

WHO FRAMEWORK CONVENTION
ON TOBACCO CONTROL

REPORTING INSTRUMENT OF THE WHO FRAMEWORK CONVENTION ON TOBACCO CONTROL

In order to use the interactive features of the reporting instrument, please follow the instructions below. **It is essential to complete the reporting instrument by providing information/data in the required format to ensure consistency and for ease of data processing and analysis.**

If you use a version of Microsoft Word of before 2010:

1. Save the Microsoft Word-based document (WHO FCTC reporting instrument) to a folder on the computer that will be used to complete the questionnaire.
2. Ensure your Microsoft Word security settings allow you to run macros in this document:
 - (i) Under the "Tools" menu, select "Macro".
 - (ii) In the "Macro" menu, select "Security".
 - (iii) In the "Security" pop up menu, please ensure that you have selected "Medium".
3. Close and re-open the WHO FCTC reporting instrument (Microsoft Word-based document which you saved to your computer under step 1).
4. As the document is opening, a box will appear asking if you want to enable macros. The answer is yes. Click "Enable macros".
5. Once you have clicked "Enable macros", the buttons indicating that you can add new rows or new categories to the tables provided will be functional.

If you use a newer version of Microsoft Word:

1. When receiving the security warning "Some active content has been disabled", click "Enable content".
2. When receiving another security warning "Macros have been disabled", click "Enable content".

I confirm that I read the note and followed the instructions therein

	<p>Data for 13 - 15 years old originate from the GYTS in Serbia (2103), while data for those 16 years old are from ESPAD (2011).</p> <p>All tobacco products are defined according to the methodology used in GYTS in the following way:</p> <ul style="list-style-type: none"> - Smoking tobacco includes cigarettes being the most frequent, and fine-cut smoking articles (roll-your-own). 			

⁴ Please provide data on either all current users or daily users only, whichever is available.

	<p>- Smoking other tobacco products includes pipes, cigars, mini cigars/cigarillos, waterpipes/hookah/shisha/narguileh/hubble-bubble.</p>

2.1.6.2	<p>Please indicate the year and source of the data used to answer question 2.1.6:</p> <p>Global Youth Tobacco Survey in Serbia, 2013</p> <p>ESPAD, 2011</p>
2.1.6.3	<p>Please provide the definition of “current smoking/tobacco use” used to answer question 2.1.6 in the space below.</p> <p>According to the GYTS methodology current tobacco user in all three categories means using tobacco product anytime during the past 30 days.</p> <p>In ESPAD, for students that have smoked in the last 30 days data are available for both sexes and total. According to the same ESPAD study data are available for total number of students that have smoked at least one cigarette per day in the last 30 days.</p>
2.1.6.4	<p>Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.</p> <p>Compared to the previous GYTS in 2008 a slight increase in smoking tobacco (mostly cigarettes) has been found: among total population 3.7%, among boys 3.4% and among girls 4.4%. Prevalence of smoking tobacco among girls exceeds the prevalence among boys: 13.3% vs. 12.7%. Interestingly, the prevalence of tobacco use is similar with the prevalence reported in the first GYTS in Serbia in 2003 (total 12.8%, boys 12.2% and girls 13.1%).</p> <p>Data from ESPAD (2011) showed a slight decrease in smoking at least one cigarette in the previous month compared to 2008: from 21% in 2008 to 20% in 2011. Similar finding has been reported for daily smoking in 2011 compared to 2008: from 14% in 2008 to 13% in 2011.</p>

2.2	EXPOSURE TO TOBACCO SMOKE
2.2.1	<p>Do you have any data on exposure to tobacco smoke in your population?</p> <p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p>
2.2.2	<p>If you answered “Yes” to question 2.2.1, please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport).</p> <p>Data for exposure to tobacco smoke among adult population are not available, as the preliminary results of the National Health Survey in Serbia have not been released yet.</p> <p>GYTS in 2013 revealed that there is a reduction in exposure to SHS among youth: exposed to SHS at home are 63.4% of youth, 61.5% boys and 65.4% girls. This is significant reduction since 2008 when 76.9% of youth, 73.4% boys and 80.0% girls and particularly since 2003 when 96.4% of youth, 95.0% boys and 98.0% girls were exposed to SHS. However, even this reduced exposure to SHS is very high.</p> <p>The same study revealed that 60.9% of youth are exposed to SHS in enclosed public places, 53.4% boys and 68.1% girls. Although lower than in 2008 (total 71.9%, boys 68.1% and girls 74.8%) it is high and is a consequence of the fact that according to the Law on Protection of the Citizen from Exposure to Tobacco</p>

	Smoke (2010) there is no a total ban on smoking in the hospitality sector.
2.2.3	Please indicate the year and source of the data used to answer question 2.2.1: For GYTS 2013; data not published yet) ESPAD 2011. (http://www.espad.org/en/Reports--Documents/ESPAD-Reports/)

2.3	TOBACCO-RELATED MORTALITY
2.3.1	Do you have information on tobacco-related mortality in your population? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No

2.8	TAXATION OF TOBACCO PRODUCTS <i>(with reference to Articles 6.2(a) and 6.3)</i>
2.8.1	<p>What proportion of the retail price of the most popular price category of tobacco product consists of taxes (e.g. sum of excise, sales and import duties (if applicable) and value added tax/goods and services tax (VAT/GST))?</p> <p>According to the paragraph 10 of the Law on Excise (Official Gazette RS, No. 22/01, 73/01, 80/02, 43/03, 72/03, 55/04, 135/04, 46/05, 101/05, 61/07, 5/09, 31/09, 101/10, 43/11, 101/11, 93/12, 119/12 and 47/13, hereafter referred as Law) excise tax has paid on all tobacco products (cigarettes, cigars, cigarillos, tobacco for smoking and other tobacco products) as is referred in the paragraphs 40a, 40b, 40g and 40d of the Law, except for tobacco using for quality control testing. This applies to all tobacco products manufactured in the country, as well as imported.</p> <p>If the calculated excise on cigarettes, tobacco for smoking and other tobacco products is lower than the minimal excise according to the Law, the minimal excise will be paid.</p> <p>The minimal excise is as follows:</p> <ol style="list-style-type: none"> 1. cigarettes - 100% of the total excise (paragraphs 40a and 40b of the Law) set for the category of weighted average retail selling price of cigarettes; 2. Tobacco for smoking and other tobacco products (cut tobacco, tobacco for pipe, chewing tobacco and snuff) - 100% (paragraph 40d) set for the category of weighted average retail selling price of smoking tobacco and other tobacco but not less then: <ul style="list-style-type: none"> - 55% of the minimum excise duty on 1000 pieces of cigarettes set for the category of weighted average retail selling price of cigarettes from January 1 to December 31, 2013; - 60% of the minimum excise duty on 1000 pieces of cigarettes set for the category of weighted average retail selling price of cigarettes from January 1 to December 31, 2014; - 65% of the minimum excise duty on 1000 pieces of cigarettes set for the category of weighted average retail selling price of cigarettes from January 1 to December 31, 2015; - 70% of the minimum excise duty on 1000 pieces of cigarettes set for the category of weighted average retail selling price of cigarettes from January 1 to December 31, 2015. <p>The weighted average retail selling price of cigarettes is calculated by dividing the total value of all cigarettes that are released for sale as retail prices with the total quantity of all</p>

	<p>released cigarettes for sale in the Republic of Serbia, in the previous half year.</p> <p>The weighted average retail selling price of tobacco for smoking and other tobacco products is calculated by dividing the total value of all tobacco for smoking and other tobacco products (cut, pipe, and chewing tobacco and snuff) that are released for sale as retail prices with the total quantity of all released for sale of smoking tobacco and other tobacco products in the RS in the previous half year.</p> <p>In 2013, two Decisions were adopted on the price of the most popular prices and minimum excise duties on tobacco products. The first one (for the first half of 2013) was adopted in January 2013, and according to it the weighted average retail selling price was 148.30 RSD/per pack, and minimal excise was 91.94 RSD/per pack e.g. 43.00 RSD/pack was specific excise + 48.94 RSD/pack for ad valorem excise which was 33% addition on the weighted average retail selling price of cigarettes. The total tax burden - excise and VAT in the weighted average retail selling price of 148.30 RSD/pack was 78.67%; the share of excise (specific and ad valorem) was 62.00% and the share of VAT was 16.67%. The VAT on tobacco products produced in the country and imported was 20%.</p> <p>The second Decision (for the second half of 2013) was adopted in July 2013, and according to it the weighted average retail selling price was 169.27 RSD/pack and minimal excise was 100.86 RSD/pack, e.g. 45.00 RSD/pack was specific excise + 55.86 RSD/pack ad valorem excise which was 33% addition on the weighted average retail selling price of cigarettes. The total tax burden - excise and VAT in the weighted average retail selling price of 169.27 RSD/pack was 76.25%; the share of excise (specific and ad valorem) was 59.58% and the share of VAT was 16.67%. The VAT on tobacco products produced in the country and imported was 20%.</p> <p>In January 2014 new Decision on the price of the most popular prices and minimal excise on tobacco products has been adopted, and according to it the weighted average retail selling price is 186.16 RSD/pack, and minimal excise is 109.46 RSD/pack, e.g. 48.03 RSD/pack is specific excise + 61.43 RSD/pack ad valorem excise which is 33% addition on the weighted average retail selling price of cigarettes. The total tax burden - excise and VAT in the weighted average retail selling price of 186.16 RSD/pack is 75.47%; the share of excise (specific and ad valorem) is 58.80% and the share of VAT was 16.67%. The VAT on tobacco products produced in the country and imported has been 20%.</p>
2.8.2	<p>How are the excise taxes levied (what types of taxes are levied)?</p> <ul style="list-style-type: none"> • Specific tax only <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No • Ad valorem tax only <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No • Combination of specific and ad valorem taxes <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <ul style="list-style-type: none"> • More complex structure (<i>please explain:</i> According to the Law, the specific excise is different depending on the time of the implementation period; therefore from January 1 to June 30, 2013 excise for domestic and imported cigarettes was 43.00 RSD/pack, and from July 1 to December 31, 2013 - 45.00 RSD/pack (tariff codes CT 2402 20 10 00 and 2402 20 90 00). According to the Law, excise value on cigarettes is adjusted with the annual index of consumer prices. • The rate of <i>ad valorem</i> excise was 33% on the retail cigarette prices in all above mentioned periods. • Excise on cigarettes is paid per package of 20 cigarettes, and if the

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

3.1.1.2		If you answered “No” to question 3.1.1.1, have you partially developed and implemented tobacco control strategies by including tobacco control in national health, public health or health promotion strategies, plans and programmes?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.3		If you answered “No” to question 3.1.1.2, is any aspect of tobacco control that is referred to in the Convention included in any national strategy, plan or programme?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.4	5.2(a)	Have you established or reinforced and financed <ul style="list-style-type: none"> • a focal point for tobacco control • a tobacco control unit • a national coordinating mechanism for tobacco control 	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
3.1.1.5	If you answered “Yes” to any of the questions under 3.1.1.4, please provide details (e.g. the nature of the national coordinating mechanism, the institution to which the focal point for tobacco control or the tobacco control unit belongs).			

	<p>The Ministry of Health of the Republic of Serbia has started more intensive tobacco control activities in 2003, when the National Committee for Tobacco Prevention was established, representing the leading experts in different tobacco control areas. Its task is to prepare the national policy on tobacco control, coordinate and lead national activities in smoking prevention.</p> <p>The National Committee for Tobacco Prevention prepared the Tobacco Control Strategy of the Republic of Serbia 2007 - 2015 that was adopted in January 2007 by the Government of the Republic of Serbia, with the aim to implementing measures to decrease the prevalence of smoking, exposure to tobacco smoke and, consequently, reduce the burden of tobacco-related diseases. The Strategy was accompanied by the Action Plan 2007 - 2011. The National Committee for Tobacco Prevention prepared the next Action plan 2012-2015, and then in 2013 Action Plan 2014-2015, which has not been adopted yet by the Government of Serbia.</p> <p>An important step was the establishment of the Tobacco Control Office (nowadays National Office for Smoking Prevention) at the Institute of Public Health of Serbia in 2006 tasked to coordinate the implementation of tobacco control activities.</p> <p>Furthermore, an intergovernmental coordinating body was appointed by the Government of the Republic of Serbia in 2006 as a Council for Tobacco Control, with the actual Minister of Health as a Head of the Council.</p> <p>Serbia ratified the WHO Framework Convention on Tobacco Control in 2006 and since then has been implementing provisions from the FCTC and actively participating in Conference of Parties and working groups.</p> <p>As regarding financing, members of the National Committee for Tobacco Prevention are engaged voluntarily and are not paid. The same applies for the national focal point for tobacco control and multisectorial Council for Tobacco Control. The National Office for Smoking Prevention has three employed persons and is financed through the specifically allocated fund in the Governmental budget.</p>

3.2.1.4	Please provide a brief description of the progress made in implementing Article 6 (<i>Price and tax measures to reduce the demand for tobacco</i>) in the past two years or since submission of your last report.			
<p>In 2012 the Excise Law was changed as to regulate the excise policy until 2016 with the aim of harmonization with the excise policy of European Union. According to the Law, the amount of the specific excise has been increased every six months. The <i>ad valorem</i> component has been reduced irrelevant of the time period. In this way the conditions were established to increase incomes from the excise on cigarettes, since the budget’ income is in a substantial way independent from the producers’ and importers’ price policy, taking into account that the Government does not directly regulate the price of cigarettes, but through the tax policy measures influences on steady increase of the tobacco product prices. At the same time, the market is protected from the bad quality cigarettes, and in this way the demand for cigarettes is reduced.</p> <p>At the same time, the weighted average retail selling price of cigarettes has been introduced (since 2012) instead of “the most popular price category of tobacco products”, and as a consequence, there is an increase of the minimal excise on cigarettes and other tobacco products.</p> <p>Moreover, since 2012, the specific earmarking (so called “budget’s dinar”) on all tobacco products according to the Tobacco Law was abolished and integrated into the specific excise on cigarettes (the last value of the this specific earmarking in 2012 was 1.66 RSD per package of cigarettes).</p> <p>It has also been made mandatory to make inventory of all stock of cigarettes when the value of specific excise and minimal excise changes, and to the quantity of cigarettes above allowed number calculate and pay excise tax.</p> <p>There are also other measures that have influence on tobacco consumption, such as bans</p>				

	and restrictions regulated by the Tobacco law (banning sales of cigarettes to minors; banning the sale of tobacco products which are directly accessible; banning the sale through vending machines; production and sale of sweets, snacks or toys in the form of tobacco products; banning sale of packages less than 20 cigarettes; mandatory health warning on all tobacco products, etc.).
