1. Introduction

WHO's Prequalification Unit, Vector Control Product Assessment team (PQT/VCP) assesses vector control products and public health pesticide active ingredients to determine their acceptability and that they can be used safely, effectively and are manufactured to a high-quality standard. This is done by assessing product dossiers, inspecting manufacturing sites, and supporting quality-control testing of products. Products that meet prequalification requirements are added to the WHO list of vector control products.

WHO prequalification of vector control products primarily benefits populations most affected by vector-borne diseases by facilitating access to these prevention focused tools. The vector-borne diseases include malaria, and neglected tropical diseases such as Dengue, Chikungunya, Zika, Chagas, Lymphatic filariasis, Leishmaniasis, Human African trypanosomiasis, Onchocerciasis and Schistosomiasis.

This Executive Summary document conveys that, based on the application and product dossier supporting the product GreenNet LN (PQ Ref# P-00320), manufactured by Shobikaa Impex Private Limited. The product has been found to meet the requirements for WHO prequalification.

2. Product identification

GreenNet LN is a homogeneous ITN (roof and side panels are constructed from the same fabric). The fabric is warp knitted using 100D polyester multifilament yarn produced from recycled PET bottles. The fabric is coated by means of binder formulation with the active ingredients deltamethrin (CAS No. 52918-63-5) at nominal concentrations of 1.4g/kg. The declared fabric weight is 40 g/m² ± 10%.

The product, GreenNet LN, is intended to provide personal and community protection from *Anopheles* mosquitoes as part of malaria control programmes.

3. Assessment of quality

Please see current WHOPAR Part 3 Quality Assessment.

6. Labelling

The proposed Declaration of Labelling has been reviewed by PQT/VCP and found to be consistent with the supporting information.

7. Post-prequalification commitments

As per the existing WHO guideline for the prequalification assessment of ITNs, the applicant is required to submit results from long-term community studies within four years of the date of prequalification.

As per the implementation plan for the 2023 WHO guideline for the prequalification assessment of ITNs, the applicant is required to submit Modules 3, 4 and 5 requirements for assessment by 31st December 2024.

8. Pre-qualification listing decision

The review of the dossier submitted for the product GreenNet LN has been completed by PQT/VCP. The results of the assessments show the product meets the requirements for prequalification when used according to the directions for use on the label. The product is allowed inclusion on the list of prequalified vector control products.
