The Global Nutrition Policy Review 2016?2017 is the report of the second comprehensive analysis of nutrition-related policy environment, coordination mechanisms, available capacities and actions being taken in 176 Member States (91%) and one area which responded to the survey carried out between July 2016 and December 2017.

Implementing organisations

Action data

Start date

Country(ies): Niger

Topic: Management of severe acute malnutrition

Target group: Adult men and women
Infants and young children
Preschool-age children (Pre-SAC)
SAM child
School age children (SAC)

Implementation details : Target groups: children 0-5 months with SAM, children 6-59 months with SAM, children 5-18 years of age, adults. SAM is assessed among children 0-5 months by weight-for-length <-3Z score, bilateral pitting oedema. SAM is assessed among children 6-59 months by mid-upper arm circumference (MUAC) <115 mm, bilateral pitting oedema. Components of the SAM programme: inpatient treatment, outpatient treatment. Admission criteria for children 0-5 months with SAM to inpatient care: serious clinical condition or medical complications, recent weight loss or failure to gain weight, ineffective breastfeeding, any bilateral pitting oedema. Admission criteria for children 6-59 months with SAM to inpatient care: medical complications, severe bilateral pitting oedema. Discharge criteria: weight-for-height or weight-for-length ? ?2 Z-score, MUAC ? 125 mm, no bilateral pitting oedema for at least 2 weeks.
