	As part of the SmartSystem, the SmartMonitor SITE L provides real-time monitoring of temperature alarms through visual and acoustic alarms. At the same time transmits status monitoring data to the central SmartView platform, which displays all measurement data, trends and alarms. SmartView also provides alarm notification for customer-defined contacts to selected cell phones and/or email. The SmartSystem includes SmartView software and global mobile network coverage (cellular). The SmartMonitor features visual + audio alarms on the device.
