

## Saint Vincent and the Grenadines

### 2018 Fact Sheet

The 2018 Saint Vincent and the Grenadines GSHS was a school-based survey of students in Form 2 - First yr SVGCC, which are typically attended by students aged 13-17. A two-stage cluster sample design was used to produce data representative of all students in Form 2 - First yr SVGCC in Saint Vincent and the Grenadines. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate.

The Saint Vincent and the Grenadines GSHS measured alcohol use; dietary behaviors; drug use; hygiene; mental health; physical activity; protective factors; sexual behaviors; tobacco use; and violence and unintentional injury. Students self-reported their responses to each question on a computer scannable answer

The school response rate was 100%, the student response rate was 78%, and the overall response rate was 78%. A total of 1,877 students participated in the Saint Vincent and the Grenadines GSHS. Prevalence estimates (percentages) and 95% confidence intervals are presented below.
