

Promoting Access to TB Products

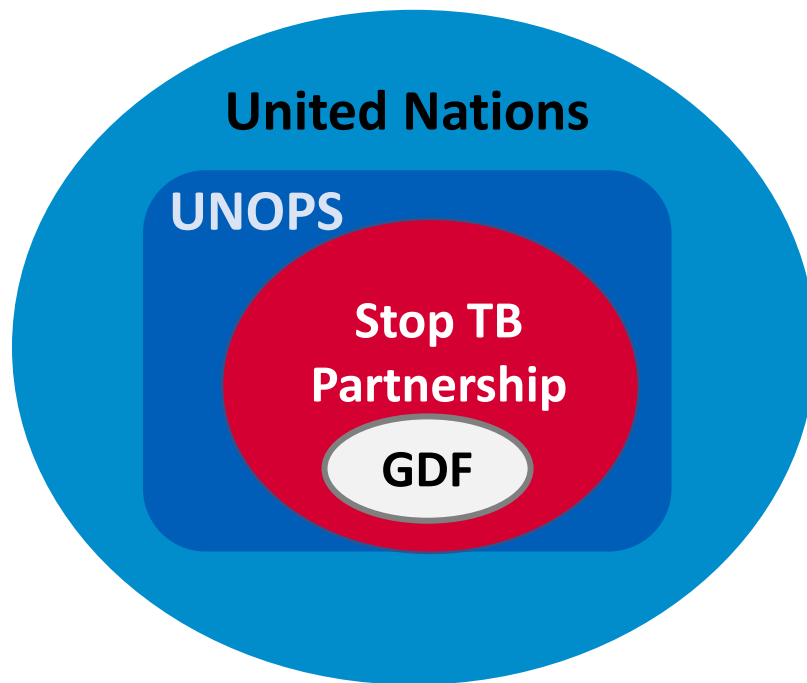

GDF's 2024 Updates

Dr Magali Babaley

Strategic Procurement and Business Intelligence Manager, StopTB-GDF

2024 Joint UNICEF, UNFPA, and WHO Meeting, Copenhagen, 2 – 6 December 2024

StopTB partnership and the Global Drug Facility (GDF)

- GDF was established in 2001
- Part of the United Nations (hosted by the United Nations Office for Project Services - UNOPS)
- Enterprise within the Stop TB Partnership
- Largely funded by USAID

- GDF is ISO 9001:2015 certified

End-to-end approach along entire product lifecycle, coordinating TB market stakeholders

One-stop shop for TB products

All TB programmes are eligible to procure from GDF regardless of income classification or funding source in alignment with national rules and regulations (165 countries served since its inception in 2001).

GDF Mission and Strategic Framework, 2023-2028

MISSION	Worldwide, equitable access to TB products			
VISION	Sustainable, viable global markets that deliver innovative, quality-assured, affordable TB products			
STRATEGIC OBJECTIVES	① Drive stewardship of global TB markets	② Demonstrate best in class model for global sourcing and supply	③ Facilitate country-led procurement and supply solutions	④ Incentivize and introduce innovations
OPERATIONAL PRINCIPLES	End-to-end product life-cycle management	Integrated procurement services maximizing efficiency & automation	Tailored solutions to address TB market challenges	Cost-effective, greener supply chains

<https://www.stoptb.org/2023-2028-operational-strategy>

GDF Expansion into Antimicrobial Resistance (AMR)

- Strategic review revealed AMR to be an area where GDF could add value and have significant impact.
 - An expansion into medicines for AMR was then included as part of GDF's new 2023-2028 Strategy
- GDF to supply some AMR medicines when there is a value-add to leverage the GDF platform
- Progress to date:
 - May 2024, signed a partnership agreement with the **Global Antibiotic Research & Development Partnership (GARDP)** to support the introduction of new, priority antibiotics for AMR
 - GARDP is an AMR-focused product development partnership working with 70 partners across 16 countries to accelerate the development and access to treatments for drug-resistant infections. <https://gardp.org>
 - June 2024, Co-hosted with WHO, GARDP, and Unitaid the SECURE Operational Planning meeting
- Next steps: collaborate with partners to determine which medicines to include in a GDF AMR catalog, and support product road maps for introduction and scale-up in countries

TREAT & PREVENT

GDF TB Diagnostic and Medical Device Suppliers

2024 New Products Introduction

Ultraportable Digital X-ray

FDR Xair Kit
(with safety accessories) (166)

Product Code: 200001

FDR Xair is a
X-ray Sys
exposu
used

PeakBea
(with safety acc

Product Code: 200036

PeakBea06P Kit is an Ultraportable
System fully battery-powered capable of 200
exposures with fully charged batteries that can be
used for TB screening and various other indications.

Computer-Aided Detection based on Artificial Intelligence (CAD/AI) software

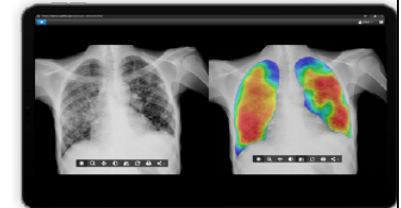

InferRead DR Chest Software

Perpetual License (INDRCHSTPL) and 3 years License S&M (INDRCHST3YL)

Product Code: 200001 and 200027

InferRead DR Chest Software is able to detect TB, for which it processes both antero-posterior (AP) and postero-anterior (PA) chest X-ray in less than 10 seconds. The output is a binary outcome for TB, continuous values for TB-probability and annotated images with rectangles indicating the areas identified as TB.

years

normal

and 20

from 0-100

translated

(ative) score.

- 2024 GDF tender led to **price decreases up to 67%** for **ultraportable Digital X-ray kits** and **services** offered, leading to improved access and sustainable use

- Suppliers of **CAD/AI software** are encouraged to submit their dossier to the **WHO PQ Program for assessment**

[https://www.who.int/news-room/articles-detail/call-for-expression-of-interest-by-manufacturers-of-software-for-computer-aided-detection-of-tuberculosis-\(cad\)-to-submit-products-for-who-expert-assessment](https://www.who.int/news-room/articles-detail/call-for-expression-of-interest-by-manufacturers-of-software-for-computer-aided-detection-of-tuberculosis-(cad)-to-submit-products-for-who-expert-assessment)

QXR AI SOFTWARE

Perpetual License (qXRPERP) and 3 years License S&M (qXRLICEN)

Product Code: 200036 and 200037

qXR AI is able to detect TB, for which it processes both antero-posterior (AP) and postero-anterior (PA) chest X-ray in less than 10 seconds. The output is a score ranging from 0-1 shown together with a heatmap and translated into a pre-set binary (positive / negative) score.

Newly Added to GDF Catalog: SIILTIBCY™ skin test

Stop TB Partnership Global Drug Facility Info Sheet: SIILTIBCY

Drug Resistant -TB Regimen Price Reductions

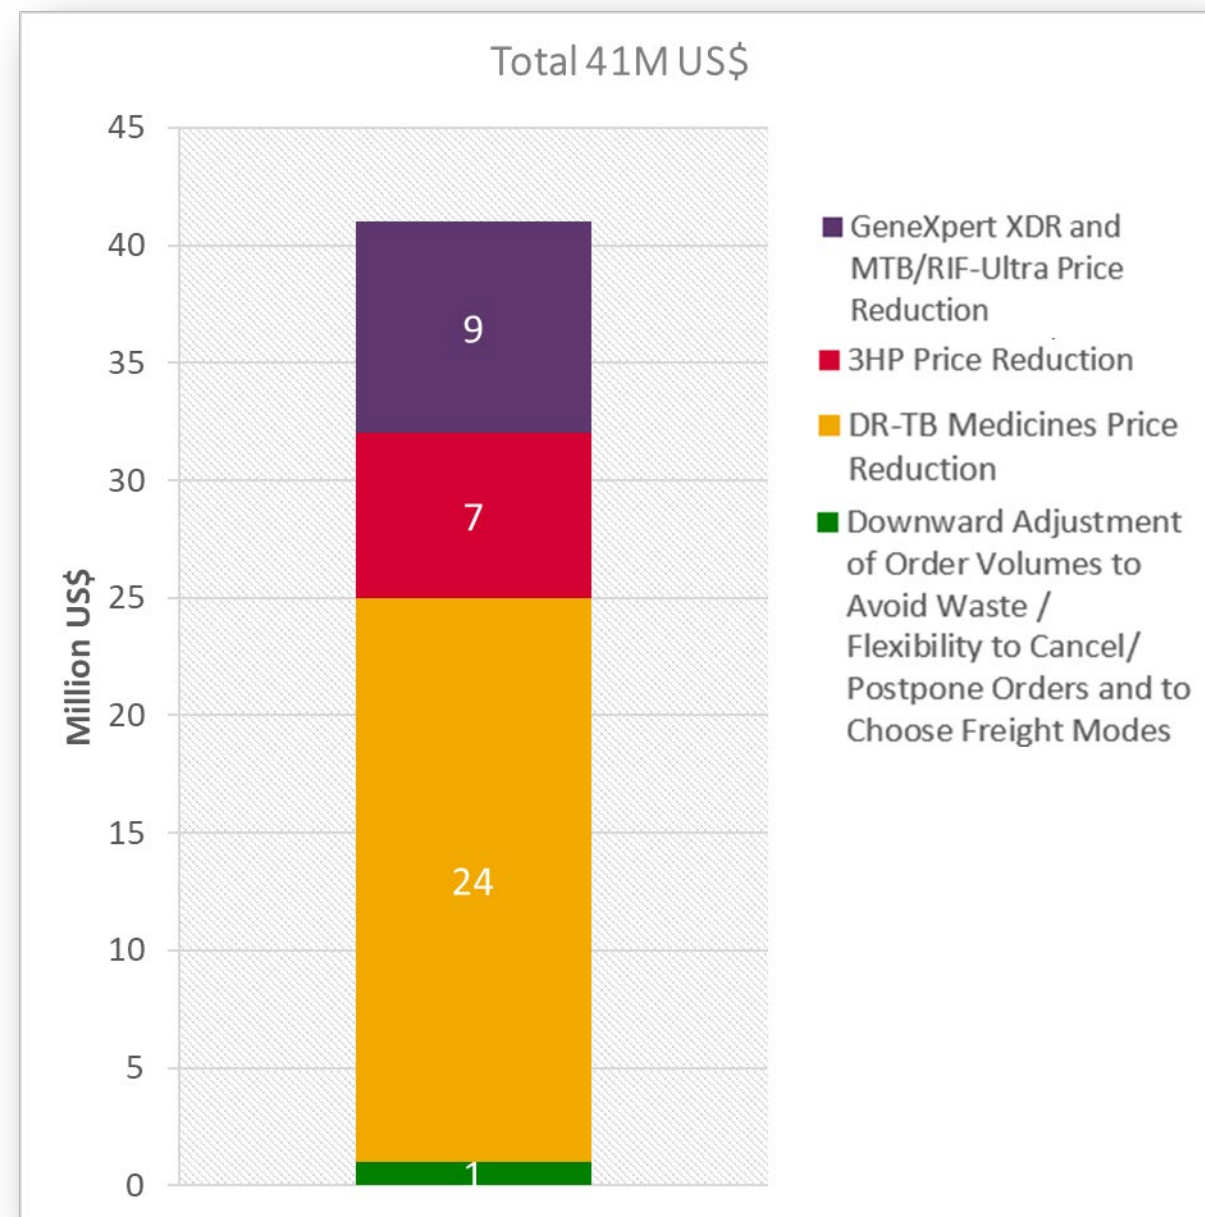

As of 22/11/2024

GDF Savings in 2024

GDF saved **US\$ 41 million** as of 30 September 2024 equivalent to the cost of treating an additional **94,250 adults** with DR-TB using the newly-recommended **BPaLM regimen** or treating an extra **4 million** people with **3HP for TB prevention** or test additional **1.12 million of people** for TB with GeneXpert MTB/RIF Ultra.

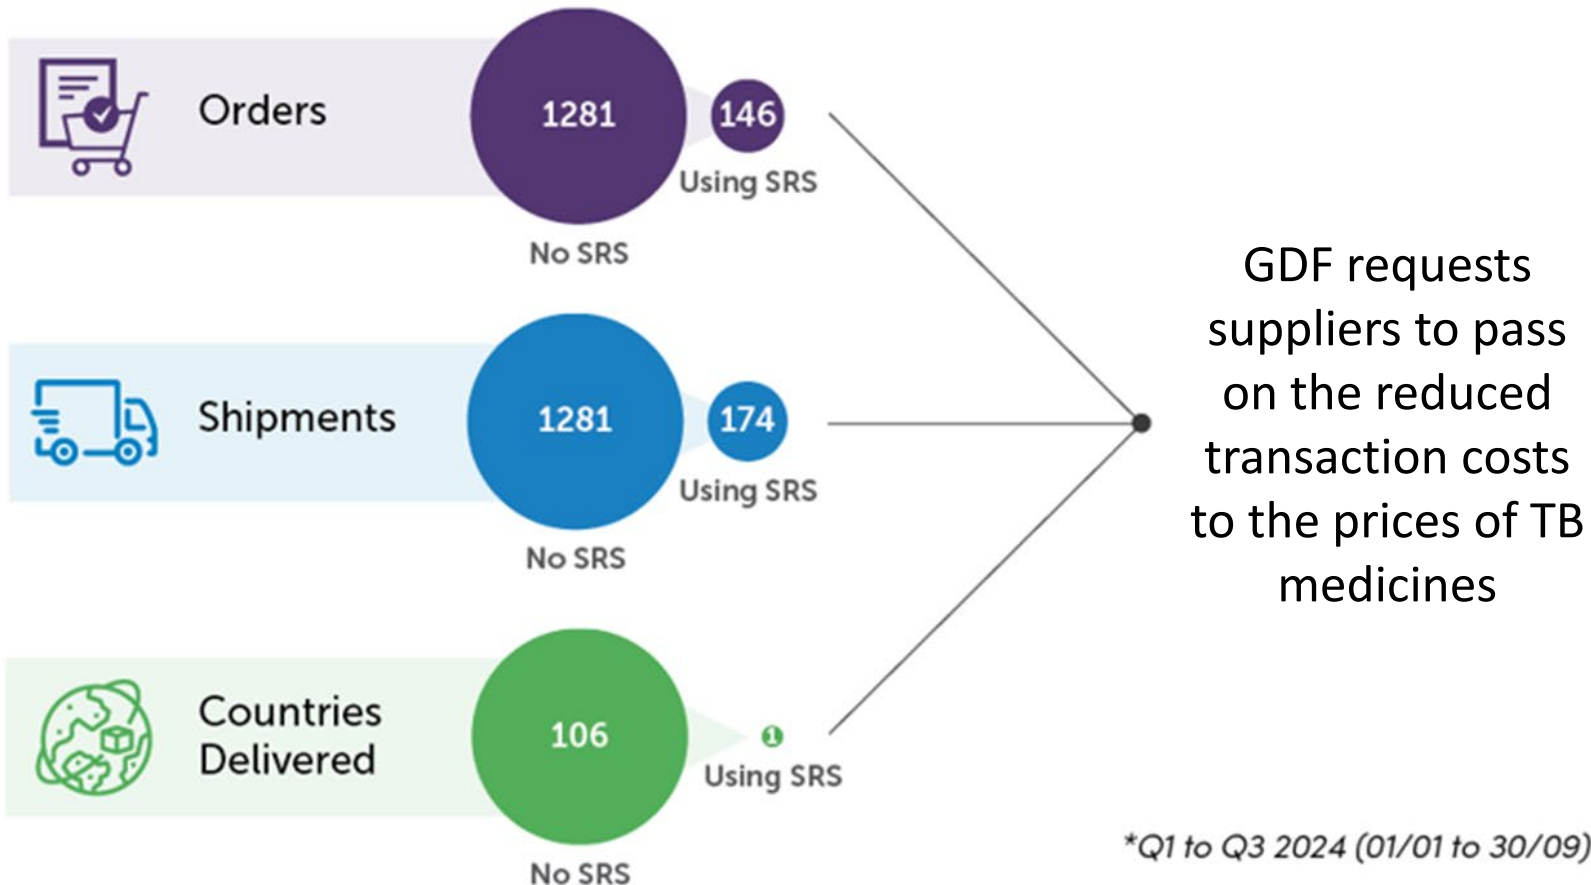

These savings are the results of GDF strategic procurement and collaboration with Donors (USAID and Global Fund)

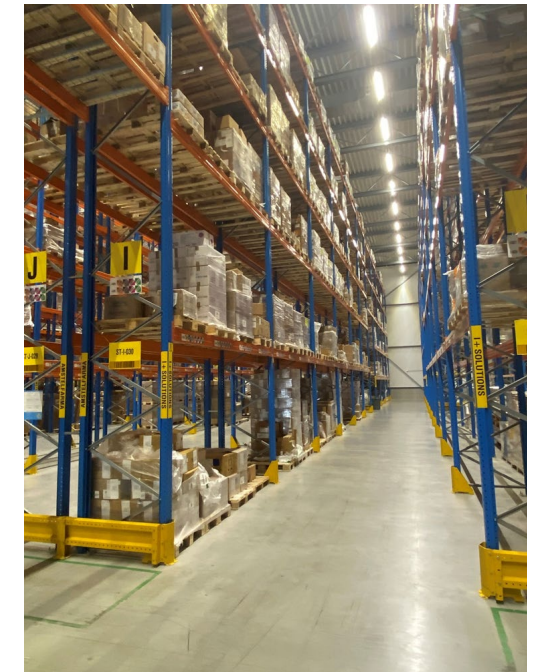

GDF Strategic Rotating Stockpile

Benefits to suppliers must be passed to patients

2024*: Fewer orders and shipments decreased suppliers' transaction costs:

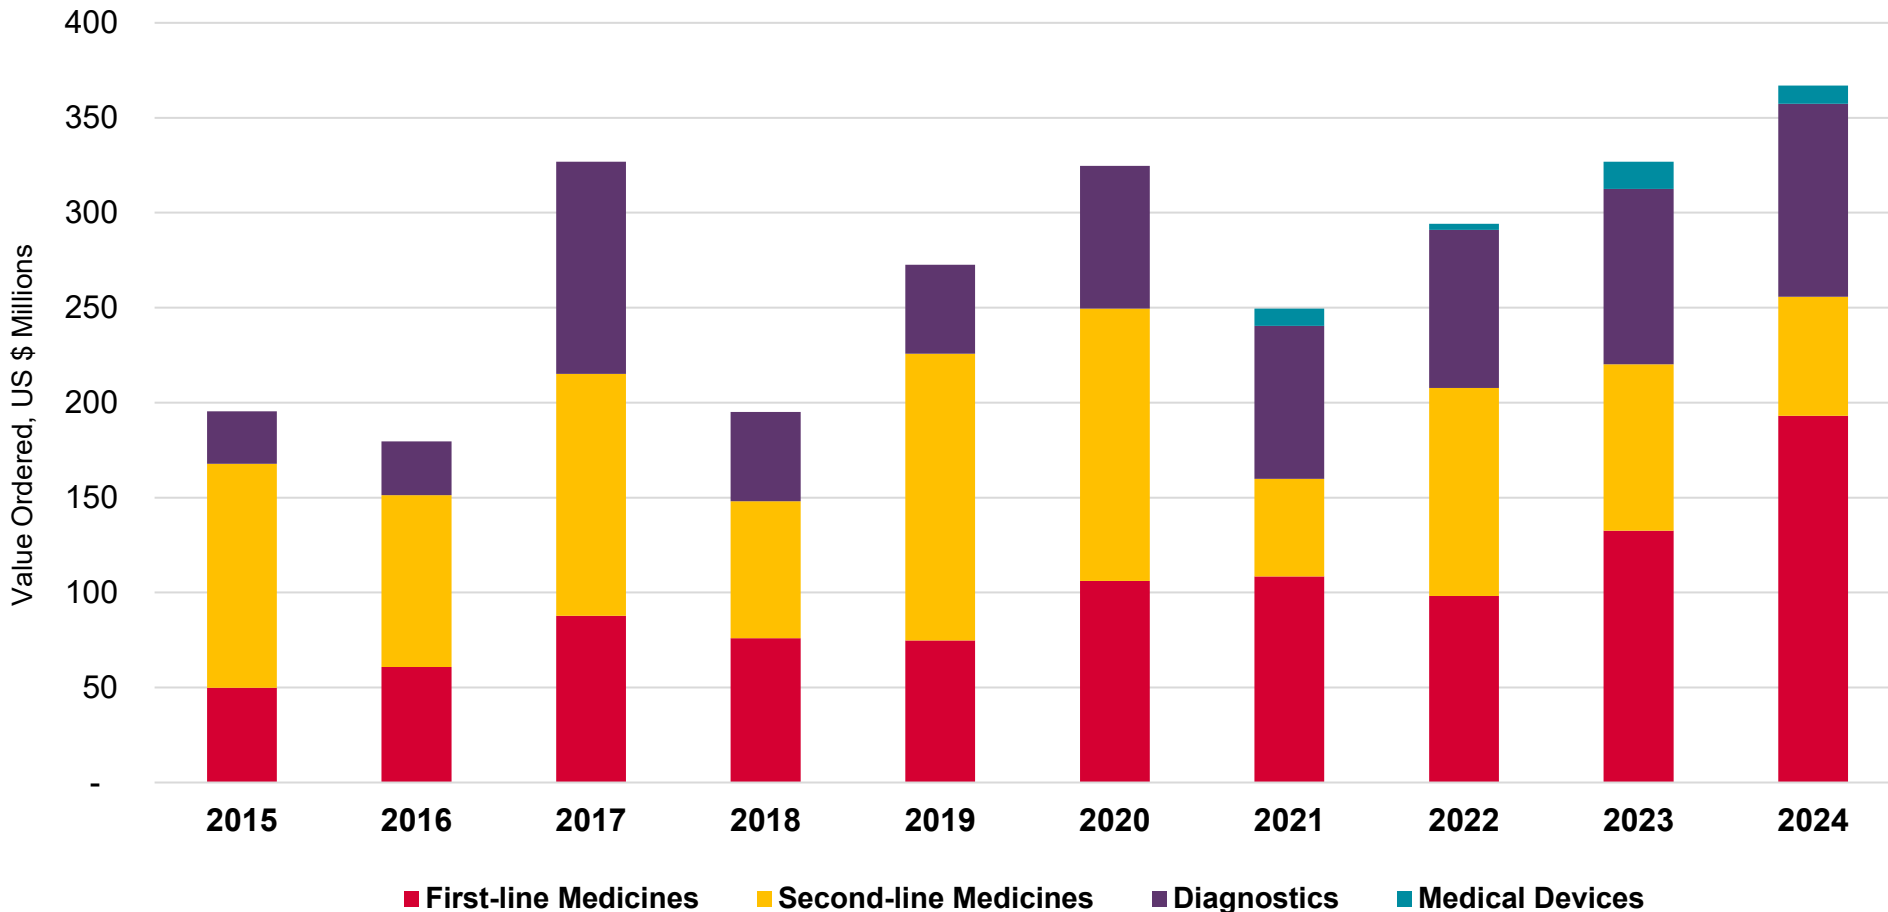

Suppliers awarded as primary suppliers in GDF tenders are prioritized for inclusion in the GDF Strategic Rotating Stockpile

2024 GDF New Record - US\$ 367 Million of TB Products Procured

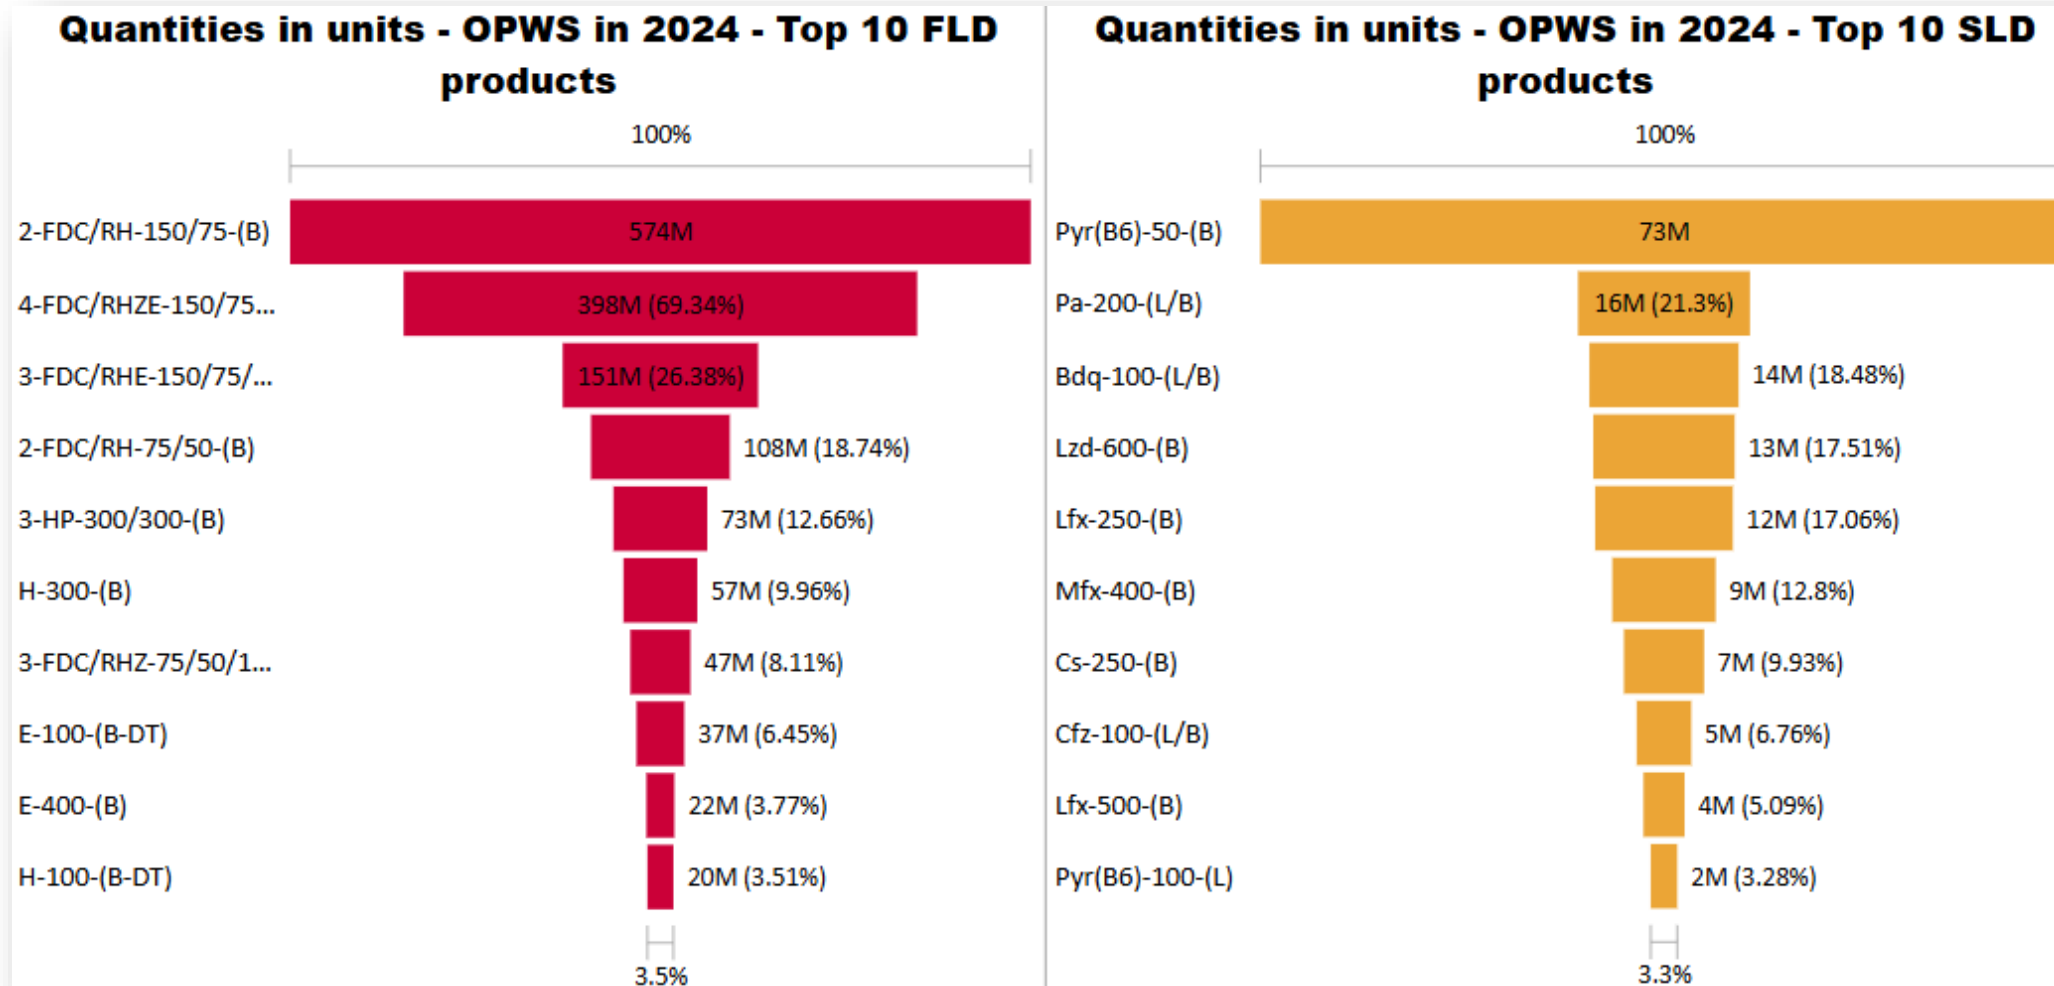

Value of GDF purchase orders placed with suppliers per category of products per calendar year

HOW TO BECOME A SUPPLIER OF TB MEDICINES

ELIGIBILITY CRITERIA for TB MEDICINES SUPPLIERS

Please check that you match the below criteria to become an eligible supplier for StopTB/GDF procurement:

1. Are you the manufacturer of a TB medicine(s)? Please note that wholesalers or resellers of medicines are not eligible to be suppliers to StopTB/GDF.
2. Do you produce a TB medicine(s) that are in the current StopTB/GDF Medicines Catalog? Or do you produce a WHO-recommended medicine/new formulation for TB treatment that is not yet listed in the StopTB/GDF catalog?
3. Does your TB medicine(s) fully comply with StopTB/GDF's Quality Assurance policy?

If you have answered "yes" to the three eligibility criteria above, please contact StopTB/GDF at gdf@stoptb.org, to the attention of the Sourcing and QA team.

StopTB/GDF will then require you to provide a list of information and supporting documentation about the TB medicine(s) you offer.

GDF's Digital Transformation for Strategic Procurement

Stop TB Partnership
GLOBAL DRUG FACILITY

Home

Welcome to the CDP Portal of Global Drug Facility!

The CDP* is a new Global Drug Facility (GDF) tool to improve and ease communication, and exchange of information between GDF and its TB medicines suppliers through a web platform.

The CDP is composed of different modules that covers the information related to TB medicines in the market, the status of quality-assured TB medicines registration in countries, the management of TB medicines quality complaints and the possibility for suppliers to automatically submit their technical Bids during GDF's tenders via the platform, with the aim to strengthen the quality and integrity of data/information exchanged for the benefit of both parties.

Founding Principles of GDF

The GDF is the largest global provider of quality-assured TB medicines, TB diagnostics, and laboratory supplies worldwide.

Suppliers are required to submit information about TB medicines to the CDP Portal for review and approval by the GDF

Category of products	Timelines
General laboratory supplies (around 230 items)*	Q1 2025
Pretomanid 200mg tablets**	Q1 2025

If you are a supplier of TB products that meet GDF's quality standards, deliver on time, and offer competitive and sustainable prices, please participate in GDF tenders.

If selected, you will be included in the **GDF catalog** and gain access to the **global TB market** to support us in the fight against TB, the **top infectious killer disease**.

* For diagnostics: <https://www.ungm.org/Public/Notice>. Contract for 3 years with an option to renew the LTA for two additional periods of one (1) year each, under the same terms and conditions for a maximum total of five (5) years

** For TB medicines: <https://www.stoptb.org/what-we-do/facilitate-access-tb-drugs-diagnostics/global-drug-facility-gdf/suppliers/procurement-notices> Contract with Initial term of 1 year with possibility of extension up to 12 months at a time under the same terms and conditions. Total duration of the Initial Term and all Extended Terms cannot exceed three years.

Summary – Take Home Points

- GDF is the largest supplier of affordable, quality-assured TB products to countries (165 countries served since its inception in 2001).
- GDF added value is the End-to-end approach along entire product lifecycle, coordinating TB market stakeholders.
- GDF expansion into medicines for AMR area could have significant impact.
- Partnership approach between GDF and suppliers is the approach of choice for access to TB products
- Suppliers interested to develop TB medicines are invited to contact GDF
- Suppliers of TB products that meet GDF's quality standards are invited to participate in GDF tenders

Thank You
