

GYTS Objectives

The Global Youth Tobacco Survey (GYTS), a component of the Global Tobacco Surveillance System (GTSS), is a global standard for systematically monitoring youth tobacco use (smoking and smokeless) and tracking key tobacco control indicators.

GYTS is a cross-sectional, nationally representative school-based survey of students in grades associated with ages 13 to 15 years. GYTS uses a standard core questionnaire, sample design, and data collection protocol. It assists countries in fulfilling their obligations under the World Health Organization (WHO) Framework Convention on Tobacco Control (FCTC) to generate comparable data within and across countries. WHO has developed MPOWER, a technical package of selected demand reduction measures contained in the WHO FCTC:

- Monitor tobacco use & prevention policies
- Protect people from tobacco smoke
- Offer help to quit tobacco use
- Warn about the dangers of tobacco
- Enforce bans on tobacco advertising, promotion, & sponsorship
- Raise taxes on tobacco

GYTS Methodology

GYTS uses a global standardized methodology that includes a two-stage sample design with schools selected with a probability proportional to enrollment size. The classes within selected schools are chosen randomly and all students in selected classes are eligible to participate in the survey. The survey uses a standard core questionnaire with a set of optional questions that countries can adapt to measure and track key tobacco control indicators. The questionnaire covers the following topics: tobacco use (smoking and smokeless), cessation, secondhand smoke (SHS), pro- and anti-tobacco media and advertising, access to and availability of tobacco products, and knowledge and attitudes regarding tobacco use. The questionnaire is self-administered; using scannable paper-based bubble sheets, it is anonymous to ensure confidentiality.

In Micronesia (Federated States of), GYTS was conducted as a census in 2019 by Department of Health and Social Affairs. The overall response rate was 87.1%. A total of 6,660 eligible students in grade 7 to 12 completed the survey, of which 3,398 were aged 13-15 years. Data are reported for students aged 13-15 years.

GYTS Highlights

TOBACCO USE

- 29.2% of students, 34.1% of boys, and 25.1% of girls currently used any tobacco products.
- 23.5% of students, 27.5% of boys, and 20.1% of girls currently smoked tobacco.
- 20.6% of students, 25.2% of boys, and 17.0% of girls currently smoked cigarettes.
- 16.0% of students, 20.0% of boys, and 12.7% of girls currently used smokeless tobacco.

ELECTRONIC CIGARETTES

- 13.9% of students, 18.8% of boys, and 9.8% of girls currently used electronic cigarettes.

CESSATION

- Almost 8 in 10 (79.2%) students who currently smoke tobacco tried to stop smoking in the past 12 months.
- More than 8 in 10 (81.4%) students who currently smoke tobacco wanted to stop smoking now.

SECONDHAND SMOKE

- 35.6% of students were exposed to tobacco smoke at home.
- 45.0% of students were exposed to tobacco smoke inside enclosed public places.

ACCESS & AVAILABILITY

- 19.1% of students who currently smoke cigarettes bought cigarettes from a store or shop.
- Among students who currently smoke cigarettes who tried to buy cigarettes, 46.7% were not prevented from buying them because of their age.

MEDIA

- Almost 5 in 10 (48.6%) students noticed anti-tobacco messages in the media.
- More than 4 in 10 (44.5%) students noticed tobacco advertisements or promotions when visiting points of sale.
- Almost 2 in 10 (19.9%) students had something with a tobacco brand logo on it.

KNOWLEDGE & ATTITUDES

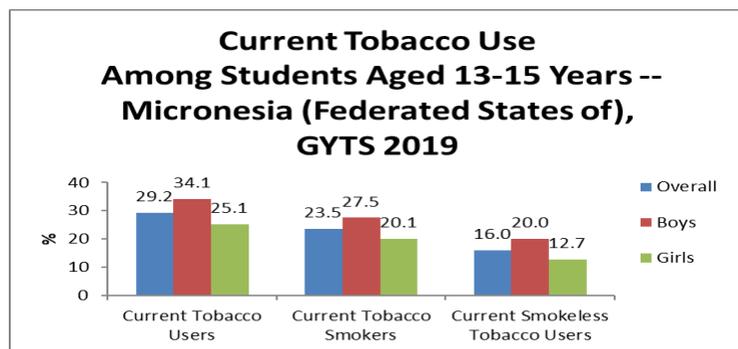

- 41.7% of students definitely thought other people's tobacco smoking is harmful to them.
- 49.4% of students favored prohibiting smoking inside enclosed public places.

¹ Smoked cigarettes, smoked other type of tobacco, and/or used smokeless tobacco anytime during the past 30 days. ² Ever smoked tobacco and/or used smokeless tobacco. ³ Smoked cigarettes or other type of tobacco anytime during the past 30 days. ⁴ Smoked cigarettes anytime during the past 30 days. ⁵ Smoked cigarettes on 20 or more days of the past 30 days. ⁶ Smoked tobacco other than cigarettes anytime during the past 30 days. ⁷ Ever smoked cigarettes or other type of tobacco, even one or two puffs. ⁸ Ever smoked cigarettes, even one or two puffs. ⁹ Ever smoked tobacco other than cigarettes, even one or two puffs. ¹⁰ Used smokeless tobacco anytime during the past 30 days. ¹¹ Ever used smokeless tobacco. ¹² Susceptible to future tobacco use includes those who answered "definitely yes", "probably yes", or "probably not" to using tobacco if one of their best friends offered it to them, or "definitely yes", "probably yes", or "probably not" to using tobacco during the next 12 months. ¹³ Those who answered "Agree" or "Strongly Agree" to the statement: "I think I might enjoy smoking a cigarette". ¹⁴ Used electronic cigarettes anytime during the past 30 days. Current use of electronic cigarettes is assessed separately from cigarettes, other smoked tobacco products, and smokeless tobacco products and is not included in the current definition of current any tobacco use. ¹⁵ Ever used electronic cigarettes in their entire life. ¹⁶ During the past 7 days. ¹⁷ During the past 30 days. ¹⁸ Outlet from which current cigarette smokers bought cigarettes the last time they smoked cigarettes in the past 30 days. ¹⁹ Among those who tried to buy cigarettes during the past 30 days. ²⁰ Based on the last purchase, among those who bought cigarettes during the past 30 days. ²¹ Among those who visited a point of sale in the past 30 days. ²² Among those who watched television, videos, or movies in the past 30 days. ²³ Among those who attended sporting or community events in the past 30 days. ²⁴ Among those who noticed warning labels on cigarette packages in the past 30 days.

NOTE: Data are nationally representative of all students aged 13-15 years who are enrolled in school. A census was done of all schools containing students in grade 7 to 12, and all students within all schools were surveyed. Percentages reflect the prevalence of each indicator in each group, not the distribution across groups.
