

## GYTS Objectives

The Global Youth Tobacco Survey (GYTS), a component of the Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring youth tobacco use (smoking and smokeless) and tracking key tobacco control indicators.

GYTS is a cross-sectional, nationally representative school-based survey of students in grades associated with ages 13 to 15 years. GYTS uses a standard core questionnaire, sample design, and data collection protocol. It assists countries in fulfilling their obligations under the World Health Organization (WHO) Framework Convention on Tobacco Control (FCTC) to generate comparable data within and across countries. WHO has developed MPOWER, a technical package of selected demand reduction measures contained in the WHO FCTC:

**Monitor tobacco use & prevention policies**  
**Protect people from tobacco smoke**  
**Offer help to quit tobacco use**  
**Warn about the dangers of tobacco**  
**Enforce bans on tobacco advertising, promotion, & sponsorship**  
**Raise taxes on tobacco**

## GYTS Methodology

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey. The survey uses a standard core questionnaire with a set of optional questions that countries can adapt to measure and track key tobacco control indicators. The questionnaire covers the following topics: tobacco use (smoking and smokeless), cessation, secondhand smoke (SHS), pro- and anti-tobacco media and advertising, access to and availability of tobacco products, and knowledge and attitudes regarding tobacco use. The questionnaire is self-administered; using scannable paper-based bubble sheets, it is anonymous to ensure confidentiality.

In Antigua and Barbuda, GYTS was conducted in 2017 by Health Information Division, under the coordination of Ministry of Health. The overall response rate was 87.1%. A total of 2,268 eligible students in form 1 to form 5 completed the survey, of which 1,538 were aged 13-15 years. Data are reported for students aged 13-15 years.
