- Data are as reported to WHO. Estimates of TB and MDR-TB burden are produced by WHO in consultation with countries.
- Generated: 2020-02-06 Data: www.who.int/tb/data
- ° Ranges represent uncertainty intervals
- °° MDR is TB resistant to rifampicin and isoniazid; RR is TB resistant to rifampicin
- °°° Calculated for pulmonary cases only
- * Includes cases with unknown previous TB treatment history
- ** Includes patients diagnosed before 2018 and patients who were not laboratory-confirmed
