http://www.who.int/nutrition/publications/policies/global_nut_policyrevi...

The Global Nutrition Policy Review 2016–2017 is the report of the second comprehensive analysis of nutrition-related policy environment, coordination mechanisms, available capacities and actions being taken in 176 Member States (91%) and one area which responded to the survey carried out between July 2016 and December 2017.

Implementing organisations

Action data

Start date

Country(ies): Ghana

Topic: Management of moderate malnutrition

Target group: MAM child
Preschool-age children (Pre-SAC)

Delivery: Hospital/clinic

Implementation details : Components of the MAM programme: nutrition counselling, provision of supplementary foods. Recommendations as part of nutrition: increase intake of animal-source foods high in nutrients, increase intake of plant-source foods high in nutrients. Supplementary foods provided: fortified blended foods (e.g. Corn-Soy Blend (CSB)). Target groups: children 6-59 months with MAM. MAM is assessed among children 6-59 months using mid-upper arm circumference (MUAC) <125mm and >115 mm without bilateral pitting oedema.
