A study was conducted by the Division of Health Economics at Lund University (Sweden) in 2001. Costs associated with health care and production loss for a number of diseases associated with smoking was calculated. Costs for passive smoking was not included. The study included individuals between the ages 35-84 years. Below, these cost have been adjusted for the money value in 2009:</p> <p>Health-care costs: 2 500 000 000 SEK</p> <p>Produktion loss (early pension, early deaths): 6 800 000 000 SEK</p> <p>Sick leave: 21 000 000 000 SEK</p>
2.4.3	<p>Please indicate the year and source of the data used to answer question 2.4.2, and please submit a copy of the study you refer to:</p> <p>2001 (adjusted for the money value in 2009). 	• Combination of specific and ad valorem taxes	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No		
	• More complex structure (<i>please explain:</i>)				
2.8.3	If available, please provide details on the rates of taxation for tobacco products at all levels of Government and be as specific as possible (specify the type of tax, e.g. VAT, sales, import duties)				
		Product	Type of tax	Rate or amount	Base of tax ⁵
	Smoking tobacco products	cigarettes	VAT	0.25	Production cost and excise taxes
	Add product	cigarettes	specific tax öre/each	31.00	Per cigarette/item
		cigarettes	ad valorem tax, percent of MPPC	0.392	Retail price
		cigarillos and cigars	VAT	0.25	Production cost and excise taxes
		cigarillos and cigars	ad valorem, öre each	112.00	Per item
		tobacco	VAT	0.25	Production cost and excise taxes
		tobacco	ad valorem, kr/kg	1560.00	Per kilo

⁵ The “base of the tax” should clearly indicate the tax rate or amount the tax is based on. If the tax is expressed as a percentage (e.g. ad valorem tax), the base of the tax is the actual value of the good that is taxed; for example, 45% of the manufacturer’s price, 30% of the retail price. In this case the “base” is the manufacturer’s price or retail price. If the tax is expressed as an amount (e.g. specific tax), the base of the tax is the volume (number of pieces or by weight) of goods that is taxed. For example, if a tax is US\$ 5 per 100 cigarettes, the amount of tax is US\$ 5 and the base of the tax is 100 cigarettes.

	Smokless tobacco products	snus	VAT	0.25	Production cost and excise taxes
	Add product	snus	ad valorem, kr/kg	336.00	Per kilo

By this (within the proportion of ad valorem and specific tax) the proportion of ad valorem tax will decline and the specific tax will raise.</p>				
2.8.5	<p>Do you earmark any percentage of your taxation income for funding any national plan or strategy on tobacco control in your jurisdiction?</p> <p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p><i>(In reference to Article 26)</i></p>

(Publication from Ministry of Finance Sweden [in Swedish]). See Annex 6 of this report or http://www.regeringen.se/sb/d/11454/a/133020</p> <p>In Table 2.8.3 the amounts given are in SEK (when it says Kr) and Swedish öre. 1 SEK = 100 Swedish öre. 1 SEK = 0.15 USD (1 October 2010).</p> <p>In Table 2.8.3 "tobacco" means raw tobacco. We used the word "tobacco" instead, because this is how it appears in the tobacco directives.</p>

<p>Question 3.2.8.1: The guidelines regarding tobacco cessation are developed by the Swedish National Board of Health and Welfare. Although the report currently available is preliminary (http://www.socialstyrelsen.se/publikationer2010/2010-10-15), the main report is expected to be published shortly (early autumn 2011). The guidelines that are outlined in the preliminary report are not substantially different from the ones expected to be published in the main report. Tobacco cessation have been shaped in accordance with scientific evidence and best practice, even though not so far expressed in a main report on national guidelines. The Swedish National Institute of Public Health have been active in developing recommendations and publishing reports covering this topic (evidence based).</p> <p>Question 3.2.8.10 and 3.2.8.11: In 2010, the government's pharmacy-monopoly was dissolved. That means that NRT products can now be sold in ordinary grocery stores, making them more easily accessible to the public regarding both location and opening hours. Between 2006 and 2009, the number of primary care centres offering tobacco-cessation services has increased slightly, from 70 to 73 percent. These numbers are, however, quite uncertain.</p>
