Sessions Day 1 - Numbers

Sessions Day 2 - Numbers

Session Day 3 - Numbers

Innovation and Collaboration

- PQ continues to facilitate equitable access to quality assured health products, it has also **expanded scope** and provided **updated guidance**
- New initiative to **align WHO normative and prequalification** is expected to facilitate **timely access** to innovations.
- Opportunity with the **WLAs**
- **Leveraging** other fora: actions from the **WLPF**
 - Tackle info gaps: Development of global/regional mapping
 - Collaborate with countries to create/strengthen
 - Conducive financial environment

New projects

- HP manufacturing support platform (with partners)
- Platform to map tech transfer & local capacities
- **Innovation in Partnerships** for **local** African Vaccines manufacturing
- **UNICEF TRVST System** – innovations to avoid falsified medicines

Innovation and Collaboration (II)

- **Innovations** being considered **across tracks**: e.g.
 - The Female Condom generic specification recommended for adoption
 - Post Market Surveillance SOPs for PQ manufacturers in development.
 - Standardizing Technical support
 - Evolving technologies for non-systemic contraceptives and STI barrier prophylactics
 - Digitalization of supply chains
 - ...
- **New modalities** for work: e.g. **collaboration with external partners** on supply management
- **New initiatives** such as the global platform for **access to Childhood Cancer Medicines**

“Innovation doesn’t happen in one day, it needs continuous investment in regular work and systems”

What you told us you expected

What you expect to get out of this meeting? (your top 3 priorities)

This is a multiple choice question.
