Village and Seokchil Village, Wonji-ri, Juchon-myeon

○ Expense: 45,032 million won(national expenditures 19,350, State 5,805, City 13,545 etc. 6,332)

○ Contents: Livestock maintenance, healing parks, local food processing centers, residential complexes, etc.

○ Actions and plans

- '21. 7.: 'Selected as a pilot site for the '21 Rural Regeneration New Deal Project (5 cities and counties)

- '21. 8.: Establishment of a rural regeneration New Deal project promotion plan and formation of a TF team

- '21. 10.: '21 Rural Regeneration New Deal Project Cost Support Standard Confirmation (Change) Notification

☞ Reduced total project cost (38.7 billion won → 14 billion won) and government subsidy rate (70% → 50%)

- '22. 1.: Feasibility study and basic plan establishment service started

- '22. 6.: '22 Selected as a public contest for rural space maintenance project (KRW 24.7 billion)

- '22. 11.: Establishment of basic plan and promotion of compensation consultation

- Annual performance goals · budget

(unit : million won)

Category		2022	2023	2024	after 2025
business progress rate	volume	Basic plan establishment and compensation negotiations	Implementation plan and compensation negotiations	construction	construction
	expense	3,355	9,169	9,675	15,850

Benefit

- Improvement of settlement conditions and restoration of rural character through reorganization of poorly developed elements

- Promoting urban-rural balanced development through restructuring of rural space

1-1-②

General agricultural/mountain/fishing village development project

business purpose

○ To provide various one-stop services through complex living SOC's such as childcare, medical care, welfare, transportation, and culture in eup/myeon locations, and improve rural settlement environment by establishing 365 living zones

Business overview

○ Rationale: Artides 38 and 39 of the Special Act on the Improvement of Quality of Life for Farmers and Fishermen and Promotion of Development in Rural Areas

○ Business overview

life zone	name	expense (100 million)	period	contents	progress
계		582			
west life zone	Jinrye-myeon rural center	58	17 ~ 22	- Expansion of basic living base (Cultural Power Plant, Theme Street)	done
	Jinyoung-eup rural center	80	18 ~ 23	- Expansion of basic living base (Harmony Town, Paesun-forest)	in business

(unit : , persons, million won)

category		2022	2023	2024	2025
Service Assistance Beneficiaries (tool rental/living support)	volume	220/14	230/16	240/18	250/20
	expense	15	15	15	15

Benefit

- Reduce costs and improve convenience by renting tools that are

difficult to obtain in individual households

- In the original city center where there are many vulnerable groups such as the senior, simple house repairs are supported through talent donors to solve living problems and spread the donation culture

Business purpose

○ To improve poor settlement conditions and to create a distinctive village using local resources to revitalize the village unit community, as a part of the general agricultural/mountainous/fishing village development project.

Business overview

○ Rationale: Articles 38 and 39 of the Special Act on the Improvement of Quality of Life for Farmers and Fishermen and Promotion of Development in Rural Areas

○ Period: 2017 ~ 2026(10 years)

○ Target: Selected as 39 out of 223 rural villages in the district

* Select 4 villages every year (500 million won per village)

and promote the project for 2 years

○ Contents

- H/W business: Basic living infrastructure project using village resources

- S/W business: Local capacity building project through human care and resident education

○ Implementation plans * annual repeat

- '22. 5.: '23 Business application village small business and field forum completed

- '22. 7.: '23 Selection of new towns to promote

- '23. ~ '24.: H/W, S/W business promotion

○ Annual performance goals · budget

(unit : point, million won)

category		2022	2023	2024	2025
Resident Satisfaction (target score)	volume (satisfaction)	82	83	84	85
	expense	3,000	2,000	2,000	2,000

Benefit

○ Promoting rural villages by improving settlement conditions reflecting local characteristics and revitalizing local communities

Creation of safe alley project with the application of CPTED technique

□ Business purpose

- To install crime prevention facilities in crime-curved areas such as old residential areas, and improve social infrastructure to relieve psychological anxiety of residents and prevent crime by improving the environment of narrow alleys

□ Business overview

- Name : CPTED Technique Introduction Safe Alley Construction Project
- Rationale : 「Gimhae-city Crime Prevention City Design Ordinance」 and 「Gimhae-city Crime Prevention Environment Design Basic Plan」
- Period : 2022. 1. ~ 2022. 12.
- Location : 477 area of Komori, Jinrye-myeon, Gimhae-si (Gomo Village, A=25,000m²)
- Contents
 - Installation of crime prevention facilities such as LED security lights, CCTV, and emergency bells
 - Maintenance of the alleyway environment, such as painting old walls and creating bright murals
- items for enforcement (promotion plan)
 - '22. 3. : Project promotion consultation (9 people including villagers, Gimhae West Police Station, and related public officials)
 - ' 22. 4. : Started detailed design service
 - '22. 7. : Consultation on business promotion (6 people including villagers, Gimhae West Police Station, and related public officials)
 - ' 22. 10. : Complete design service
 - '22. 11. : construction start
 - ' 22. 12. : Construction completed

category		2022	2023	2024	2025
village development project	volume	1	1	1	1
	expense	200	120	120	120

Benefit

- Improvement of social infrastructure to relieve psychological anxiety of residents and prevent crime by installing crime prevention facilities in crime-prone areas such as old housing areas and by improving the environment of narrow alleyways

Public toilet environment improvement project

Business purpose

○ To improve the convenience of citizens to use public toilets by carrying out remodeling of old public toilets.

Business overview

○ Period : '23. 1. ~ 6.

○ Target : Yongjeon Forest Public Toilet[41, Seobu-ro 860beon-gil, Jinrye-myeon]

○ Contents

- Replacement of outdated internal facilities such as sanitary ware and cubicles (toilet partitions)

- Repair of interior and exterior walls and ceilings, installation of waterproofing and water saving facilities, etc.

○ Implementation plans

- 2023. 1. : Establishment of detailed implementation plan and commencement of detailed design service

- 2023. 3. : Start of remodeling work

- 2023. 6. : Completion of remodeling work

○ Annual performance goals · budget

(unit : %, million won)

category		2022	2023	2024	2025
public toilet maintenance performance	volume [percentage of work]	100	100	100	100
	expense	40	60	50	50

Benefit

- Establishment of an advanced toilet use culture through clean and safe public toilet management

Business purpose

- To provide rental housing at half the price of the surrounding market by utilizing abandoned vacant houses, etc.
- To reduce the burden of housing expenses for the disadvantaged in housing.

 Business overview

○ Rationale: 「Gyeongsangnam-do Ordinance on Maintenance of Vacant Houses and Small Houses」

○ Period: 2021 ~ continued

○ Expense: 15Million won[State(50%) 7.5, City(50%) 7.5]

○ Target housing: Vacant houses over one year, houses for seniors over 65 years old, multi-family housing over 20 years

○ Move-in target: Homeless people with less than 100% of average monthly income per household of urban workers in the previous year

(1st priority) Recipient, the disabled

(2nd priority) Second class, single-parent families, newlyweds, multicultural families

(3rd place) Returning to farming/returning villagers, cultural artists

(4th place) general public

○ Support contents: After subsidizing housing remodeling costs, rental housing at half the surrounding market price is provided

(Lessor) Support for housing remodeling costs (80% of construction cost, up to 15 million won)

(Lessee) During the mandatory rental period, rent a yearly/monthly rent at half the price of the surrounding market.

○ Performance: 2 buildings, 24 million won support(2021~2022)

- Implementation plans: 1 building, 15 million won support (2023)
- Annual performance goals · budget

category		2022	2023	2024	2025
Number of housing projects supported	volume	1	1	1	1
	expense	12	15	15	15

Benefit

- This is a project that utilizes vacant houses, especially when using housing for the senior over 65, to prevent isolation of the senior by living with the lessee.
- Minimization of blind spots in housing welfare by reducing the burden of housing costs

Business purpose

- Exemption of housing rental fee to vulnerable groups such as the senior living alone or the child headed households

 Business overview

- name: Custom House * Completed in December 2007
- location: 9, 11, Chilsan-ro 347beon-gil (440-8 Hwamok-dong)
- scale: 1st floor, 2 buildings, total floor area of each building 18.9m²
- owner: Gimhae Mayor (Land and Building)
- Move-in target: senior living alone, head of a boy and girl, group disaster migrant, etc.
- Lease Status: Building 1 is for rent, Building 1 is vacant
 - ※ For vacant houses, tenants will be recruited after renovation/renovation work
- repair work
 - period: 2022. 11. ~ 12.
 - expense: 7million won (city cost 100%)
 - repair contents: Replacement of wallpaper, flooring, windows, sink and gas stove, repair of toilets, etc.
- Implementation plans: Recruitment of tenants scheduled after repair work
- Annual performance goals · budget

(Unit: household, million won)

category		2022	2023	2024	2025
Tenant Management	volume	2	2	2	2
	expense	7	-	-	-

Benefit

- By providing free-rental housing to the senior living alone and the child headed households in Gimhae-city, it relieves the housing cost burden and creates a living environment for the disadvantaged.

Business purpose

○ Operation of safe and convenient age-friendly residential welfare housing that reflects the characteristics of the senior so that they can spend their old age in places where they lived rather than in hospitals and facilities in preparation for a super-aged society in 2025

 Business overview

○ Rationale : Article 7 of the Ordinance on Integrated Care Support for the senior in Gimhae-city

○ Period : '22. 5. ~ '32. 4.

○ Target : Residents in Gimhae-city who are 65 years of age or older, living alone or living with only spouse, who meet the income eligibility and are homeless who can lead an independent life

※ Short-term housing: Those who have been discharged from hospital after surgery such as hip fracture or spinal injury and need temporary care before returning home

○ Contents

- Provision of an age-friendly residential environment that reflects the physical characteristics of the senior and one-stop linkage support for health, medical care, and nursing care services

- Support for safe return to home by operating a short-term facility (intermediate house) to support the recovery of discharged patients

○ Actions and plans

- Selected as a leading project in the field of integrated care for the senior by the Ministry of Health and Welfare	: '19. 4. 5.
- 「Residential support project for the senior」 Business agreement signed	: '19. 7. 24.
- Completed business site purchase	: '19. 9.
- Rejection of building permit (unsuitable for parking lot installation standards)	: '19. 12.

- ➡ In accordance with Ministry of Land, Infrastructure and Transport Ordinance No. 1108, when building a house for the purpose of residence of people aged 65 and over, the parking lot installation standard is
 - In case of implementation of public housing business (LH Corporation, local government, etc.), 0.3 car per household are applied.
 - In the case of private construction, 0.7 car are applied per household (1.0 car are applied in Gimhae-city)
- ➡ The business of creation care safe house is “Private construction → Purchase of LH Corporation → Operation of Gimhae-city”
 - Building permits are not allowed for the site of a construction report by a private business operator as the standard of 1.0 car is applied.

- 「Gimhae Parking Lot Installation and Management Ordinance」 revision	: '20. 5. 15.
---	---------------

- ➡ 「Gimhae-city Parking Lot Installation and Management Ordinance Attached Table 6 Remark No. 15 established」
 - As a residential facility support project for the senior, a public housing business operator in accordance with the 「Special Act on Public Housing」 concludes a contract with a private business operator to purchase housing for those aged 65 and over, and approve the use of the building. After that, when a public housing business operator purchases it, and Gimhae-city and a public housing business operator operate the building under an agreement, 0.3 cars per household are applied when calculating the number of parking spaces.

- Building permit completed	: '20. 8. 11.
- Held a ground-breaking ceremony for safe care housing	: '20. 10. 28.
- Full-scale start of care safe housing construction	: '21. 4. ~
- Signed a business agreement for safe care home operation	: '21. 12. 28.
- Held a ceremony for the completion of the Care Safe Home	: '22. 4. 20.
- Initiation of move-in for long-term tenants and operation of shared space	: '22. 9. ~
- Selection of short-term occupants and start of middle house operation	: '23. 1. ~
- Conduct short-term occupant monitoring and review effectiveness (→ Determination of continuous operation)	: '23. 6. ~
- Establishment of Gimhae-city Care Safe Home Operation Manual	: '23. 6. ~

○ Annual performance goals · budget

Benefit

○ Pain relief and improvement of physical health through massage service

Business purpose

○ For the senior with chronic diseases who have low access to medical care, AI・IoT technology is used to provide sustainable health management services such as improving health behavior to improve self-health management capabilities

Business overview

○ Rationale

- The necessity for strengthening older adults' voluntary health management strategy r has increased due to increases in health needs of aging population

- With the spread of the coronavirus and the advent of the online non-face-to-face era, the demand for non-face-to-face senior health care projects is also increasing

○ Period : 2021. 10. ~ continued

○ Target

- Seniors over 65 years of age who are infirm, chronic diseases, and need improvement in health care behavior (Irrespective of income level, except for those with senior long-term care grades 1-5)

○ Contents

- <1st step> Subject Consent and Registration

- <2nd step> Pre-Health screening, grouping

◦ Pre-health screening is carried out so that customized health care services can be provided through group classification

- <3rd step> Device deployment and APP execution

◦ Provide APP-linked missions by providing devices that match the target's health status

- <4th step> Online non-face-to-face health care

◦ Check the abnormal data by monitoring the health information

transmitted through the device once a week

- Online non-face-to-face health consulting and customized health information for each target group
- Inducing self-health management by giving missions through APP
- Sending support messages to induce mission implementation, landline phone calls, and providing points and incentives when missions are accomplished

- <5th step> Post-Health screening

- Conducted with the same items as the pre-evaluation at 6 months of service provision
- Providing customized service by checking the result

○ Actions and plans

business schedule	Promotion schedule (Month)											
	1	2	3	4	5	6	7	8	9	10	11	12

	expense	72	93	93	94

Benefit

- Preventing overeating and promoting health of the senior by providing a balanced diet 6 days a week
- Promotion of emotional stability through safety check and health status check through delivery

Expansion of designated operation of hygienic restaurants that practice filial piety

Business purpose

- To alleviate the increased burden for service use of the senior due to inflation
- It is necessary to inherit a culture of filial piety practice by establishing a culture of sharing among growing children such as teenagers and creating a culture of respect for the senior.
- In modern society, traditional etiquette centered on filial piety is gradually declining and neglected, so the emphasis on filial piety culture
- Due to the closure of sanitary establishments, the number of establishments designated to practice filial piety has decreased, so it is necessary to expand and designate new establishments

Business overview

- Rationale : Gimhae-city Ordinance for Food and Public Health Development
- Period : January ~ December 2023 (continued business)
- Target : 108 sanitary establishments practicing filial piety (sanitary establishments wishing to practice filial piety)
- Contents
 - Award of designation of filial piety sanitary establishment, signboard, and incentive provision (sanitation support, promotion, etc.)
 - Offer 10% or more discount for seniors over 70 years old
- Actions and plans
 - Progress in the past
 - 2019. 02. : Recruitment and selection of filial piety practices (10 haircuts, 30 beauty, 10 baths)
 - 2019. 03. : Providing discount services for the senior by filial piety practices
 - 2019. 04. : Expansion designation of filial piety sanitary establishments (50 → 80)

- 2020. 03. : Expansion designation of filial piety sanitary establishments (80 → 100)
