

**WHO Prequalification Programme**  
**WHO PUBLIC ASSESSMENT REPORT (WHOPAR)**

**[MA102 trade name]\***

Artesunate/amodiaquine (as hydrochloride) 25 mg/67.5 mg tablets

[MA102 trade name], manufactured at Cipla Limited, Patalganga, India was jointly accepted by WHO/EAC (East African Community) and included in the WHO list of prequalified medicinal products for the purpose of facilitating the national registration of the product by the countries of EAC for the treatment of malaria on 8 April 2014.

[MA102 trade name] is a so called artemisinin-based combination therapy (ACT) for the treatment of uncomplicated cases of malaria due to *Plasmodium falciparum* strains which are susceptible to amodiaquine as well as to artesunate.

The active pharmaceutical ingredients (APIs) of [MA102 trade name] are the 4-aminoquinoline amodiaquine and the artemisinin derivative artesunate. Each of these APIs, marketed as the therapeutic component of single products, is well-established and documented for the treatment of malaria, especially in combination with each other and with other products.

Efficacy and safety of amodiaquine and artesunate in uncomplicated *P. falciparum* malaria have been demonstrated in comparative clinical trials in West and Central Africa and in Madagascar and the efficacy and safety profile of artesunate and amodiaquine is sufficiently established based on clinical experience in the treatment of malaria. For details on the uses of this product and for side effects and warnings, see Part 4 of this WHOPAR (summary of product characteristics).

On the basis of data submitted and public information on the use of artemisinin-based combination therapy in malaria, the team of WHO/EAC assessors jointly accepted [MA102 trade name] for inclusion in the list of prequalified medicinal products for the purpose of facilitating national registration of the product in the member states of the EAC.
