

WHO FRAMEWORK CONVENTION
ON TOBACCO CONTROL

REPORTING INSTRUMENT OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL

In order to use the interactive features of the reporting instrument, please follow the instructions below. **It is essential to complete the reporting instrument by providing information/data in the required format to ensure consistency and for ease of data processing and analysis.**

If you use a version of Microsoft Word of before 2010:

1. Save the Microsoft Word-based document (WHO FCTC reporting instrument) to a folder on the computer that will be used to complete the questionnaire.
2. Ensure your Microsoft Word security settings allow you to run macros in this document:
 - (i) Under the "Tools" menu, select "Macro".
 - (ii) In the "Macro" menu, select "Security".
 - (iii) In the "Security" pop up menu, please ensure that you have selected "Medium".
3. Close and re-open the WHO FCTC reporting instrument (Microsoft Word-based document which you saved to your computer under step 1).
4. As the document is opening, a box will appear asking if you want to enable macros. The answer is yes. Click "Enable macros".
5. Once you have clicked "Enable macros", the buttons indicating that you can add new rows or new categories to the tables provided will be functional.

If you use a newer version of Microsoft Word:

1. When receiving the security warning "Some active content has been disabled", click "Enable content".
2. When receiving another security warning "Macros have been disabled", click "Enable content".

I confirm that I read the note and followed the instructions therein

		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products <input type="button" value="Add product"/>	Federal Excise Duty - cigarettes	Specific tax	\$0.425	5 cigarettes or fraction thereof contained in any package
		Federal Excise Duty – Other manufactured tobacco including fine-cut (roll-your-own) tobacco	Specific tax	\$5.3125	Per 50 grams or fraction of 50 grams contained in the smallest consumer package
		Provincial/territorial tobacco tax rates on cigarettes and other manufactured tobacco including fine cut (roll-your-own) tobacco vary by province or territory	Specific tax		Provincial/territorial tobacco tax rates range from \$0.1235 to \$0.29 per cigarette and from \$0.1235 to \$0.32 per gram of manufactured tobacco
Federal GST (5%) or HST (13% to 15%) depending on the province or territory		VAT		Sales price	

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

Provincial/territorial tobacco tax rates either increased or stayed the same.</p> <p>Canada is proposing to adjust the excise duty on cigarettes and other tobacco products in 2014 to account for inflation since 2002. Rates are proposed to increase from \$0.425 per 5 cigarettes to \$0.52575 per 5 cigarettes. This will result in an increase of \$4.03 per carton of 200 cigarettes. Rates on duty free tobacco products are also proposed for increase. Tax rates will be increased every five years – indexed to Canada’s Consumer Price Index, starting in 2019.</p>

2.8.7	<p>Please indicate the year and source of the data used to answer questions 2.8.1 to 2.8.6:</p> <p>AS AT DECEMBER 13, 2013: Federal/Provincial/Territorial Statutes and Regulations and other information are available on each government's website.</p> <p>Tobacco products are taxed by both federal and provincial/territorial governments in Canada. At the federal level, the <i>Excise Act, 2001</i> imposes an excise duty on tobacco products manufactured in Canada at the time manufacturers package them and on imported tobacco products at the time of importation. Structuring federal excise duty to apply at this early stage in the production and distribution process helps to protect the tobacco tax base. Following packaging or importation, the excise duty is embedded in the price of the product.</p> <p>Provincial/territorial tobacco taxes are consumption taxes that are imposed on the consumers who purchase tobacco products. The provinces/territories secure their tax base by requiring wholesalers to remit an amount equal to the tax when they supply the tobacco product to other dealers. The dealers then recover this amount from their customers when the tobacco products are sold.</p> <p>For tobacco products, the final consumer selling price includes the federal excise duty, provincial tobacco taxes, GST or HST and, where applicable, provincial and territorial sales taxes.</p> <p><i>Federal Excise Duties</i></p> <p>Federal excise duties are applied on all tobacco products.</p> <p>Provincial/Territorial Tobacco Tax</p> <p>Provincial/territorial tobacco tax rates are set by the respective province or territory. 3. LEGISLATION, REGULATION AND POLICIES

3.1	Article	GENERAL OBLIGATIONS (with reference to Article 5)		
3.1.1	5	General obligations		
3.1.1.1	5.1	Have you developed and implemented comprehensive multisectoral national tobacco control strategies, plans and programmes in accordance with the Convention?	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.2		If you answered “No” to question 3.1.1.1, have you partially developed and implemented tobacco control strategies by including tobacco control in national health, public health or health promotion strategies, plans and programmes?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.3		If you answered “No” to question 3.1.1.2, is any aspect of tobacco control that is referred to in the Convention included in any national strategy, plan or programme?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.4	5.2(a)	Have you established or reinforced and financed <ul style="list-style-type: none"> • a focal point for tobacco control • a tobacco control unit • a national coordinating mechanism for tobacco control 	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.5		If you answered “Yes” to any of the questions under 3.1.1.4, please provide details (e.g. the nature of the national coordinating mechanism, the institution to which the focal point for tobacco control or the tobacco control unit belongs).		

	<p>Canada's Federal Tobacco Control Strategy (FTCS) is led by Health Canada in partnership with Public Safety Canada, the Royal Canadian Mounted Police (RCMP), Canada Revenue Agency, Canada Border Services Agency, the Public Health Agency of Canada, and the Public Prosecution Service of Canada.</p> <p>Health Canada is responsible for administering and enforcing the <i>Tobacco Act</i>. This Act regulates the manufacture, sale, labelling and promotion of tobacco products. Health Canada also undertakes and promotes initiatives that reduce or prevent the negative health impacts associated with smoking. The FTCS is championed by the Controlled Substances and Tobacco Directorate (CSTD) of the Healthy Environments and Consumer and Safety Branch within Health Canada.</p> <p>The FTCS provides funding to support the intelligence work of the Canadian Revenue Agency, Canada Border Services Agency and the Royal Canadian Mounted Police to address contraband and to ensure compliance with Canada's tobacco tax laws. Health Canada's demand reduction activities such as prevention and cessation initiatives complement the contraband control activities of these partners.</p> <p>Canada places a strong emphasis on collaboration between the federal, provincial, territorial and municipal governments, as well as non-governmental organizations, tobacco control researchers, academics, and community organizations.</p>
3.1.1.6	<p>Please provide a brief description of the progress made in implementing Article 5.1 and 5.2 (<i>General obligations</i>) in the past two years or since submission of your last report.</p>

Canada continues to make substantial progress in tobacco control. Smoking prevalence has decreased to an all-time low of 16%, down from 22% in 2001. The most significant reduction in smoking rates is among youth, aged 15-19 from 28% in 1999 to 11% in 2012.

The Federal Tobacco Control Strategy (FTCS) was introduced in 2001 as a 10-year, comprehensive, sustained and integrated Strategy to achieve significant reductions in disease and death due to tobacco use. The Government of Canada has renewed the policy authority of the FTCS for five years (2012-2017).

Since 2001, the role of the provincial and territorial governments in tobacco control has grown. All provinces and territories have major legislation and/or comprehensive tobacco strategies in place, and provincial/territorial investment in tobacco control has more than doubled. Health Canada focuses its anti-smoking efforts in core areas of federal responsibility to preserve the gains that have been realised and to continue downward trends in smoking prevalence.

Key elements of the renewed FTCS include:

- support to provincial and territorial cessation counselling services to support increased call volume and web counselling as a result of the display of the pan-Canadian quitline number and cessation web address on cigarette and little cigar packages;
- support for a targeted number of on-reserve First Nations and Inuit communities to strengthen and implement tobacco control measures;
- launching a marketing, awareness and outreach campaign focussed on cessation for young adult smokers;
- continuing to verify compliance with the *Tobacco Act*, including labelling and minimum packaging requirements.;
- contributing to international efforts to reduce tobacco use;
- coordinating efforts with provinces, territories and other partners and stakeholders;
- identifying and disseminating promising practices and lessons learned from previous funded projects to inform the tobacco control activities of partners;
- supporting a biennial survey that will continue to track tobacco use in Canada, as well as the use of other substances, by merging the Canadian Tobacco Use Monitoring Survey with the Canadian Alcohol and Drug Use Monitoring Survey; and,
- supporting a core litigation, policy, and regulatory capacity.

The Public Health Agency of Canada will also provide funding for tobacco-related interventions that aim to reduce tobacco use as a chronic disease risk factor.

It is illegal for corporations of any kind to contribute to political campaigns for electoral purposes. Some provinces also regulate lobbying. Furthermore, the <i>Lobbyist Registration Act</i> introduced a requirement that consultant lobbyists (ie: tobacco related activities) file a return with the Commissioner of Lobbying if they communicate with a designated public office holder under certain conditions. This registry can be searched by anyone through a publicly-accessible website.</p> <p>Health Canada has discussed the Article 5.3 Guidelines with its federal partner departments and with relevant departments of provincial/territorial governments who are collaborators in the Federal Tobacco Control Strategy (FTCS). 3.2.4.3	<p>Please provide a brief description of the progress made in implementing Article 10 (<i>Regulation of tobacco product disclosures</i>) in the past two years or since submission of your last report.</p>			
		<p>The <i>Tobacco Reporting Regulations</i> enacted in 2000 require that tobacco manufacturers report to the Government the content and emissions of consumer tobacco products sold in Canada.</p> <p>Under the previous labelling requirements, the toxic emissions statements displayed numerical values for six toxic emissions (tar; nicotine; carbon monoxide; formaldehyde; hydrogen cyanide; and, benzene). Research conducted by Health Canada has shown that the numerical values were not clearly understood by some smokers and most had little idea what the range of numbers displayed for each chemical meant. The numerical values have been replaced by four text-based statements that provide clear, concise and easy to understand information about the toxic substances found in tobacco smoke.</p>

3.2.5.15	Please provide a brief description of the progress made in implementing Article 11 (<i>Packaging and labelling of tobacco products</i>) in the past two years or since submission of your last report.			
	<p>The <i>Tobacco Products Labelling Regulations (Cigarettes and Little Cigars)</i> (TPLR-CLC) came into force in September 2011 and define new health-related labelling requirements for packages of cigarettes and little cigars intended for retail sale in Canada. The TPLR-CLC requires a health warning on at least 75% of the front and back panels, a qualitative toxic emissions statement on a side panel, and a health information message to be included either on the upper slide-flap, the exterior surface of the slide, or on a leaflet inserted in the package.</p> <p>There are 16 different health warnings which are randomly available at point of sale locations. These will effectively rotate health warnings for cigarettes and little cigars.</p> <p>Under the previous labelling requirements in the <i>Tobacco Product Information Regulations</i>, the toxic emissions statements displayed numerical values for six toxic emissions (tar, nicotine, carbon monoxide, formaldehyde, hydrogen cyanide and benzene). However, research conducted by Health Canada has shown that the numerical values were not clearly understood by some smokers and most had little idea what the range of numbers displayed for each chemical meant. Therefore, the numerical values have been replaced by four text-based statements that provide clear, concise and easy to understand information about the toxic substances found in tobacco smoke.</p>

3.3.1.14	Please provide a brief description of the progress made in implementing Article 15 (<i>Illicit trade in tobacco products</i>) in the past two years or since submission of your last report.
	<p>Canada implemented an enhanced federal tobacco stamping regime in September 2010. Effective April 1, 2011, all new tobacco products entering the legal, duty-paid market in Canada must display the new excise stamp. A limited transition period was given to address tobacco products that were already in the market place at that date. Effective July 1st, 2012, cigarettes, tobacco sticks and fine cut tobacco products for sale anywhere in the Canadian market must carry the federal excise stamp to be legal.</p> <p>The new excise stamp contains multi-layer security features and replaces the former paper and tear tape stamp. The new excise stamps are produced under federal government contract and their distribution is controlled and limited to persons who have demonstrated that they are eligible to purchase the stamps. An issued stamp may be traced to the person to whom it was issued. The excise stamp provides a reliable indicator of the legal and duty-paid status of tobacco products and, as a result, provides an additional enforcement tool for federal and provincial authorities.</p> <p>The Federal Tobacco Control Strategy was renewed for 5 years, with continued funding and activities related to monitoring the contraband market to inform tax policy. In March 2013, the Government of Canada announced: the establishment of an RCMP Anti-Contraband Tobacco Force of 50 officers; the <i>Trafficking in Contraband Tobacco Act</i> to establish mandatory minimum penalties for repeat offenders; and, funding of \$3 million over two years for ten additional police officers in First Nations police services to focus on contraband tobacco.</p>

5. PRIORITIES AND COMMENTS

5.1	What are the priorities for implementation of the WHO Framework Convention on Tobacco Control in your jurisdiction?
	Canada has fully implemented the provisions of the FCTC, subject to sovereign right, and will continue to support the domestic and international principles and goals of the FCTC.
	Canada continues to implement that FCTC through the Federal Tobacco Control Strategy (FTCS).
	The FTCS has helped reduce smoking rates to an all-time low. The continued comprehensive and collaborative approach of the Strategy will help to preserve the gains of the past decade and continue the downward trend in smoking to reduce tobacco related death and disease among Canadians.
	<p>To support this, the Government of Canada is investing over \$230 million over the 2012-17 time period. To protect Canadians, especially young people, from the health consequences of tobacco use, the Strategy continues to focus on:</p> <ul style="list-style-type: none"> • preventing children and youth from starting to smoke; • helping people to quit smoking; helping Canadians protect themselves from second-hand smoke; and • regulating the manufacture, sale, labeling and promotion of tobacco products by administering the <i>Tobacco Act</i>.

	<p>Under the renewed Strategy, the Government of Canada will continue to implement and enforce a strict regulatory environment that limits the tobacco industry's ability to use marketing to attract new smokers.</p> <p>The Government of Canada will continue to inform Canadians about the health hazards of smoking.</p> <p>The 2012-17 Strategy will place a specific emphasis on two groups with higher rates of smoking than most Canadians and on tobacco as a risk factor for serious disease. Specifically:</p> <ul style="list-style-type: none"> • Health Canada is committed to working with First Nations and Inuit partners to take steps to reduce and prevent smoking. Under the renewed Strategy, funding will assist First Nations and Inuit communities to implement and strengthen tobacco control measures. • Health Canada is launching a marketing awareness and outreach campaign in partnership with the Canadian Cancer Society, using popular channels like Facebook and Twitter, to get young people talking together about smoking, about quitting, and remaining smoke-free. <p>Canada remains a strong and committed global partner to reduce tobacco use. Canada will continue to follow and promote best practices set out in the World Health Organization's Framework Convention on Tobacco Control. Canada will also cooperate on cross-border efforts to stop trafficking of illegal tobacco products. Canada will continue to participate in multilateral negotiations to develop international guidelines and respond to requests to share our expertise in tobacco control.</p> <p>Funding is provided: to support Public Safety Canada's efforts to monitor contraband tobacco activity; to the Royal Canadian Mounted Police to monitor contraband tobacco trafficking activities and the trans-border/trans-national movement of illicit tobacco products; and, to the Canada Border Services Agency to liaise with tobacco authorities at all levels and to monitor both national and global contraband tobacco.</p>
5.2	<p>Have you identified any specific gaps between the resources available and the needs assessed for implementing the WHO Framework Convention on Tobacco Control? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p>
5.3	<p>If you answered “Yes” to question 5.2, please provide details in the space below.</p>
5.4	<p>What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?</p> <p><i>(Please refer to Article 21.1(b).)</i></p>

5.5	Please provide any other relevant information not covered elsewhere that you consider important.
5.6	Your suggestions for further development and revision of the reporting instrument:
	<p>Canada encourages the continued efforts of the WHO to develop synergies in the WHO reporting tools used to collect data on national and subnational activities on tobacco control.</p> <p>Canada would also encourage the development of a scaled reporting process that could serve the needs of Parties with tobacco control programs in transition by reporting on early implementation activities, while more robust/detailed reporting processes could be developed for Parties with fully implemented programs.</p>
