

## WHO Prequalification Programme WHO PUBLIC ASSESSMENT REPORT (WHOPAR)

### Desolett 28 Tablets / Marvelon 28 Tablets<sup>1</sup>

Desogestrel/Ethinylestradiol 0.150mg/0.030mg tablets

Desolett 28 tablets was submitted in 2010 by N.V. Organon, to be considered for prequalification and subsequently accepted for the WHO list of prequalified products for reproductive health conditions in women on 29 September 2010.

Information on the site(s) involved in the manufacture of the product and the APIs is available at the products listing information <https://extranet.who.int/pqweb/medicine/3996>

The “Procedure for prequalification of pharmaceutical products<sup>2</sup>” defines specific evaluation mechanisms for products approved by regulatory authorities, which apply similar stringent standards for quality, safety and efficacy as those required by WHO.

The prequalification of this product by the WHO Prequalification Team: Medicines (PQTm), is based on the approval by the Swedish Medical Products Agency “lakemedelsverket” (<https://www.lakemedelsverket.se/en>), in line with the “Guidelines on submission of documentation for prequalification of finished pharmaceutical products approved by stringent regulatory authorities”<sup>3</sup>.

Hence, no assessment of the data underlying this approval has been undertaken within the WHO Prequalification Programme.

However, according to the SRA guideline WHO may request additional data when considered necessary for the safe use of the product in regions relevant for prequalified products and such information may be included in the WHOPAR as a separate piece of information. In order to safeguard product quality throughout its entire intended shelf-life in hot and very humid areas, stability studies under the conditions defined for Climatic Zones IVb have been requested from the Applicant<sup>4</sup>.

---

<sup>4</sup> [https://extranet.who.int/pqweb/sites/default/files/documents/48 Stability data SRA FPPs March2016\\_newtempl.pdf](https://extranet.who.int/pqweb/sites/default/files/documents/48%20Stability%20data%20SRA%20FPPs%20March2016_newtempl.pdf)

Based on the submitted stability data WHO PQTm considers the following storage condition appropriate for the product when distributed in regions with zone III, IVa and IVb climatic conditions, based on available stability information:

- Do not store above 30°C.
- The shelf-life at this storage condition is 36 months

This WHOPAR refers to the information available at the approving stringent regulatory authority's website resulting from the assessment of the quality, efficacy and safety as well as steps taken after approval.

(MA 11489)

For details on the uses of this product, for relevant efficacy and safety information see the summary of product characteristics and the patient information leaflet.

The English language version of the patient information leaflet, the summary of product characteristics and the labelling, as certified to be "Läkemedelsverket" approved texts, are included in this WHOPAR.

This WHOPAR for Desolett 28 Tablets is comprised of parts 2, 3, 4, 5 and 7.

Desolett 28 Tablets contains desogestrel and ethinylestradiol. Its WHO recommended use is for female contraception.

The efficacy and safety profile of desogestrel and ethinylestradiol is well established based on the extensive clinical experience in female contraception.

#### Summary of Prequalification Status for Desolett 28 Tablets

Initial acceptance			Requalification	
	Date	Outcome	Date	Outcome
Status on PQ list	29 September 2010	listed	02 February 2018	listed
Quality	September 2010	MR	February 2018	MR
PQ: prequalification MR: meets requirements				

The table represents the status of relevant completed activities only.
