### Letter of Commitment towards becoming an age-friendly city/community

Dear Sir or Madam,

I would like to express my great interest in becoming part of the 'Global Network for Age-friendly Cities and Communities', or GNAFCC for short. 86,569 people aged 60 and over live in our Berlin borough of Pankow. This corresponds to 20.4 per cent of the total population.

There are many activities for this group in our district. A strategy or elderly care planning is currently in progress and is based on the existing report 'Growing older together in Pankow'.

We would like to expand our network and get in touch with existing members in order to learn from each other.

I would be very pleased to receive positive feedback on our application for the network.

Kind regards

Dr Cordelia Koch
