WHO Prequalification Programme WHO PUBLIC ASSESSMENT REPORT (WHOPAR)

Erpizon 250 mg, powder for solution for infusion¹

Aciclovir 250 mg powder for solution for infusion

Erpizon 250 mg, powder for solution for infusion was submitted in 2013 by DEMO S.A. to be considered for prequalification and subsequently accepted for the WHO list of prequalified products for the treatment of HIV/AIDS related conditions on 08 January 2014.

Information on the site(s) involved in the manufacture of the product and the API is available at the products listing information: https://extranet.who.int/prequal/medicines/ha602.

The "Procedure for prequalification of pharmaceutical products²" defines specific evaluation mechanisms for products approved by regulatory authorities, which apply similar stringent standards for quality, safety and efficacy as those required by WHO.

The prequalification of this product by the WHO Prequalification Team: Medicines (PQTm), is based on the approval by the Greek National Organisation for Medicines, (EOF, https://www.eof.gr/web/guest) in line with the "Guidelines on submission of documentation for prequalification of finished pharmaceutical products approved by stringent regulatory authorities" ³.

Hence, no assessment of the data underlying this approval has been undertaken within the WHO Prequalification Programme.

However, according to the SRA guideline WHO may request additional data when considered necessary for the safe use of the product in regions relevant for prequalified products and such information may be included in the WHOPAR as a separate piece of information. In order to safeguard product quality throughout its entire intended shelf-life in hot and very humid areas, stability studies under the conditions defined for Climatic Zones IVb have been requested from the Applicant⁴.

Based on the submitted stability data WHO PQTm considers the following storage condition appropriate for the product when distributed in regions with zone III, IVa and IVb climatic conditions, based on available stability information:

¹ Trade names are not prequalified by WHO. This is the National Medicines Regulatory Authority's responsibility. Throughout this WHOPAR the proprietary name is given as an example only.

- Do not store above 30°C. Protect from moisture. Avoid excursions above 30°C.
- The shelf-life at this storage condition is 36 months

This WHOPAR refers to the information available at the approving stringent regulatory authority's website resulting from the assessment of the quality, efficacy and safety as well as steps taken after approval. (https://www.eof.gr/web/guest)

For details on the uses of this product, for relevant efficacy and safety information see the summary of product characteristics and the patient information leaflet.

The English language version of the patient information leaflet, the summary of product characteristics and the labelling, as certified to be "EOF" approved texts, are included in this WHOPAR.

This WHOPAR for Erpizon is comprised of parts 2, 3. 4. 5 and 7.

Erpizon contains aciclovir. Its WHO recommended use is for the treatment of herpes zoster, herpes simplex as well as the treatment of genital herpes in HIV infected patients.

Summary of Prequalification Status for

Erpizon 250 mg, powder for solution for infusion

	Initial Acceptance		Requalification	
	Date	Outcome	Date	Outcome
Status on PQ list	08 January 2014	listed	07 December 2024	listed
Dossier Evaluation	December 2013	MR	December 2024	requalified
PQ: prequalification MR:meets requirements	•	•	•
