## WHO Prequalification Programme WHO PUBLIC ASSESSMENT REPORT (WHOPAR)

## Priftin<sup>1</sup>

Rifapentine 150 mg film-coated tablets

Priftin was submitted in 2017 by Sanofi-aventis U.S. LLC to be considered for prequalification and subsequently accepted for the WHO list of prequalified products for the treatment of tuberculosis on 14 February 2017.

Information on the site(s) involved in the manufacture of the product and the API is available at the products listing information (<u>https://extranet.who.int/prequal/medicines/tb336</u>)

The "Procedure for prequalification of pharmaceutical products<sup>2</sup>" defines specific evaluation mechanisms for products approved by regulatory authorities, which apply similar stringent standards for quality, safety and efficacy as those required by WHO.

The prequalification of this product by the WHO Prequalification Team: Medicines (PQTm), is based on the approval by the United States Food and Drug Administration (<u>https://www.fda.gov/</u>) in line with the "Guidelines on submission of documentation for prequalification of finished pharmaceutical products approved by stringent regulatory authorities" <sup>3</sup>.

Hence, no assessment of the data underlying this approval has been undertaken within the WHO Prequalification Programme.

However, according to the SRA guideline WHO may request additional data when considered necessary for the safe use of the product in regions relevant for prequalified products and such information may be included in the WHOPAR as a separate piece of information. In order to safeguard product quality throughout its entire intended shelf-life in hot and very humid areas, stability studies under the conditions defined for Climatic Zones IVb have been requested from the Applicant<sup>4</sup>.

Based on the submitted stability data WHO PQTm considers the following storage condition appropriate for the product when distributed in regions with zone III, IVa and IVb climatic conditions, based on available stability information:

<sup>&</sup>lt;sup>1</sup> Trade names are not prequalified by WHO. This is the National Medicines Regulatory Authority's responsibility. Throughout this WHOPAR the proprietary name is given as an example only.
