

Burkina Faso – Ouagadougou (Ages 13-15)

Global Youth Tobacco Survey (GYTS)

FACT SHEET

The Burkina Faso - Ouagadougou GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Burkina Faso - Ouagadougou could include in a comprehensive tobacco control program.

The Burkina Faso - Ouagadougou GYTS was a school-based survey of students in 4th through 6th grade conducted in 2001.

A two-stage cluster sample design was used to produce representative data for all of Burkina Faso - Ouagadougou. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 91.3%, the class response rate was 67.4%, the student response rate was 67.0%, and the overall response rate was 41.3%. A total of 989 students aged 13-15 years participated in the Burkina Faso - Ouagadougou GYTS.

Prevalence

- 45.3% of students had ever smoked cigarettes (Boys = 59.1%, Girls = 32.0%)
- 21.5% currently use any tobacco product (Boys = 27.5%, Girls = 15.6%)
- 19.0% currently smoke cigarettes (Boys = 26.1%, Girls = 11.6%)
- 6.9% currently use other tobacco products (Boys = 7.9%, Girls = 6.3%)
- 18.6% of never smokers are likely to initiate smoking next year

Knowledge and Attitudes

- 41.3% think boys and 16.6% think girls who smoke have more friends
- 17.7% think boys and 11.6% think girls who smoke look more attractive
