The COVID-19 pandemic is savaging global populations and economies. More than ever, clinicians, scientists and planners need to come together to share and exchange best practices, ideas and experiences that will help to improve treatment and advance the search for and development of a vaccine. Join Professor Dale Fisher and Dr David M. Allen of the NUS Yong Loo Lin School of Medicine as they host a weekly webinar series featuring infectious disease and other experts from around the world.

On 21 May 2020, Dr Bruce Aylward from WHO will speak on “Around the World in 80 Days: What Has the World Learned since the WHO Technical Mission to Wuhan, China?”. A physician and epidemiologist, Dr Aylward led WHO’s response to humanitarian and infectious disease emergencies, including the Zika and Ebola outbreaks. He also led the design and implementation of far-reaching reforms of WHO’s work in emergencies, culminating in the launch of a new WHO Health Emergencies Programme. In February 2020, Dr Aylward led the WHO Technical Mission to Wuhan to study the COVID-19 infection prevention and control measures, and will share the key learning points of that mission and what has been learned since then.

Tune in on 21 May 2020 and every Thursday thereafter at the following times:
7pm - 8pm Singapore/GMT+8 | 7am - 8am EDT | 4am - 5am PDT
11am - 12pm GMT | 1pm - 2pm CEST | 10pm - 11pm AEDT
