Let's go back to the app – help us answer some questions

We start from the paradigm shifts ...

and have incorporated your feedback

- Expand «**rolling submissions**»
- Be **flexible**. Go for **innovative, optimized** processes (while maintaining the **science**)
- Treat **regional and local** production with **urgency** – strengthen the **collaborative** actions & work towards **take-up** of these local products by procurers – ensuring **quality** and appropriate **forecasting**
- Apply **IT** and **artificial intelligence** through the supply chain to improve...
 - transparency
 - planning
 - forecasting
 - predictability
 - sustainability, and
 - security of supply chains for medical products

...remembering to manage impact on **climate change** and **environment**

What to expect?
