Section H. Knowledge, Attitudes & Perceptions	81

Summary

The Global Adult Tobacco Survey (GATS), a component of Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring adult tobacco use and tracking key tobacco control indicators. GATS is a nationally representative household survey of adults 15 years of age or older using a standard core questionnaire, sample design, and data collection and management procedures that were reviewed and approved by international experts. GATS is intended to enhance the capacity of countries to design, implement and evaluate tobacco control interventions.

GATS is designed to produce national and sub-national estimates among adults across countries. The target population includes all non-institutionalized men and women 15 years of age or older who consider the country to be their primary place of residence. All members of the target population are sampled from the household that is their primary place of residence. All GATS countries use country-specific stratified multi-stage cluster sampling designs and an interview consisting of a household screening component and an individual component administered to the selected respondent. Data is collected using electronic handheld devices.

In India, GATS was conducted in 2009 - 2010 using a nationally representative probability sample to provide national and regional (North, West, East, South, Central and North-East) estimates by residence and gender and state estimates by gender. GATS India was carried out in all 29 states of the country and two Union Territories of Chandigarh and Puducherry, covering about 99.9% population of India. The initial sample size was 79,690 households with 69,296 completed individual interviews. GATS India questionnaire includes core questions about background characteristics, tobacco smoking, smokeless tobacco, cessation, secondhand smoke, economics, media, and knowledge, attitudes and perceptions. GATS India questionnaire included country-specific questions about bidis and smokeless tobacco. Questions were adapted in each section, then reviewed and approved by the questionnaire expert review committee. The questionnaire was administered in 19 languages and data were collected electronically using handheld devices.

The data file does not contain personal identifying information to ensure and protect confidentiality. Due to the complex sample design, clustering, stratification and sample weights should be taken into account in the data analysis in order to obtain proper point estimates and variances. The stratification, cluster and sample weight variables are `gatsstrata`, `gatscluster` and `gatsweight`, respectively. To access GATS India fact sheet and country report, please visit: www.cdc.gov/tobacco/global/gats/countries_

Household Questionnaire

HH1

Type = Numeric

In total, how many persons are living in this household?

Summary

Minimum.....	1
Maximum.....	50
Valid case.....	69,296
Blank (Missing/Not applicable).....	0

HH2

Type = Numeric

How many of these household members are 15 years of age or older?

Summary

Minimum.....	1
Maximum.....	28
Valid case.....	69,296
Blank (Missing/Not applicable).....	0

HH3

Type = Numeric

How many {FILL HHTYPE: MALE/FEMALE} household members are 15 years of age or older?

Summary

Minimum.....	1
Maximum.....	15
Valid case.....	69,296
Blank (Missing/Not applicable).....	0

HH4B

Type = Numeric

What is the age of the selected person?

Summary

Minimum.....	15
Maximum.....	125
Valid case.....	69,189
Blank (Missing/Not applicable).....	107

HH4B001 – HH4B015

Type = Numeric

What is this person's age?

HH4C

Type = Numeric

What is the month of birth for the selected person?

<u>Value</u>	<u>Label</u>	<u>Frequency</u>	<u>Unweighted Percent</u>	<u>Weighted Percent</u>
1	January	136	5.1	4.5
2	February	145	5.4	3.7
3	March	204	7.6	6.1
4	April	198	7.4	6.9
5	May	189	7.0	5.7
6	June	158	5.9	5.4
7	July	151	5.6	4.6
8	August	173	6.4	6.7
9	September	160	6.0	5.3
10	October	152	5.7	4.9
