1 Introduction

WHO's Prequalification Unit, Vector Control Product Assessment team (PQT/VCP) assesses vector control products and public health pesticide active ingredients to determine their acceptability and that they can be used safely, effectively and are manufactured to a high-quality standard. This is done by assessing product dossiers, inspecting manufacturing sites, and supporting quality-control testing of products. Products that meet prequalification requirements are added to the WHO list of vector control products.

WHO prequalification of vector control products primarily benefits populations most affected by vector-borne diseases by facilitating access to these prevention focused tools. The vector-borne diseases include malaria, and neglected tropical diseases such as Dengue, Chikungunya, Zika, Chagas, Lymphatic filariasis, Leishmaniasis, Human African trypanosomiasis, Onchocerciasis and Schistosomiasis.

This Executive Summary document conveys that, based on the application and product dossier supporting the product Yorkool G1 LN manufactured by Tianjin Yorkool International Trading Co., Ltd. (PQ Ref# P-11664), the product has been found to meet the requirements for WHO prequalification.

2 Product identification

Yorkool G1 LN is a homogenous ITN (roof and sides are constructed from same fabric). It comes in rectangular and conical constructions. There are three versions of the fabric with deniers of 75D, 100D or 150D. The multifilament polyester yarn knitted fabric is coated with Deltamethrin (CAS No. 52918-63-5) with nominal concentrations of 1.8 g/kg for 75D and 1.4 g/kg for 100D and 150D fabrics. The declared fabric weights for the 75D, 100D, and 150D versions are 30 g/m², 40 g/m² and 40 g/m² respectively.

The product formulation for Yorkool G1 LN is the same as the product Yorkool LN (PQ Ref# 021-001). Yorkool G1 LN was submitted by the applicant as a stand-alone new product whereas the product Yorkool LN was assessed by WHO based on a claim of equivalence.

Yorkool G1 LN is intended to provide personal and community protection from *Anopheles* mosquitoes as part of malaria control programmes.

3 Assessment of quality

Please see current WHOPAR Part 3 Quality Assessment.

6 Labelling

The proposed Declaration of Labelling has been reviewed by PQT/VCP and found to be consistent with the supporting information.

7 Post-prequalification commitments

As per the existing WHO guideline for the prequalification assessment of ITNs, the applicant is required to submit results from long-term community studies within four years of the date of prequalification.

As per the implementation plan for the 2023 WHO guideline for the prequalification assessment of ITNs, the applicant is required to submit Modules 3, 4 and 5 requirements for assessment by 31st December 2024.

8 Pre-qualification listing decision

The review of the dossier submitted for the product Yorkool G1 LN has been completed by PQT/VCP. The results of the assessments show the product meets the requirements for prequalification when used according to the directions for use on the label. The product is allowed inclusion on the list of prequalified vector control products.
