SQ001		<b>Please provide the definitions of “current smoker”, “daily smoker”, “occasional smoker”, “former smoker” and “never smoker” used in this report.</b>
	SQ001	<b>Current smoker</b> current smokers are those who responded that they had been smoking whether on a daily or irregular basis for a period exceeding one month at the time the survey was conducted.
	SQ002	<b>Daily smoker</b> current smokers are those responded that they were used to smoking on daily basis at the time the survey was conducted on smoking on a daily basis
	SQ003	<b>Occasional smoker</b> not daily smokers
	SQ004	<b>Former smoker</b> ARE THOSE WHO RESPONDED THAT THEY HAD QUIT SMOKING AND HAD NOT SMOKED FOR A PERIOD EXCEEDING ONE MONTH AT THE TIME THE SURVEY WAS CONDUCTED
	SQ005	<b>Never smoker</b> are those who responded that they had never used tobacco throughout their life
B115		<b>Please provide a brief explanation of the trend in smoking prevalence in the adult population in the past two years or since submission of your last report.</b>  The prevalence of smoking increased compared to the results of the 2008 STEPS, The reason can be attributed to either the expansion of the tobacco market in Kuwait or due to the lack of enforcement of the regulations and the gap in the law number 15/1995 regardin the specification of the fine on violation of the law and the governing body for the implementation. Daily current smokers was 17.5 in2008 and became 18%. Males smoking daily was 32.5% became 35.4% and female current smokers was 3% in 2008 and became 3.3. More shish smoking esp among females The number of those using electronic delivery systems is on the increase, both new users and traditional tobacco users. The numbers of dual addiction is on the icrease but yet to be measured. The STEPS Survey will be repeated this year.

B164		<b>Please provide a brief explanation of the trend in tobacco use by young persons in the past two years or since submission of your last report.</b>  According to the results of the 2016 survey when comparing results with the 2009 survey we find a small decrease in the prevalence of smoking among the 13-15 years old. This can be

		explained by the increase in awareness of the dangers of tobacco smoking, but can also be attributed to sampling and methodology. young people tend to deny their smoking .
