

**WHO Prequalification Programme
WHO PUBLIC ASSESSMENT REPORT (WHOPAR)**

Daklinza¹

International Nonproprietary Name (INN):
Daclatasvir (as dihydrochloride) 60mg tablets

Abstract

The “Procedure for prequalification of pharmaceutical products”² defines different evaluation mechanisms for innovator products and multisource (generic) products. In relation to this the “WHOPAR Guidance for Applicants (Manufacturers) on the compilation of the WHO Public Assessment Report, v 2.5”³ defines that for an innovator product that was approved by a medicines regulatory authority in one of the ICH regions and for which a public assessment report was published by the approving authority, the WHOPAR will for parts 1, 3, 4, 5, 6 and 8 refer to this public assessment report.

Daklinza 60mg film coated-tablet, manufactured at Bristol Myers Squibb Pharma EEIG, was submitted to be considered for prequalification in 2016 when the product was licensed / registered in at least one of the ICH regions and subsequently accepted for the WHO list of prequalified medicinal products for the treatment of chronic hepatitis C infections on 14 Oct 2016.

Hence, no assessment of the data underlying this approval has been undertaken within the WHO Prequalification Programme.

However, according to the SRA guideline WHO may request additional data when considered necessary for the safe use of the product in regions relevant for prequalified products and such information may be included in the WHOPAR as a separate piece of information. In order to safeguard product quality throughout its entire intended shelf-life, stability studies under the conditions defined for Climatic Zones IVb have been requested from the Applicant.

WHO PQM considers the following storage condition appropriate for the product when distributed in regions with zone III, IVa and IVb climatic conditions, based on available stability information:

Do not store above 30°C.

The shelf life at this storage condition is 30 months.

Based on the above, the WHOPAR for Daklinza refers for parts 1, 3, 4, 5, 6 and 8 to the previously issued public assessment report as follows:

¹ Trade names are not prequalified by WHO. This is the National Medicines Regulatory Authority’s (NMRA) responsibility. Throughout this WHOPAR the proprietary name is given as an example only.
