Resource Mapping (REMAP)

Under the WHO General Programme of Work (GPM 13), the WHO Health Emergencies Programme (HEP) contributes to the strategic priority of having 1 billion more people better protected from health emergencies. WHO developed the resource mapping (REMAP) tool to advance this effort and support Member States in strengthening core health security capacities. The REMAP tool was first launched in 2018 to support country efforts to meet the requirements of the International Health Regulations (IHR, 2005) through the implementation of National Action Plans for Health Security (NAPHS).

Since then the REMAP tool has been adapted at country request to also support the implementation of COVID-19 preparedness and response plans as well as other national plans with relevance for health security.

Effective implementation of health security plans requires identifying country gaps and needs and mobilizing financial and technical resources (domestic and external). The WHO REMAP tool is used to map the health security projects and interventions at national and subnational levels — through financial or technical support — allowing policymakers and partners to see where the gaps exist and where more investment of resources is needed. This provides valuable information for the country, offers visibility for the partners' financial and technical investments, and supports alignment and harmonization of country and partner efforts.

The REMAP process fosters dialogue between countries and partners for a coordinated multisectoral approach. The tool, available in online and Excel versions, also allows countries to visualize the progress of implementation of their health security activities and plans, visualizing which areas and activities are being completed at what rate. WHO will support Member States in the use of the REMAP tool upon request and adapt the process for country context.

Strategic NAPHS

National Action Plan for Health Security (NAPHS)

The 5-year strategic NAPHS outlines key national priorities to enhance country capacities and capabilities under the International Health Regulations (IHR, 2005) based on a One Health for all-hazards, whole-of-government approach.

2017 - 2021 ▾ Coconut Island ▾ →| ↻ Data Management

Updated on 18 Nov 2024

Below, are the main buttons to navigate the online tool, apart from the data management section:

- **Dashboard:** You can click to access the main dashboard page.
- **Financial needs:** This page provides data on NAPHS costing, investments in the NAPHS and investments in overall health security.
- **Technical assistance needs:** This page provides details on the technical needs for NAPHS implementation identified through REMAP.
- **Overall Health Security Investment:** This page is where you can find details of investments in overall health security.
- **NAPHS Investment:** This page is where you can find details of NAPHS investments

3. Main Dashboard

3.1 Dashboard Front Page Visualizations

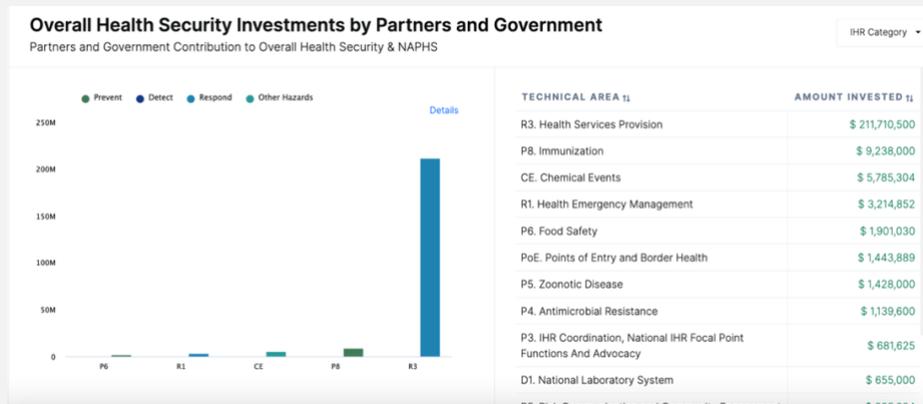

Instructions

Below are boxes listing key resource mapping figures:

- Total NAPHS Cost
- Partners and Government Contribution to NAPHS
- Funding Gap
- Partners and Government Contribution to Overall Health Security & NAPHS

You can also export all of this data to Excel and/or to a PDF.

This is followed by a chart showing the Overall Health Security Investments by Technical Area.

You can filter by IHR Category by clicking on the dropdown menu on the upper right corner.

If you click on **details** (the blue tab in the upper right corner of the bar chart), **you will access additional charts illustrating the health security investments**.

At the bottom right of the dashboard main page is a summary chart listing top donors supporting health security in the country. By clicking on **details** (the blue tab in the upper right corner of the bar chart), **you can access additional charts illustrating the health security investments.**

3.2 Visualizations of Overall Health Security Investments

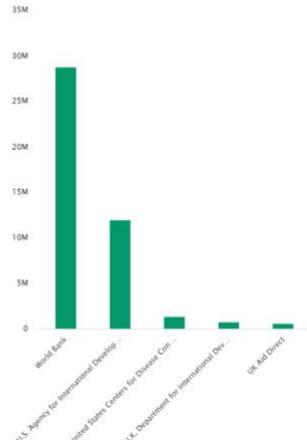

Once having clicked on the **details** button (see above), you land on this page, where you can choose whether you want to see visualizations of investments in overall health security or investments specifically committed to NAPHS activities.

Overall Health Security Investment per Partner

Not limited to NAPHS (USD)

[Export Excel](#) [Export PDF](#)

After clicking the **Investment tab** at the top of the page to select the investment page, you can insert the start and end years of the project. The tool will automatically calculate the total number of years (on the right). You can select the currency of the investment from the dropdown menu below. Under Total Amount invested, you can insert the amount invested and the tool will automatically convert it to US\$ using the current UN exchange rate.

After clicking the **Region(s) Receiving Support** tab on the top of the page, you can select from the dropdown menu the region receiving the support (the menu is pre-filled with the region names of the selected country). Select National if the project is conducted at the national level. You can choose several regions (if the project is in multiple regions but not national) by clicking on each region in the menu. If you choose more than one region, the tool will prompt you to specify how much funding is going to each region selected. When finished, you can click on the green Save button at the bottom right corner.
