B3. Tobacco-related mortality

B31. Do you have information on tobacco-related mortality in your population?

Yes

B32. What is the estimated total number of deaths attributable to tobacco use in your population?

310000.0000000000

B33. If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction.
According to our estimates, in 2012 in Russia smoking caused about 265,000 deaths among men and 45,000 deaths among women, or 310,000 in total. In earlier research (Maslennikova and Oganov 2011), similar losses in 2009 were estimated as about 280,000 in total. Diseases caused by smoking are responsible for 24 percent of all male mortality and 5 percent of all female mortality. In middle age (from 30 to 59 years), the input of smoking in overall mortality is quite impressive: 31 percent for men and 16 percent for women. In Russia cardiovascular diseases were the cause of more than 58 percent of all tobacco-related mortality. In the earlier research on Russian data (Maslennikova and Oganov 2011), this indicator was estimated in 2009 as 63 percent.

C227. Please provide a brief summary of complete and partial measures, with specific details of the partial measures that have been implemented:

C227a. Banning tobacco smoking in indoor workplaces

Пунктом 9 части 1 Федерального закона № 15-ФЗ введен запрет на курение на рабочих местах и в рабочих зонах. Согласно статье 209 Трудового кодекса Российской Федерации «рабочее место – место, где работник должен находиться или куда ему необходимо прибыть в связи с его работой и которое прямо или косвенно находится под контролем работодателя».

Согласно ГОСТ 12.1.005-88 «Межгосударственный стандарт. Система стандартов безопасности труда. Общие санитарно-гигиенические требования к воздуху рабочей зоны» (утв. и введен в действие постановлением Госстандарта СССР от 29.09.1988 п 3388) (ред. от 20.06.2000): «рабочая зона – пространство, ограниченное по высоте 2 м над уровнем пола или площадки, на которых находятся места постоянного или непостоянного (временного) пребывания работающих».

Опираясь на данные определения, необходимо сказать, что рабочие места и рабочие зоны являются местами, используемыми людьми во время и в процессе их трудовой деятельности (в том числе коридоры, лифты, лестницы, туалеты и другие подобные помещения), что в полной мере соответствует рекомендациям, изложенным в Руководящих принципах осуществления статьи 8 РКБТ (Руководящие принципы ВОЗ по защите от воздействия табачного дыма). Таким образом, организация изолированных помещений для курения табака в указанных местах является нарушением Федерального закона № 15-ФЗ.

C227b. Banning tobacco smoking in public transport

Согласно статье 12 Федерального закона от 23.02.2013 курение запрещено в следующих местах:
поезда дальнего следования;

воздушные суда;

все виды общественного транспорта городского и пригородного сообщения, включая суда для перевозки пассажиров по городским и пригородным маршрутам; станции метрополитена, железнодорожные вокзалы, автовокзалы, аэропорты, морские и речные порты;

территория ближе чем в 15 метрах от входа на вокзалы, станции и аэропорты.

При этом по решению собственника возможно курение в специально выделенных местах на открытом воздухе или в изолированных помещениях, которые оборудованы системами вентиляции и организованы на судах, находящихся в дальнем плавании, при оказании услуг по перевозкам пассажиров.

Требования и нормативы для организации мест (изолированных помещений) для курения табака оснащения их эффективными вентиляционными системами введены Приказом Минстроя России N 756/пр, Минздрава России N 786н от 28.11.2014

C227c. Banning tobacco smoking in indoor public places

С 1 июня 2013 года вступил в силу запрет курения:

- на территориях и в помещениях учреждений образования, культуры, физической культуры и спорта, органов по делам молодежи; на территориях и в помещениях, предназначенных для оказания медицинских, реабилитационных и санаторно-курортных услуг;
- в помещениях социальных служб, помещениях, занимаемых органами государственной власти, органами местного самоуправления;
- в лифтах и помещениях общего пользования многоквартирных домов;
- на детских площадках и в границах территорий, занятых пляжами;
- на автозаправочных станциях.

С 1 июня 2014 года вступил в силу запрет курения:

- в помещениях, предназначенных для предоставления жилищных услуг, гостиничных услуг, услуг по временному размещению и (или) обеспечению временного проживания;
- в помещениях, предназначенных для предоставления бытовых услуг, услуг торговли, общественного питания, помещениях рынков, в нестационарных торговых объектах.

При этом по решению собственника возможно курение в специально выделенных местах на открытом воздухе или в изолированных помещениях, которые оборудованы системами вентиляции и организованы на судах, находящихся в дальнем плавании, при оказании услуг по перевозкам пассажиров. Также при согласии всех жильцов курение возможно в специально выделенных местах на открытом воздухе или в изолированных помещениях общего пользования многоквартирных домов, которые оборудованы системами вентиляции.

В других местах оборудование помещений для курения табака законом не предусмотрено.

В соответствии с пунктом 27 Технического регламента Таможенного союза «Технический регламент на табачную продукцию» (ТР ТС 035/2014, далее – Технический регламент) Минздрав России совместно с министерствами здравоохранения государств-членов в 2015 г. разработал и представил в Евразийскую экономическую комиссию эскизы предупреждений о вреде потребления табачных изделий и параметры их нанесения на потребительскую упаковку табачной продукции (далее соответственно – эскизы предупреждений). Эскизы адаптированы для каждого государства-члена ЕАЭС (общее количество эскизов – 72).
Эскизы предупреждений направлены на информирование населения государств-членов ЕАЭС о разрушительных последствиях потребления табачных изделий и табачного дыма для здоровья человека и предназначены для нанесения на табачную продукцию, которая выпускается на территории Евразийского экономического союза.
Предупреждения будут располагаться в верхней части упаковки табачных изделий и занимать не менее 50 % площади каждой основной стороны упаковки.
Справочно: На сегодняшний день в Российской Федерации предупреждения в виде фотографических изображений размещаются только на задней стороне упаковки, занимая 50 % ее площади, а на передней стороне упаковки размещается текстовое предупреждение, занимающее 30 % площади упаковки.
Эскизы и параметры их нанесения вынесены на повестку дня заседания Совета ЕЭК 17 марта 2016 г. для их утверждения. Учитывая сроки, в течение которых эскизы предупреждений должны быть нанесены производителем на табачную продукцию, а также принимая во внимание решение Коллегии ЕЭК от 12 мая 2015 г. № 53, которым утверждены переходные положения Технического регламента, продукция с нанесенными эскизами предупреждений должна появиться на рынке осенью 2017 г.
2. В соответствии с пунктом 16 Технического регламента Минздравом России совместно с министерствами здравоохранения государств-членов ЕАЭС в 2015 г. разработан и направлен для утверждения в Евразийскую экономическую комиссию проект формы отчета о составе реализованных на территории государства-члена Евразийского экономического союза в течение отчетного календарного года табачных изделий и выделяемых ими веществах. Разработанный проект отчета позволит получить от изготовителей и импортеров табачной продукции информацию о составе табачных изделий и выделяемых ими продуктов, а также об их токсичности и аддиктивности, что позволит использовать эту информацию при разработке и реализации соответствующих мер, направленных на противодействие потреблению табака.
3. В соответствии с пунктом 3 Решения Совета ЕЭК от 12 ноября 2014 г. Минздравом России совместно с министерствами здравоохранения государств-членов ЕАЭС в 2015 г. подготовлен проект международного договора о запрете производства, ввоза и обращения некурительных табачных изделий на территориях государств – членов Евразийского экономического союза.
Указанный проект международного договора был направлен в Евразийскую экономическую комиссию и был направлен на рассмотрение в государства-члены ЕАЭС.

Министерством здравоохранения Российской Федерации в рамках проведения Года борьбы с сердечно-сосудистыми заболеваниями (далее – ССЗ) были разработаны социально-информационные материалы, стимулирующие граждан к профилактике ССЗ, занявшие призовое место во Всероссийском конкурсе социальной рекламы среди органов государственной власти «Импульс».

Для привлечения внимания населения к проблемам, связанным с ССЗ, в регионах Российской Федерации проведены следующие мероприятия: организована трансляция более 4,7 тыс. тематических видеороликов, вышло более 1 тыс. телевизионных и более 1,5 тыс. радиопередач с ведущими специалистами в области ССЗ, было подготовлено около 4 тыс. публикаций в региональных средствах массовой информации, проведено более 4,2 тыс. массовых акций и более 60 тыс. информационно-образовательных мероприятий, распространено более 1,2 млн памяток и буклетов о факторах риска развития ССЗ.

Совместно с аэропортами Внуково, Шереметьево и Домодедово были размещены информационные плакаты на территории аэровокзалов, в бортовых журналах авиакомпании «Ютейр». В Московском метрополитене была проведена кампания по информированию посредством голосовых сообщений, а операторами сотовой связи «МТС» и «Билайн» посредством SMS-сообщений.

В ноябре 2015 г. Министерство здравоохранения Российской Федерации презентовало социальный коммуникационный проект «Фабрика здоровья». Проект направлен на работу с факторами риска, и адресован активным людям трудоспособного возраста, которые рискуют столкнуться с первыми последствиями нездорового образа жизни. Суммарный охват аудитории интернет-проекта «Фабрика здоровья» более 10 млн человек.

Функционирует мультимедийный Интернет-портал о здоровом образе жизни www.takzdorovo.ru, среднемесячная посещаемость сайта в 2014 году составила в среднем 250 000 пользователей. На нем размещено большое количество материалов по теме сокращения по борьбе против табака, в том числе статьи, новости, авторские колонки и опросы. Работает единая телефонная справочная служба программы «Здоровая Россия» 8 800-200-0-200, где предоставляются бесплатные консультации по отказу от табака, о работе центров здоровья и др. Среднемесячное количество обращений на горячую линию составило около 7 000 вызовов.

D8. Please provide information about any assistance provided or received in the space below.

Шестая сессия Конференции Сторон (КС6) проходила в Москве, Российская Федерация, с 13 по 18 октября 2014 г. В соответствии с пунктом 27 Технического регламента Таможенного союза «Технический регламент на табачную продукцию» (ТР ТС 035/2014, далее – Технический регламент) Минздрав России совместно с министерствами здравоохранения государств-членов в 2015 г. разработал и представил в Евразийскую экономическую комиссию эскизы предупреждений о вреде потребления табачных изделий и параметры их нанесения на потребительскую упаковку табачной продукции (далее соответственно – эскизы предупреждений). Эскизы адаптированы для каждого государства-члена ЕАЭС (общее количество эскизов – 72). Эскизы предупреждений направлены на информирование населения государств-членов ЕАЭС о разрушительных последствиях потребления табачных изделий и табачного дыма для здоровья человека и предназначены для нанесения на табачную продукцию, которая выпускается на территории Евразийского экономического союза. Предупреждения будут располагаться в верхней части упаковки табачных изделий и занимать не менее 50 % площади каждой основной стороны упаковки. Эскизы и параметры их нанесения вынесены на повестку дня заседания Совета ЕЭК 17 марта 2016 г. для их утверждения. В соответствии с пунктом 16 Технического регламента Минздравом России совместно с министерствами здравоохранения государств-членов ЕАЭС в 2015 г. разработан и направлен для утверждения в Евразийскую экономическую комиссию проект формы отчета о составе реализованных на территории государства-члена Евразийского экономического союза в течение отчетного календарного года табачных изделий и выделяемых ими веществах. Разработанный проект отчета позволит получить от изготовителей и импортеров табачной продукции информацию о составе табачных изделий и выделяемых ими продуктов, а также об их токсичности и аддиктивности, что позволит использовать эту информацию при разработке и реализации соответствующих мер, направленных на противодействие потреблению табака. В соответствии с пунктом 3 Решения Совета ЕЭК от 12 ноября 2014 г. Минздравом России совместно с министерствами здравоохранения государств-членов ЕАЭС в 2015 г. подготовлен проект международного договора о запрете производства, ввоза и обращения некурительных табачных изделий на территориях государств – членов Евразийского экономического союза. Указанный проект международного договора был направлен в Евразийскую экономическую комиссию и был рассмотрен в государства-члены ЕАЭС.
