

Steps before prequalification

I BACKGROUND INFORMATION ON THE PROCEDURE

1. Submission of the dossier

The company Biosimilar Collaborations Ireland Limited submitted in 2022 an application for Ogivri¹ powder for concentrate for solution for infusion 440 mg, to be assessed with the aim of including Ogivri in the list of prequalified medicinal products for the treatment of early stage HER2 positive breast cancer or metastatic HER2 positive breast cancer.

Ogivri was assessed according to the WHO Pilot Procedure for Prequalification of Biotherapeutic Products: rituximab and trastuzumab² and relevant applicable guidelines by the team of WHO assessors. The assessors are senior experts, mainly from national authorities, invited by WHO to participate in the prequalification assessment process.

The prequalification of this product by the WHO Prequalification of Medicines Programme is based on the approval by a stringent regulatory authority (SRA), namely the “Swissmedic” (<https://www.swissmedic.ch>) in line with the applicable guidelines².

Hence, no assessment of the data underlying this approval has been undertaken within the WHO Prequalification Team: Medicines (PQTm). However, according to the above-mentioned guideline WHO verified that the product, and in particular composition/formulation, strength, manufacturing, specifications, packaging, product information, will, at the time of submission and after prequalification, in all respects be the same as the product registered with the reference SRA (“verification”). Furthermore, WHO requested additional data for the safe use of the product in regions relevant for prequalified products and this information is included in the WHOPAR (part 6b). In order to safeguard product quality throughout its entire intended shelf-life, WHO assessed the evidences to verify the adherence to the principles outlined in the most recent version of the WHO guidelines on the international packaging and shipping of vaccines, also partially applicable to other biotherapeutic products³, to demonstrate suitability of the packaging to regions outside of climatic zone II. The WHO assessment included the packaging procedures for international shipments and the validation protocols and reports of the shipping boxes used for supply of the prequalified product.

Based on the data submitted the team of assessors advised that Ogivri be included in the list of prequalified medicinal products. Ogivri was listed on 3 May 2022².

Licensing status:

Ogivri has been licensed / registered in Switzerland.

2. Steps taken in the evaluation of the product

Mar-2022	The applicant submitted the dossier
Mar 2022	The assessment team reviewed the submitted data and accepted the dossier for assessment

¹ Trade names are not prequalified by WHO. This is the national medicines regulatory authority’s responsibility. Throughout this WHOPAR the proprietary name is given as an example only.

Mar 2022	The assessment team reviewed the submitted document and further data was requested on verification and quality. Pharmacovigilance was found to be in compliance with WHO requirements
Apr 2022	The applicant's response letter was received.
Apr 2022	Verification and quality were found to be in compliance with WHO requirements
May 2022	Ogivri was included in the list of prequalified medicinal products.

II GENERAL CONDITIONS FOR THE PREQUALIFICATION

1. Manufacturer, Commitments and Inspection status

Name and address of the manufacturer of the biological active substance

Biocon Biologics Limited

Special Economic Zone - Plot Nos. 2, 3, 4 & 5, Phase-IV

Bommasandra-Jigani Link Road

Bommasandra Post

Bengaluru - 560 099

India

Name and address of the manufacturer of the drug product

Biocon Biologics Limited

Special Economic Zone - Plot Nos. 2, 3, 4 & 5, Phase-IV

Bommasandra-Jigani Link Road

Bommasandra Post

Bengaluru - 560 099

India

Commitments for Prequalification

The Applicant committed to submit to WHO following each marketing authorization, a brief discussion on how the Applicant has addressed, after product prequalification, any potential differences in healthcare settings, compared to SRAs, that have required a revision of the adequacy of the safety concerns, pharmacovigilance activities, risk minimisation measures and/or traceability of the product.

Inspection status

The sites are inspected by a stringent regulatory authority.
