JEE - Joint External Evaluation

Country states that have evaluated their main 13 core capacities by using JEE or GISA tool.

The JEE is a voluntary, collaborative, multisectoral process to assess country capacity to prevent, detect and rapidly respond to public health risks occurring naturally or due to deliberate or accidental events. The purpose of the external evaluation is to assess country capacity, to identify gaps (specific to the methodology), and to target the obtaining of the WHO-recommended priority actions to be taken across the 16 technical areas being evaluated. JEE replaced GISA tool in 2016.

The National Action Plan is a member states’ health security plan document that lists priority areas with steps of actions to achieve sustainable development. Source: http://apps.who.int/iris/bitstream/10665/255801/1/WHO-CCU-17.06-eng.pdf

c. UHC Partnership Target Countries

WHO - UHC Partnership countries are countries which are not currently UHC Partners or who are UHC Partners but have agreed to develop a new National Health Partnerships Plan. PDOs can provide a multi-stakeholder platform to promote collaborative working at global and country levels on health systems strengthening. UHC2030 is a transformation of RPH – International Health Partnership to create a single, harmonized global health development Plan Framework towards achieving universal health coverage.
