B171		Please indicate the year and source of the data used to answer question B17. Adult population: Public Health Agency of Sweden (2022). The National Survey of Public Health - Health of Equal Terms. Please note that the data submitted is NOT age-standardised (in contrast to some of the previous report). Young persons: The Swedish Council for Information on Alcohol and Other Drugs (CAN; 2022); Alcohol and drug use among students (Skolelevers drogvanor, CAN:s nationella skolundersökning)
B172		Please provide a brief explanation of the trends – in adults and in young persons – in the use of novel and emerging tobacco and nicotine products in the past two years or since submission of your last report. The use of e-cigarettes has increased, especially among young adults (16-29 years) and adolescents 2022 as compared to 2020. The questions regarding use of nicotine snus (tobacco-free) are fairly new, therefore we cannot make comparison in the adult population. However, among adolescents the use of nicotine snus has also increased in 2022 as compared to 2021.

All indoor public places are smoke-free including restaurants and bars. No serving is allowed in the smoking rooms. Smoking rooms must have adequate ventilation to ensure that pollutants from the smoking do not spread to other parts of the premises. Some areas do not have legal support to be qualified as non-smoking areas, but due to successful policies these areas are perceived as non-smoking areas. There is a notion that the law is "complete", when it is more accurate to say that it has contributed to a national standard stating that certain areas should be smoke-free The Public Health Agency of Sweden has been commissioned to investigate and analyze the presence of passive smoking in public areas and particularly where children are present. The commission also involved providing proposals for measures to further reduce passive smoking in these areas. As indoor smoking is currently already regulated by the law, the commission entailed focusing on outdoor public places. A report on the findings and suggestions was published in 2014. http://www.folkhalsomyndigheten.se/documents/om-myndigheten/uppdrag-styrdokument/avslutade/slutrappport-utredning-framtida-rokfria-miljoer.pdf

C2817		<p>If you have any other relevant information pertaining to but not covered in this section, please provide details in the space below.</p> <p>RE Q-C289 : In Sweden, Higher education institutions (HEIs) have considerable autonomy within a system of management by objectives. The overall responsibility for higher education and research rests with the Swedish Parliament (Riksdag) and the Government. These decide on the regulations that apply to the higher education sector and allocate resources to the HEIs. Within the framework of this legislation, HEIs take most decisions themselves. These decisions cover such areas as organisation, educational offerings, educational content and design and what research they conduct. It is therefore not possible to say anything in general whether or not tobacco dependence is incorporated in a specific higher education programme. Although it may occur. Some of Sweden's Dental hygienist educational institutions have classes in tobacco cessation. Dental schools generally include teaching about methods for influencing behavior in the realm of teaching disease prevention.</p>

A previous ANDT-strategy was valid for 2016-2020, for previous/continued priorities see the links below. https://www.regeringen.se/rattsliga-dokument/skrivelse/2022/03/skr.-202122213 http://www.regeringen.se/rattsdokument/skrivelse/2016/02/skr.20151686/</p>

E3		<p>Please provide details in the space below.</p> <p>Conclusions from the assessment of previous strategy for alcohol, narcotic drugs, doping and tobacco (ANDT) policy 2011-2015 may be found in the revised strategy. http://www.regeringen.se/rattsdokument/skrivelse/2016/02/skr.20151686/ And also from the current strategy https://www.regeringen.se/rattsliga-dokument/skrivelse/2022/03/skr.-202122213</p>
E4		<p>What, if any, are the constraints or barriers, other than lack of resources, you have encountered in implementing the Convention?</p> <p>Conclusions from the assessment for alcohol, narcotic drugs, doping and tobacco (ANDT) policy may be found in the ANDT(S)-strategies http://www.regeringen.se/rattsdokument/skrivelse/2016/02/skr.20151686/ and https://www.regeringen.se/rattsliga-dokument/skrivelse/2022/03/skr.-202122213 Sweden has made progress in tobacco prevention and implemented rules in line with the WHO FCTC, but the efforts in tobacco prevention needs to continue. In June 2022 the parliament adopted a new law regulating tobacco free nicotine products, see the new law here: https://www.riksdagen.se/sv/dokument-lagar/dokument/svensk-forfattningssamling/lag-20221257-om-tobaksfria-nikotinprodukter_sfs-2022-1257 At the same time, existing regulation on marketing and sponsorship of tobacco products was updated in chapter 4 in the Act on tobacco and similar products: https://www.riksdagen.se/sv/dokument-lagar/dokument/svensk-forfattningssamling/lag-20221257-om-tobaksfria-nikotinprodukter_sfs-2022-1257 The implemented changes regarding the provisions on marketing aimed at getting the regulation more in line with EU law. An ongoing governmental inquiry is looking into and may suggest new regulation on stricter product requirements for tobacco and nicotine products, ban on peddling tobacco and nicotine products, Tobacco- and nicotine-free school hours, supervision of alcohol, tobacco and nicotine products. See the terms of reference here: https://www.regeringen.se/globalassets/regeringen/dokument/socialdepartementet/fokhalsa-och-sjukvard/en-trygg-uppvaxt-utan-alkohol-tobak-och-nikotinprodukter-dir.-2022111</p>

E7		If you have any relevant information related to questions E5 and E6, please provide details in the space below. HTPs are covered by the ordinary tobacco regulation. Sweden is working on implementing the EU Commission's Directive (EU) 2022/2100, new requirements for heated tobacco products. Tobacco free nicotine products has been specifically regulated in a new legislation (Lag (2022:1257) om tobaksfria nikotinprodukter LTN) that entered into force 1 augusti 2022 and 1 januari 2023. This law aims to limit the health risks and inconveniences associated with the use of tobacco-free nicotine products. Tobacco free nicotine pouches are covered by tax measures since 1 July 2018.
E8		Do you have a costed national tobacco control plan or strategy? No
E81		If you answered "Yes" to question E8, is this costed national tobacco control plan or strategy fully funded? N/A
E82		Please attach the costed plan or strategy here.
E9		Please provide the government's expenditure on tobacco control, for the latest year available, in your country's currency.
E10		Have you adopted and implemented any national legislative, executive, administrative and/or other measures that go beyond the requirements of the Convention in line with Article 2.1 (e.g. endgame strategies, smoke-free generations, tobacco free villages or cities)? Yes
E101		If you answered "Yes" to question E10, please provide details. In the previous ANDT-strategy 2016-2020 the government stated support for the goal of Tobacco Endgame - a smoke-free Sweden in 2025. This is defined as less than 5 percent of the population should smoke daily.
E11		Please attach any documentation relevant to any sections of the reporting instrument.
E12		Please provide any other relevant information not covered elsewhere that you consider important. Re. Q E9: It's too difficult to extract the government's expenditure on tobacco control from the total budget for ANDT. The total expenditure is divided into so many different categories, for different government agencies and additional assignments. The total budget for ANDT for 2023 is 14,3 miljon SEK.
E13		Your suggestions for further development and revision of the reporting instrument:

		<p>In future reporting, it would be of great help if a feature is added in the reporting instrument so that the parties can export questions and answers in the survey during the preparation of their responses. In the PDF-version it would be helpful if the question numbers are visible. Another feature we recommend is adding an extra step after pressing submit, so one needs to confirm that the intent actually is to submit the questionnaire.</p>
