B171		Please indicate the year and source of the data used to answer question B17. Statistics Norway/Norwegian Institute of Public Health
B172		Please provide a brief explanation of the trends – in adults and in young persons – in the use of novel and emerging tobacco and nicotine products in the past two years or since submission of your last report. Use = daily and occasional use combined. We do not have direct information about how many use e-cigarettes with and without nicotine, but have used another question about nicotine content among a subset of respondents to weight the prevalences. We have pooled data for 2020-2022. Also note that e-cigarettes with nicotine and novel tobacco and nicotine products are currently banned for sale in Norway.

B2-B9. HEALTH, SOCIAL AND ECONOMIC INDICATORS

B2		Exposure to tobacco smoke
B21		Do you have any data on exposure to tobacco smoke in your population? Yes
B22		Please provide details in the space below (e.g. exposure by gender, at home, in the workplace, on public transport). How many hours daily respondents spend in a home where someone smokes (last in a survey from 2014). Among men who did not smoke, 1.5% answered that they spent at least 1 hour in a home where someone smokes. Among women the figure was 0.6%. In a survey from 2022, 2.0% / 0.0% among men/women 16-74 years who did not smoke, answered that they spent 1 hour or more a day in a room related to their workplace where other people smoked.
B23A		Please indicate the year of the data used to answer question B21: 2022
B23B		Please indicate the source of the data used to answer question B21: Statistics Norway/Norwegian Institute of Public Health
B3		Tobacco-related mortality
B31		Do you have information on tobacco-related mortality in your population? Yes
B32		What is the estimated total number of deaths attributable to tobacco use in your population? 5128
B33		If available, please provide any additional information on mortality attributable to tobacco use (e.g. lung cancer, cardiovascular diseases) in your jurisdiction. Of the 5128 deaths attributable to tobacco, 431 were attributable to secondhand smoking.
B34A		Please indicate the year of the data used to answer question B32 and 33: 2019
B34B		Please indicate the source of the data used to answer questions B32 and B33: Global burden of disease website: https://vizhub.healthdata.org/gbd-compare/
B4		Tobacco-related costs
B41		Do you have information on the economic burden of tobacco use in your population, e.g. the overall cost of tobacco use imposed on your society? Yes
B42		Please provide details (e.g. direct (health care-related) and indirect costs and, if possible, the method used to estimate these costs). Tobacco related economic costs were calculated based on estimates from neighboring countries in a report from the Norwegian directorate of Health in 2016. If costs related to loss of life-years or quality of life are not included, the costs of smoking amounts to 8-20 billion NOK per year. If these costs are included, the cost would be around 80 billion NOK per year.
