## 2008 Fact Sheet

The **2008 Montserrat GSHS** measured alcohol and other drug use; mental health; physical activity; protective factors; unintentional injuries and violence.

The 2008 Montserrat GSHS was a school-based survey of students in Forms 2, 3, 4, and 5. A census was used to produce data representative of all students in Forms 2, 3, 4, and 5 in Montserrat. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the student response rate was 78%, and the overall response rate was 78%. A total of 212 students participated in the Montserrat GSHS. Students self-reported their responses to each question on a computer scannable answer sheet. For comparison purposes, only students aged 13-15 years are included in the analyses for this fact sheet.

Results for students aged 13-15 years	Total	Boys	Girls
<b>Alcohol and Other Drug Use</b>			
Percentage of students who had at least one drink containing alcohol on one or more days during the past 30 days	<b>33.4</b>	<b>35.6</b>	<b>31.5</b>
Percentage of students who drank so much alcohol that they were really drunk one or more times during their life	<b>28.0</b>	<b>34.0</b>	<b>22.2</b>
Percentage of students who had a hang-over, felt sick, got into trouble with family or friends, missed school, or got into fights one or more times as a result of drinking alcohol during their life	<b>12.9</b>	<b>12.5</b>	<b>13.3</b>
