

Burkina Faso - Bobo Dioulasso (Ages 13-15) Global Youth Tobacco Survey (GYTS)

FACT SHEET

The Burkina Faso - Bobo Dioulasso GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Burkina Faso - Bobo Dioulasso could include in a comprehensive tobacco control program.

The Burkina Faso - Bobo Dioulasso GYTS was a school-based survey of students in 6ème, 5ème, and 4ème conducted in 2009.

A two-stage cluster sample design was used to produce representative data for Burkina Faso - Bobo Dioulasso. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100.0%, the class response rate was 100.0%, the student response rate was 89.7%, and the overall response rate was 89.7%. A total of 815 students aged 13-15 participated in the Burkina Faso - Bobo Dioulasso GYTS.

Prevalence

- 12.5% of students had ever smoked cigarettes (Boys = 18.7%, Girls = 5.6%)
- 20.0% currently use any tobacco product (Boys = 21.9%, Girls = 17.6%)
- 3.8% currently smoke cigarettes (Boys = 6.0%, Girls = 1.2%)
- 17.7% currently use other tobacco products (Boys = 18.5%, Girls = 16.5%)
- 9.1% of never smokers are likely to initiate smoking next year

Knowledge and Attitudes

- 21.0% think boys and 14.5% think girls who smoke have more friends
- 15.1% think boys and 13.4% think girls who smoke look more attractive
