

Fruit in Schools - Nutrition-Friendly Schools Initiative (NFSI)/Health promoting schools - School age children (SAC)

Programme: Fruit in Schools

Programme Data

Programme Description

Fruit in Schools is a unique, innovative initiative targeted at a limited number of primary schools in areas of high deprivation in New Zealand. Up to three clusters of school communities from each region are involved in the first two phases of Fruit in Schools, which began in Term 4 of 2005.

Fruit in Schools Aims

To enhance student learning through promoting the wellbeing of the school community with particular focus on:

- ? healthy eating
- ? physical activity
- ? being sun smart
- ? being smokefree.

Fruit in Schools Objectives

- ? Children in participating school communities eating more fruit.
- ? More school communities promoting health through a whole school approach.
- ? Increasing awareness and implementation of policies and practices that encourage healthy eating, physical activity, smokefree and sun protection in school community environments.

Program type

National
